Breakfast Club Meeting Posponed

Pierre Mellonino

The usual first Thursday of the month meeting of the Radio and Music Trades Association of Southern California at the Breakfast club has been posponed from June 5 to June 12. This program will be sponsored by the Radio Broadcasters and is in the very capable hands of Mr. Pierre Mellonino, program director of KNX, who is acting as chairman for Mr. Naylor Rogers, manager of KNX. Mr. Mellonino's skill in the matter of program arranging is too well known to need further commendation, but watch Radio Doings for next week's announcement concerning just what you may expect in the way of entertainment at the June 12 meeting of the Radio Trades Association. DON'T FORGET—JUNE 12 INSTEAD OF JUNE 5.

The demand for the Master Dynamic Midget radio set has been so great that it was found necessary to take additional factory space and a large office show room on Western Avenue, according to Mr. Reed, secretary of the Master Co.

The additional space and the installation of new machinery will allow them to more than triple production, and they now hope to keep up with the orders which are pouring in from the Pacific Coast, Middle West and East.

The engineers of the Master Radio Company have brought out several very popular models during the past few years, but their new "midget" seems to be the "best bet" they have ever offered the public, and if they keep up their increased sale and production they will be one of the largest radio manufacturers in the West.

Charlie Kierulff and Garrett Arnold of Kierulff & Ravenscroft left Thursday, May 22nd, for the Crosley Distributors' Convention in Cincinnati. They intend to visit the R. M. A. Convention in Atlantic City and return in about two weeks.

A fancy bulletin arrived in the mail the other day from our good friend Bert Knight. The bul-let-in informed us that he was reversing Horace Greeley's admonition, "Go West, young man," and was going East. He remarked that if any of his creditors were looking for him they need look no further, but in case any of his customers and friends wanted to get hold of him, he can be reached at the Strand Hotel in Atlantic City, where he will be in attendance at the R. M. A. Convention.

Charlie Walter, who is the Southern California representative for the Davison-Haynes Company, Hyvac Tube Company, and several other popular radio and electrical lines, left for the East Thursday, May 22.

Charlie's good friend, Dave Marshank of Marshank Sales Co., another popular factory representative and an old timer in the radio game, left with him. They expect to be gone for three or four weeks and will be in attendance at the R. M. A. Convention during the week of June 2nd.

New Plant

The Officers, Sales Force and Department Heads of the Davison-Haynes Manufacturing Company

The Davison-Haynes Manufacturing Company, who started in business about four months ago, has had one of the most phenomenal growths of any radio manufacturer in the country.

They started operations in a small storeroom on Venice Boulevard, but within a month outgrew that location. They then moved into a good-sized factory at 1012 West Washington Boulevard, but now they have also outgrown that plant and have taken an additional 8,000 square feet.

Their new plant now covers an area of 14,000 square feet and they have the facilities to manufacture approximately 500 units per day.

Both Mr. Haynes and Mr. Davison are old timers in the radio industry, but they both admit that in their long experience they have never manufactured or merchandised any radio set that received such instant acclaim from the trade and the public. They are both very optimistic about the future and feel that the midget radio set is in the field to stay.

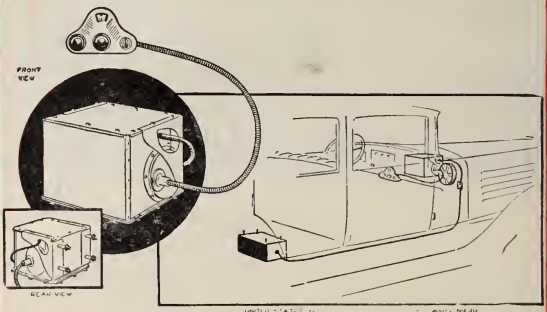
Mr. Mart Borden, general manager of the Plymouth Radio Company, 2825 North Main Street, manufacturers of the popular Plymouth radio receiver, is going around with a broad smile on his face. He stated that not only were orders coming in in very satisfactory quantities from Pacific Coast and Mountain districts, but he had just received some very substantial orders for export. He went on to say that radio fans in the Orient and South America are just beginning to realize that they can get good receivers at small cost and that they are sending in orders faster than they can be filled.

The import duty on radio sets in most of the countries is very high, and for this reason the low-priced set is an ideal radio for export, for in most cases they can sell the set at list at a price under $100, which up to this time was unheard of. No doubt, the midgets have struck the popular fancy.

Mr. Perry Demarest, manager of the Radio Supply Company of 912 South Broadway, Los Angeles, has again returned to work after a much needed two weeks vacation. Perry said that he is in favor of more frequent and longer vacations for all hard-working radio men.

It's *Here!*

U. S.
Automobile Radio



Price Complete with Tubes

$77.50

Less Accessories

Screen grid, of course. A circuit of outstanding efficiency. Unusual gain. Better tone quality. Simple to install in any make of car. Remote control dial. Does not require the removal of top or upholstery. Lowest in price. Efficient in performance.

See it on display at our show room, or write for literature.

Weekly Review of Radio News-Thought and Opinion

ONLY THREE STATIONS IN SOUTH AFRICA

South Africa has only three broadcasting stations and these operate on low power and thus serve small areas, Consul Cecil M. P. Cross, of Cape Town, has reported to the Department of Commerce. The stations are located at Durban, Cape Town, and Johannesburg, and all are owned by a single company.

Most of the broadcasting is in English although parts of every program are given in Afrikaans, which is the language most widely used in the farming communities. Talent is limited and phonograph records are still largely relied upon.

The stations are financed largely by license fees on the receiving sets. Advertising forms only a small portion of the income and consists chiefly in the reading of announcements.

APPELLATE COURT UPHELD AS SUPER-COMMISSION

The Court of Appeals of the District of Columbia is in effect a Super-Radio Commission, whose decisions in radio matters are administrative rather than judicial and not subject to review, the United States Supreme Court held in dismissing the Commission's appeal in the WGY case.

A hint of the attitude of the Supreme Court had been given several months previously when the Justices declined to hear argument of the General Electric counsel on the ground that it was unnecessary. This was the first opinion the court has rendered concerning the regulation of radio.

This view of the Appellate Court has already been incorporated in the Couzens Bill for the creation of a Communications Commission. A provision in the measure specifies that only in matters of law can radio cases be carried higher than the District Court.

The opinion, written by Justice Van Devanter, closes one of the most notable and longest radio cases on record. It dates back to the first general reallocation order of the Radio Commission in November, 1928. WGY was then reduced to limited time on the 790 kilocycle channel, on which Station KGO, of Oakland, Calif., also a General Electric station, was placed on full time. The Schenectady station took an appeal to the Court of Appeals, which reversed the Commission's decision.

STATION TAKES BLAME FOR LATE CHANGES

Instead of leaving the Radio Editors "high and dry", as is frequently the case when radio stations make late changes in their schedules, Station WAIU announcers at Columbus, Ohio, explain on the air that it is not the fault of the press when the printed announcements and the actual program do not agree. When a change that is too late to get in the papers is made, the following announcement is placed on the air:

"Because of an emergency, WAIU has been forced to make a change in its schedule as announced to the press, and therefore, it is through no fault of the Radio Editors that this station's schedule appears incorrectly.

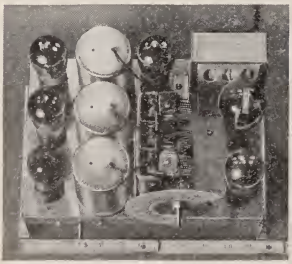
Western Broadcasters please note.

NEWSPAPER PLANS TELEVISION UNIT

The Milwaukee Journal, which now operates Station WTMJ, has applied to the Federal Radio Commission for authority to erect a television station as well. The application specifies the 2800 kilocycle channel in the continental short wave band.

The New Falck

Note the beautiful rich walnut finish, and the design of this modern cabinet. Dimensions ore 17⅜ in. x 14¾ in. x 9½ in.



The chassis of the Falck Model 77 is unusually sturdy, and completely shielded, with all wiring insulated, and the transformer well ventilated and cooled.

TABLE MODEL

Complete with Tubes and full DYNAMIC SPEAKER

$59.50

Never before has such a high-grade set as this Model 77 FALCK, complete with tubes and Dynamic Speaker, sold for a price anywhere near as low as $59.50.

It is a set that will blend with its surroundings and that anyone should be proud to own. The cabinet, in beautiful rubbed walnut, is of a striking modern design.

Here are the specifications:

1. Completely licensed under RCA, Hazeltine, and La Tour patents. 2. Complete with all A. C. tubes. 3. Equipped with full Dynamic Speaker. 4. Illuminated kilocycle reading dial. 5. Unusually sturdy, completely shielded chassis.

Don't fail to see this fine set before buying a radio.

STUDIO NEWS

The melodious voices of the Dare Sisters are not the only attractive things about these two KMTR artists, as you will quickly see by glancing at our cover this week. Dorothy and Mary Dare have been singing lilting melodies for quite some time over local broadcasting stations and for the last eight months exclusively over KMTR. You may enjoy these entertaining young ladies every Sunday evening between 9 and 10; Saturday nights on the Mickey Mouse program; Thursday evening at 8, and other times, not on regular schedule, over the Hollywood station.

KFWI, San Francisco, announces the removal of its studios to the Bellevue Hotel, Geary and Taylor Streets, San Francisco. KFWM, also of the northern city, recently changed its call letters to KROW, retaining former frequency, power and location.

To all Charlie Hamp fans—we have it on good authority that the "'cello-voiced" radio entertainer is leaving California for Cleveland, where he has signed a long term contract with a Cleveland station.

The new Russian Gypsy Orchestra, under the brilliant leadership of Gregory W. Golubeff, formerly concert master of the Imperial Russian Balalaika Orchestra, will be heard each Sunday evening from KYA between the hours of 5 and 6.

KHJ announces that Anthony Euwer, the distinguished poet, artist, lecturer and radio personality, will talk a little about most everything to the air audience daily, 7:30 to 7:45 a. m. Mr. Euwer gained radio recognition as the Bard of the Air and Philosopher of the Cross Roads on the old ABC chain. He has a rare power of description gilded with humor; his approach to the world is entirely human and sympathetic. On Sundays, Mr. Euwer's chat is scheduled for 8:45 in the morning.

The Happy Chappies, dressed identically, debonair, and with the undefinable poise born of long years on the stage, have joined the featured artist ranks of KFI-KECA. They are Nat Vincent and Fred Howard, song writers, singers and pianists. Two numbers only from the hundreds of hits which they have written are sufficient to endear them to the hearts of the radio public. "I'm Forever Blowing Bubbles" and "When the Bloom is on the Sage."

It is not too late to get the gist of the inhuman and supernatural new mystery serial, "The Haunted House of Kildare," by Gene Homer Griffith, which is being given over KMPC every Tuesday night at 9.

Dick Dixon purveys some brilliant organ melodies six nights a week at 11 p. m. over KGER, Long Beach. This is known as the "Quiet Time Tunes" and as such carries no announcements except the station call letters.

Seymour Hastings, well known in all fields of radio in Southern California, is now conducting a series of interesting talks entitled "Seeing Southern California." His schedule is as follows: Tuesday, Wednesday and Friday over KNX at 9:10 a. m.; KFWB, 10:45 a. m.; KECA at noon; KFI, 12:30; and KFOX, 3:45 p. m.

If your interest is intrigued by oddities, you will be entertained by KOL's Friday night program. It is called "Would You Believe It?" and the time is 7:30 p. m.

The Tuesday Noon Club of KYA brings Tex Frolich to the microphone with thrilling tales of adventures in the air. Out of 10,000 flying hours which Tex has to his credit, approximately 3000 of them were obtained during the World War. Flying enthusiasts as well as lovers of thrilling stories will enjoy these talks by a man who thoroughly knows his subject.

1000 SOUTH BROADWAY

Corner 10th St., *"The Famous Radio Corner"*

LOS ANGELES

QUESTION—I notice that some sets advertise an "automatic volume control." Will you explain what is meant by this, and does it eliminate the usual volume control knob?

H. T., Los Angeles.

ANSWER—This is a method of controlling the grid bias on the RF amplifier tubes, by means of an additional tube. In operation, it has two advantages. The first is that it prevents local stations from blasting in with very heavy volume when you pass over one with the volume control set for a weaker station. For example, assume that you live near Los Angeles. You are listening to KPO, and then want to tune up to KFSD. As you pass over KFI, it is unnecessary to touch the volue control, because, automatically, KFI will have no greater volume than KPO and KFSD. And as you run up and down the dial, practically all stations will come in with the same volume. The sensitivity of the set is automatically reduced when you strike a strong local signal, and increased when you come to a weak signal. The second advantage is that it eliminates fading to a large extent. You have noticed how semi-distant or distant stations fade in and out while you are listening to them, without your touching the set at all. This is a natural phenomena, due to a shifting of the Heaviside Layer, and until now there was nothing that could be done about it, unless you kept your hand on the volume control and kept pace with the fading by raising and lowering the volume. With the automatic volume control, however, this is done automatically, so that the signal is reproduced with an even volume. When the signal has a tendency to fade below the volume for which you adjusted the set, the sensitivity will automatically increase just as though you had manually turned up the control, and will again decrease when the signal surges back strongly.

Of course, when the fading is so bad that the signal fades out entirely with the volume control wide open, the automatic feature will not bring it back any more than you could build up an inaudible signal after your manual volume control is already wide open.

QUESTION—Will you please explain what is meant by "Tone Control" as incorporated in radio receivers?

H. T., Los Angeles.

ANSWER—This is a variable filter circuit connected in the audio amplifier channel which serves to suppress either the high end of the frequency range or the low, as the case may be. It enables the set operator to thus alter the overall frequency characteristics of the set, to produce music of a nature pleasing to his particular ear. It is based on the assumption that there is a variation in the human ear in its response to music frequencies, and that, therefore, the matter of personal taste enters into the question of tone fidelity. In other words, does the listener want reproduction, which is as nearly accurate as it is possible to make it, or does he want what best suits his own ear and his own conception of how the music should sound. Some manufacturers take the former stand, and some provide the tone control which, by the turn of a knob, causes either the high or low frequencies of the music to predominate. This knob can be adjusted for the normal full-range reproduction, of course, when desired.

NBC Acquires KTAR

Outstanding stars of the radio world will be heard by the radio audience, Sunday, June 8, when station KTAR of Phoenix, Ariz., becomes associated with the National Broadcasting Company.

"Arizona on NBC Parade" is the gala program arranged in celebration of the inaugural in which New York, Chicago and the Pacific Coast divisions will participate.

Broadcast through the nation-wide network of NBC stations. The program will begin promptly at 7:15 PST, and continue until 8 o'clock.

The Majestic Chicago Trip

By K. G. O.

Chicago, Ill.—Two special trains, snaking their way speedily over mountains and across deserts, plains and fertile valleys, brought to Chicago 250 Majestic radio dealers from Southern California and Arizona. It was the second annual pilgrimage, sponsored by Ungar & Watson, Majestic distributors, and Grigsby-Grunow Company of Chicago, manufacturers.

With joy rides at Salt Lake City and Cheyenne, pajama parades at Ogden and Omaha, with the band and serenaders, the movies each night, the entertainment provided by the inimitable Harry James, etc., the boys had a wonderful time. In fact, Sheriff Hatfield was kept mighty busy trying to prevent the lads from taking some of the towns to pieces along the way. As it was, the second train, known as the "Bill Bouldin Special," arrived in Chicago just two hours late for some undetermined reason. Possibly they sidetracked at Cicero, in order to finish a game of dominoes!

The dealers were the guests of Grigsby-Grunow Company at the Lake Shore Athletic Club, where the Sales School was conducted. Here they attended seven sessions of instruction, where they heard lectures on every phase of radio merchandising. They saw the new Majestic models for the coming season and the Majestic Power Refrigerator. They were instructed in everything, from the technical and engineering standpoints, to the best methods of window dressing. They took notes on every lecture; they sang at every session; they played and worked and slept (a little), and finally were examined. Those who passed, first as men, then as salesmen, and finally as Majestic salesmen, were awarded the red Majestic ring, which is the identifying symbol, making its wearers welcome when he "pulls" your doorbell.

The lads went through the great plants where 5000 Majestic receivers are manufactured daily; they witnessed a baseball game at the Cubs home field; they dined at the famous "Terrace Garden;" they saw Chic Sales, of "The Specialist" fame, in "Hello, Paris;" they shook Bill Grunow by the hand; they

A Page from the Life of Ray Paige

By DICK CREEDON

A rigid baton directed by a flexible brain occupying the skull of Raymond Paige, Musical Director of KHJ, has accomplished what has been called impossible in the past. Heaven, to the manager of a radio station, is a place where radio orchestras can play symphonies, grand operas, musical comedies, jazz and popular ballads with equal facility. Probably every major station has experimented hopefully with orchestras and directors in the hope of creating such a heaven on earth. But Raymond Paige, if the records of radio history are complete and accurate, is the first mortal to make the splendid little idea work smoothly. Therefore, Mr. Paige automatically becomes an immortal—although he is still subject to colds, chilblains, stomach aches and the various disappointments of life. Let us be very blunt about the whole matter: The KHJ orchestra, when directed by Raymond Paige, can play all types of music with equal facility. And what are you going to do about it? Tune in, possibly.

RAYMOND PAIGE

William S. Paley, chief of the Columbia Broadcasting System, was deeply impressed by the really glaring virtues of Los Angeles on his recent visit. But the shock from which he is now recovering came when he discovered that the same orchestra and director which he had heard playing a Lohengrin Opera Miniature at eight o'clock one evening was batting out a hot, fast dance broadcast at nine the same night—with convincing distinction in both cases. According to Mr. Paley, it really isn't being done in the East.

Although Mr. Paige would win the musical decathlon at the Olympic games, he insists that there are directors who would break the tape first in any single event. It is just too bad that the leaders of the great symphony orchestras—many of them, at least—can't even get off their marks when it comes to playing even the light classics, let alone jazz and musical comedy. And it is equally sad for the managers of radio stations that our geniuses of syncopation give up when confronted by anything cooler than 175 degrees fahren—let's say, centigrade—easier to spell—or born before 1910.

For all this, there's a reason. You might as well know the whole truth now. When little Raymond was 14 years old, Chicago thought it saw through its smoke another fiddle genius. The lad was clever with the bow. One night, in a fairly conspicuous recital, a four-year-old Russian with large ears was pushed in on a kiddie kar and made our boy look like a ham without mustard. For six weeks, Raymond didn't feel like eating. Then he made a second discovery: That the four-year-old had, in turn, been completely outclassed by a Bulgarian, age three and three-quarters. Immediately, this being an age of specialization, the future musical director of KHJ determined to specialize in generalizing. He wandered or ran from one field of music to another and with his tremendous power of absorption, unusual physical and mental vitality, an amazing enthusiasm, gathered experience. Playing in symphony and grand opera orchestras; attending hundreds of rehearsals under the great conductors of grand opera and symphony; learning musical comedy at the feet of Victor Herbert and going on the road as concert master of a musical comedy show; headfirst into the show business; making the Orpheum and Pantages circuits; in charge of routing, revision, coaching acts for the Publix houses; drilling dancing and vocal choruses, preparing jazz band novelties; learning dance music from the big jazz boys and conducting his own bands in big hotels and theaters; and finally into the lap of radio and KHJ. Musically speaking, Raymond Paige has been everywhere and is at home everyplace. He is a glutton for experience and saves and catalogues everyone of them for future use. In radio, future use means tonight or tomorrow at the latest. Six nights a week, KHJ draws heavily upon his knowledge of symphony music, musical comedy, jazz and showmanship. Raymond Paige is a rare leader, a demon for any form of punishment, a

BRING YOUR RADIO BACK TO LIFE!

The NEXT BEST *to a* MAJESTIC RADIO *is a set of*

Majestic Matched Tubes!

Any radio is better with Majestic Matched Tubes. If the reception of your present instrument is "fuzzy," weak, distorted or just ordinary, the fault undoubtedly lies in the tubes. Install a complete set of Majestic Matched Tubes and note the amazing difference. These superior tubes cost no more. Your nearest Majestic dealer has a fresh supply. Insist on Majestic Matched Tubes . . . the same tubes used in every Majestic radio.

FREE TUBE TESTING . . . *without obligation.*

It makes no difference what make set you own . . . your nearest Majestic dealer will gladly send a service man to your home and test every tube in your set. There is no charge. This is a typical Majestic Service to help you get more radio enjoyment.

UNGAR & WATSON, Inc.

Distributors in Southern California and Arizona.

Raymond Paige

(Continued from page 15)

spouting fountain of ideas and, as far as KHJ is concerned, is the pink pearl of radio. He believes that all the hard knocks and handsprings which experience has dealt him in the past have merely been smoothing off the rough edges and preparing him for radio. His ambition is to be musical director of KHJ—but a bigger and much better musical director of a bigger and much better KHJ.

10:00 p. m.—Spotlight Review.

Ralph E. Hetzel, formerly in charge of production of the Zaney-Gill Corporation, manufacturers of the "Music Box" and then in charge of production for the Davison-Haynes Corporation, manufacturers of the "Angelus," is now in charge of engineering and production for the Keller-Fuller Manufacturing Company, who manufacture the popular "Radiette."

Mr. Hetzel has installed all the necessary equipment, benches and machinery to manufacture in excess of 100 sets a day and expects to reach this quota within a very short time.

Mr. Fritz Falck, president of the Advance Electric Company, is now in San Francisco visiting the trade and making plans to get additional distribution in the Northern California territory.

According to reports the Advance Electric Company have more than tripled their production and are looking forward to a very busy season.

The entire sales force of the Los Angeles house of Kierulff & Ravenscroft have been on a vacation during the last week. Many of the boys have spent their time trout fishing in the High Sierras.

Mr. Al Ravenscroft, president of the company, is expecting plenty of pep from his salesmen after they get back from their vacation.

Mr. Paul V. Parker of the Radio Electric Shop, 3834 Main street, Culver City, breezed in the other day looking very happy and contented with his lot in life. He said that he was enjoying a nice business and was selling lots of Radiola 33's and, best of all, he was keeping his customers satisfied.

A post card came in the other day from Niagara Falls, New York, from Barrie Bloedon, the Eastern representative of the Zaney-Gill Corporation of Los Angeles. Mr. Bloedon reported an excellent trip so far and that his faithful Chevrolet sedan had carried him East without a mishap.

He will be in Atlantic City during the week of the R. M. A. Convention and then intends to start West, arriving in Los Angeles some time in July.

C. W. Smith of the Griffin-Smith Manufacturing Company, manufacturers of the Royal Portable and Mantle sets, has just returned from ten days in San Francisco and Northern California. Mr. Smith reports that he was able to arrange very satisfactory sales outlets in Northern California and expects to do a large volume of business in that territory.

Mr. James Dean of Prest and Dean of Long Beach, left with the Majestic dealers for Chicago to attend the Grigsby-Grunow Company's dealer convention.

Jimmie is an expert saxophone player and is one of the main stays of the Majestic band. We hope that he and all the other dealers not only have a good time on this trip but will come back full of pep and optimism.

Another one of the Los Angeles radio fraternity who is now in the East is Mr. Harry Keller of the Keller-Fuller Manufacturing Company. Mr. Keller will not only attend the R. M. A. convention in Atlantic City but expects to visit all the large cities in the East and Middle West before returning to Los Angeles.

Radio Financing

ROBERT E. HOPKINS & CO.

417 South Hill St. Los Angeles MUtual 6282

Breakfast Club June 12

The Radio and Music Trades Association members and guests will gather on June 12th at the Breakfast Club, Riverside Drive, Los Angeles, for their monthly get-together. This Thursday meeting, which was postponed from June 2nd, is sponsored by the Radio Broadcasters, with Naylor Rogers, Manager-Director of KNX, as chairman. Pierre Mellonino, Program Director of KNX, will again display his genius for providing the best in the way of entertainment, by presenting the following outstanding radio personalities: From KNX, Margit Hegedus, Hungarian violinist, will do the honors; KHJ will be represented by Elvia Allman, Nelle Larsen and Gene Byrnes, in the character of Standard McWebster. Tom Terris, the Vagabond Movie Director from KFI, The Ranch Band from KTM, Bennie Light and Mark Cook from KMPC, and a Dance Orchestra from KGFJ, will all be there to out-do themselves in the way of entertaining.

Mr. Sol Zaney, president of the Zaney-Gill Corporation of Los Angeles, is now in the East in attendance at the R. M. A. convention. Zaney-Gill has a booth at the show and will exhibit their latest models of Music Box Clarions.

Since the midget manufacturers have been installing dynamic speakers in their receivers, Mr. C. E. Flynn, Southern California representataive for the Magnavox Company, has been kept busy getting shipments of their famous dynamic speaker out of the Oakland plant and on the way to Los Angeles. Both Magnavox and Mr. Flynn deserve their excellent business as the speaker is exceptionally well made, and Mr. Flynn is a tireless worker.

The Sunset Manufacturing Company, manufacturers of the popular Sunset Aerial and Ground, have moved their plant and sales offices to 1114 North Sycamore Avenue, telephone number GRanite 0401.

Mr. Fred J. Vondenbosh is now managing both the production and sales.

Mr. Ray Stolle, of the Flint Radio Company, is now in the East visiting his sources of supply and expects to get everything in shape to do an unprecedented business in Flint Radios this season.

Mr. Stolle expects to be in Atlantic City during the week of the R.M.A. convention.

The new compact Rola dynamic speaker has "clicked" with the midget manufacturers and is in great demand, according to Mr. Lloyd E. Holten, sales manager of the Rola Company. "We expect to do an enormous business on this type of speaker during the coming year and have equipped our factory to take care of the demand," said Mr. Holten.

The Majestic Chicago Trip

(Continued from Page 14)

rode in the Majestic hydroplane; and . . . . watta time they had!

The vision of a manufacturer and distributor who pulls a stunt like this can only be rewarded in a vast increase in business, not only because of the increased efficiency of the dealer organization, but also to the unshakable dealer confidence and enthusiasm which is bound to result. These dealers have seen the factory and have been inspired by the magnitude of the thing, they KNOW Bill Grunow, the dynamic figure who is directly responsible for the tremendous success of Majestic, they know the engineers, the sales manager, the advertising manager, and they have been in close and friendly contact with the officials of their local distributing concern. Bill Wilson, who awards and cancels Majestic dealer franchises in the home territory, and had charge of one of the trains, is no longer the ogre behind the manager's desk,—he is a friend!

The dealers left Chicago on Decoration Day, encouraged a bull fight at Jaurez, and are now back on the job. We predict that this crowd of radio dealers are so strongly sold on Grigsby-Grunow Company, Ungar & Watson, Inc., themselves, and Majestic Radio, that nothing can stop 'em now!

Weekly Review of Radio News-Thought and Opinion

FEDERAL TRADE COMMISSION TO CENSOR RADIO ADVERTISING

The strong arm of another branch of the Federal Government is about to enter the radio field to supply certain powers which are not granted to the Radio Commission.

The Radio Act does not give the Federal Radio Commission any power of censorship. It is true that in any contest between radio stations for a particular assignment, the Radio Commission may, in determining the "public interest, convenience and necessity," take into consideration the character of the programs and advertising data put out over such stations, but they have no power whatever to censor such programs, or prohibit any material so long as it does not come within the prohibited features of the Radio Act.

However, it now appears that where the Federal Radio Commission finds itself considerably handicapped, the Federal Trade Commission, it is understood, believes its powers, in the matter of the prohibition of unfair methods of competition, including fraudulent and false advertising, in newspapers and elsewhere, are applicable to a radio station as well.

It is obvious, according to the argument advanced, that a radio station carrying advertising prohibited by the terms of the Federal Trade Act falls within the Trade Commission's jurisdiction.

EVERY OTHER FAMILY HAS RADIO

There is a radio receiving set in the home of virtually every other home in the United States, a national industrial survey conducted by Dr. Daniel Starch, of Cambridge, Mass., for the National Broadcasting Company reveals. A copy of the report has just been received by the Federal Radio Commission.

Forty-three per cent of the families in this country, numbering 52,581,860 persons, comprise in the radio audience of the nation, it is estimated by Dr. Starch on the basis of a personal canvass of 18,000 families in representative parts of the United States. Of the approximately 12,824,800 radio set owners, more than 81 per cent listen in more than two hours daily.

The most popular hours of the day for radio programs are between 8 and 10 o'clock at night and Saturday and Sunday nights have a slight edge on the other evenings of the week.

"Light musical features" are the most popular radio programs, though there is a remarkable interest in agricultural broadcasts. Fifty-two per cent of the families interviewed have had their sets more than two years.

The common belief that radio reception declines considerably in the summer was discounted by the survey. More than 78 per cent said they used their set extensively during the warm months. Long distance reception and "DX" fans were found to be rapidly disappearing.

LOUD SPEAKER COURTESY SUGGESTED

It is suggested that an application of Golden Rule or at least a little consideration for others will do more than a police order to silence loud speakers late at night or when they are otherwise obnoxious. Somebody is sure to tap on the wall or show disapproval quickly if a piano is banging away too loudly after 11 o'clock at night. There appears to be really very little justification for turning on a speaker so loud that it disturbs the next door neighbor but if this must be done, it should be done tempered with good judgment.

LOS ANGELES, CALIFORNIA

2825 NORTH MAIN STREET

The interested way in which SallyJo Walker is peering at the letter in Grant Merrill's hand stimulates our curiosity greatly. We assume, however, that the letter is from an admirer of this clever team, whose daily, except Sunday, appearance before the microphone of KJR occurs at 9:40 a. m. The Northwest Broadcasting Company, which includes KJR, KEX and KGA, is building exceptionally good programs these days, and the couple on our cover this week are numbered among the oustanding radio teams of the Northwest. Dial 970 kilocycles some morning and enjoy melody which is effervescent, spontaneous, and altogether delightful.

An address by Dr. Julius Curtius, German Minister of Foreign Affairs, delivered in a Berlin broadcasting station, will be rebroadcast in America Saturday, June 21, by the National Broadcasting Company, if present plans are successful.

Frederick M. Sackett, American Ambassador to Germany, is also scheduled to be heard during the broadcast, which is expected to last from 3:30 until 4:30 p. m. Mr. Sackett will introduce Dr. Curtius and deliver a short address himself.

Besides the talks by the foreign minister and the ambassador, the program will include a group of German student songs by a male chorus.

The program will originate in the Berlin studios of the Reichs Rundfunk Gesellesschaft and come to America via short wave.

An extensive NBC network will carry the German program for June 21, including the following western stations: KGO, KHQ, KOMO, KGW, KFI, KFSD, and KTAR.

Monday, Wednesday and Friday at 7:15 over the Columbia System, Heywood Broun, famous New York critic and newspaper columnist, does a fifteen-minute sketch. In the bay district tune in to KFRC. As yet KHJ has not been able to arrange for this feature, but we have hopes.

George Olsen's famous dance orchestra, now teasing toes at Mr. Olsen's Culver City joy mart, will attack the KHJ microphone every Wednesday night from 8:30 to 9:00. This series will be broadcast over the Pacific Coast and Mountain states units of the Columbia Broadcasting System.

KGER's Sunday night frolic has been relegated to the ash heap, or wherever it is that discarded radio programs go. In its stead you will find Ole and his gang. This is a band of trusty performers, muzzled and led by Jerry Purcell, station announcer, who takes the part of Ole. Sunday nights at 10:00.

KFI's Monday night "Soiree Intime," at 9:00 o'clock, presents the station's outstanding artists in a program of exceptional merit. Virginia Flohri, Robert Hurd, Jose Rodriguez and Zhay Clark participate.

Big Brother Ken's Kiddie Club, at KNX every evening, exclusive of Saturday and Sunday, at 5:15, is unique in many ways, but one rule especially deserving of encouragement is Big Brother Ken's firm belief that children should be children in their acts, and singing "blues' should be left to the older brothers and sisters. And this rule holds, in spite of the weekly auditions to between 50 and 60 embryonic child radio stars.

"Mac," famous figure of the blue Monday Jamboree and Happy-go-Lucky Hour, KFRC features, will be heard every Monday night through KHJ in a series of completely new programs. These 5:30 to 6 features are designed especially for children, but Mac's appeal is considerably more copious.

The romantic lure of Spanish music may be enjoyed in the work of Saldans' Castillians, who play over KFWB on Thursday night from 8 to 9. With them is Carmelita, Spanish soprano, whose solos are a highlight of the program.

QUESTION—I have a custom-built AC set which is very satisfactory, except for one thing. I am situated where the line voltage fluctuation is quite bad and this is a disadvantage which I should like to overcome if it is possible. Will any of the line voltage regulators or balast units advertised for the purpose, maintain the voltage at a constant value. I understand how such a unit could prevent the excessive surges but I do not see how it can build up the voltage when it falls below normal. How can I compensate for the lows as well as the highs?

J. McB., Los Angeles.

ANSWER—You are correct in assuming that none of the regulators added to your set will build up the line voltage when it drops below normal. They are very useful on a line which runs above 110 most of the time, but on a line where sub-normal voltage prevails they only serve to reduce the voltage still more. What you can do, is exactly what manufacturers do who equip their sets with voltage regulators. They use a power transformer which is designed for about 85 volts input to give normal operation of the set, and then put in the regulator designed to maintain this voltage constant. The hot resistance of the regulator is such that 110 volts is dropped to 85 volts. Then as the line voltage varies, the regulator will (through variation in its resistance) keep the voltage drop across its terminals such that the voltage applied to the primary of the power transformer of the set does not vary greatly from the specified 85 volts. You can replace your power transformer with one designed to operate with whatever voltage control unit you have in mind. Amperite, Raytheon and Clarostat are some of the manufacturers who build equipment of this type.

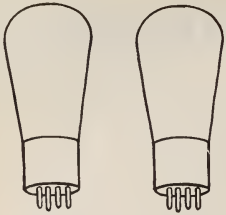
QUESTION—I have installed an old battery operated Atwater-Kent set in my automobile but have a great deal of interference from the ignition system of the car. What are the methods used in commercial installations to minimize this interference?

C. S. W., Pasadena, Cal.

ANSWER—The usual system of ignition intereference elimination consists of suppressing high frequency oscillations in the secondary or spark plug circuits, and providing by-pass condensers for the oscillations set up in the primary circuit by the make and break of the interrupter. Then it is also advisable to treat the generator in the same way to avoid noise from the arcing at the commutator. The high voltage circuits are dealt with by inserting resistance units at each spark plug. These are usually carbon resistors of about 25,000 ohms. This must be a special type of resistor, however, which will not alter value under the high voltage discharges. A suitable unit is made by the Ohio Resistor Company, known as the Ohiohm. A condenser is shunted across the primary of the ignition coil and the breaker to ground. A second condenser is conected from the output lead of the generator to ground. In some cars it is necessary to add another suppressing resistor in the high tension lead to the center of the distributor head.

KFSD Joins NBC

The National Broadcasting Company is busy gathering more new stations to the long list of affiliated stations. No sooner had we announced the addition of KTAR, Phoenix, than KFSD, San Diego, joins the fold. The annexing of the San Diego station will be of enormous benefit to that locality, whereas the desert-dwellers of the Southwest, to whom the privilege of hearing really good radio programs has long been denied, will now hear the best on the air.



Names Off and You Could Not Tell One from Another

Radio tubes look alike outside and inside. But what a difference when it comes to performance. There are reasons—and plenty of them—why Professionals endorse Pilotron Radio Tubes. If you could test your tubes as the scientist does, you would quickly agree that Pilotron Radio Tubes are to be preferred . . . dependable under all conditions—quick to get into action—perfect in tone reproduction—uniform in quality. Even though Pilotrons are better, they cost no more than ordinary tubes. Your Pilot radio dealer will gladly explain more fully why you should prefer Pilotrons.

The R. M. A. Trade Show

By K. G. ORMISTON

Atlantic City, N. J., June 4.—As I look out of the window in search of an idea for starting this story (it's sometimes easier to find 'em out of the window than in my head), I hear the roar of an airplane motor. Then it comes into sight. It's a hydroplane, skimming along a few feet above the occan and zooming over the amusement piers in its path like a small boy playing leapfrog. The plane is decorated with flags and the gondola bears the legend, "Atwater Kent Radio."

Further out on the bosom of the Atlantic a sailing yacht majestically glides along parallel with the shore. On the spread of white canvas I see "Majestic Radio." High above me is a captive balloon carrying a great banner with the word "Philco."

Down below on the famous boardwalk I hear music. On the illuminating standards there are helmets from the armored suits of knights of yore, and it is from these that the music emanates. Each bears the "RCA" monogram. Music all along the boardwalk, with no evidence of loud speakers! The piece heard at the moment is the "Maine Stein Song," which might be termed the theme song of this convention. Personally, I've heard it every day since I left Los Angeles!

The Annual Convention and Trade Show of the Radio Manufacturers Association is housed in the world's greatest auditorium. A magnificent building, so vast in size that the Show, which was spread all over three hotels in Chicago last year, is almost lost under this one roof. The main auditorium is capable of seating 42,000 people, and then there are other "small halls" which hold only 5,000 folks. It is in one of these that the annual banquet was held.

A review of the Trade Show brings to light the almost universal use of screen-grid tubes, and the predominant circuit is of course tuned radio frequency with four and five tuned circuits. The RCA combine (RCA, Victor, General Electric, Westinghouse, and Graybar, are showing a screen-grid superheterodyne, but practically all of the rest of the manufacturers adhere to screen-grid R.F. circuits.

The universal use of dynamic speakers and push-pull audio amplification with the 245 type power tubes is also evident. There are three features that have been used infrequently heretofore which are very much in evidence at this Show. These are automatic volume control, tone control, and remote control. A word about these three features will not be amiss. The automatic volume control is built into the circuits of the receiver, and by its means the set adjusts itself to the strength of the incoming signal and the user has only to tune to the station he desires, having previously set the controls for the amount of volume he wants. As a result of this improvement listeners will become interested in DX reception, for they can now receive distant stations without the tuning skill necessary heretofore to prevent an unbearable roar from nearby stations.

The tone control feature permits the listener, by means of a knob on the set, to suppress or accentuate different portions of the musical range to produce the most pleasing effect for his particular ear, inasmuch as our ears vary in their sensitivity to different frequencies. Some manufacturers claim that radio receivers should render an accurate and perfect reproduction of the original music, and that any tampering with the tone range by means of a "tone control" results in an untrue and unnatural reproduction that the public should not have even if they like it.

The remote control feature consists of an attachment whereby the set operator can tune to any desired station and regulate the volume from his easy chair at any distance from the radio instrument itself.

An interesting feature of the Show is the midget sets,—small, compact table models known as the "clock type," selling complete for less than $70. Four of these are displayed, three of which are manufactured in Los Angeles. This is indicative of Los Angeles' position in the lead of the midget industry.

For the first time in an R. M. A. Trade Show, television receivers for the home are being shown, both in complete form and in kits. The Jenkins Television Corporation is displaying elaborate cabinet models of their radiovisor and special AC short-wave

(Continued on Page 42)

The essential features of these programs are identical with those sent us by the stations

BRING YOUR RADIO BACK TO LIFE.

The NEXT BEST *to a* MAJESTIC RADIO *is a set of*

Majestic Matched Tubes!

Any radio is better with Majestic Matched Tubes. If the reception of your present instrument is "fuzzy," weak, distorted or just ordinary, the fault undoubtedly lies in the tubes. Install a complete set of Majestic Matched Tubes and note the amazing difference. These superior tubes cost no more. Your nearest Majestic dealer has a fresh supply. Insist on Majestic Matched Tubes . . . the same tubes used in every Majestic radio.

FREE TUBE TESTING . . . *without obligation.*

It makes no difference what make set you own . . . your nearest Majestic dealer will gladly send a service man to your home and test every tube in your set. There is no charge. This is a typical Majestic Service to help you get more radio enjoyment.

COMMISSION PICKS ANOTHER LAWYER

The Federal Radio Commission again turned to the Department of Justice and the law profession in choosing an Assistant Secretary to fill the vacancy caused by the resignation of Frank Lovette, a political appointee who quit after he failed to land the Secretaryship. The new assistant is John B. Reynolds, a holder of an LL.B. degree and who has been an assistant clerk in the Justice Department. He comes from Minneapolis.

James W. Baldwin, who was Chief Clerk and thus boss of Reynolds in the Department of Justice, was recently chosen Secretary of the Commission. He also is a lawyer.

Harry Giese Is Program Director of KMTR-KMIC

"Happy Harry" Geise is not wondering what to do with his spare time now that he is building programs for both KMTR and KMIC. Program directors of only one station usually are slightly harassed-looking individuals, whose many and important duties bring snowy locks all too soon. Mr. Geise, however, is an old hand at this business of giving radio listeners real entertainment and the handling of two good-sized stations doesn't make him one whit less happy or entertaining, both personnally and on the air.

HARRY GEISE

Starting at KYW, then a tour of Eastern stations with Wendall Hall, over KDKA, WJZ, WEAF, WDAR and others throughout the East, Mr. Geise, song writer, continuity writer, announcer and so forth, returned to Chicago, entertaining on all of the Chicago stations until the spring of 1924, when he became assistant announcer and program director at WQJ, Chicago. At this station Harry wrote the original "How Do You Do" song, singing over six thousand seven hundred verses in answer to over fifty thousand telegrams and letters, in ten months.

After a brief stay at WIBO, Chicago, as general manager and chief announcer, there followed a tour of the West Coast stations, appearing as entertainer and announcer on KNX, KFI, KFWB, KNRC ,and KFQZ, and returning to the old stand in the spring of 1925, as general manager and chief announcer of WQJ, Chicago. One year later, the Chicago Daily News, owners of WMAQ, bought the station WQJ and placed Mr. Geise as chief announcer and manager of the continuity department of both WMAQ and WQJ. While acting in this capacity he toured the East and again appeared on the Eastern stations, including a program over the Columbia Broadcasting System, and

(Continued on Page 43)

R. M. A. Trade Show

(Continued from page 15)

receiver, as well as less expensive kit radiovisors for home assembly. A later issue of Radio Doings will outline fully the progress made and present status of radio-television.

Several sets incorporate a new feature, whereby the loud speaker is silenced while tuning, and only becomes audible after you have tuned in your station to the desired volume as indicated by a meter.

Many sets have visual devices for indicating when you are tuned to your station's peak. Some include line filters for reducing the noise caused by electrical interference. We are glad to see this at last.

Radio-phonograph combinations seem very popular, and these instruments are no longer restricted to the high price class. Some very marvelous cabinets are displayed. Majestic, for one, has gone in for high grade custom-built cabinets. A $5,000 cabinet built for W. C. Grunow was one of the features of the show. All of Majestic's furniture is very fine. By the way, their new sets use four screen-grid tubes.

There is considerable interest in radio equipment for automobiles. Some automobile manufacturers are already installing antennas in certain models as standard equipment, and are providing means for mounting receivers and speakers. More next week.

Here's Something *NEW!*

You can bring your radio up to date by installing a **TONE CONTROL** at a cost of only $5. Less than one minute to install. Raise or lower the pitch of your set at will. Fits any set except Reflex. Order at once. Immediate delivery.

Harry Geise

(Continued from Page 42)

a program over the National Broadcasting Chain. In the spring of 1928, St. Paul, Minnesota, claimed Mr. Geise for the chief announcer and manager of the continuity department of their new 10,000-watt station KSTP, where he remained until January of 1929, at which time the call of the Golden West brought him back to Los Angeles. After three months at KFWB, Harry Geise was appointed program director of KMTR, where he has remained for nearly a year in various capacities, ranging from piano player and announcer to continuity writer, entertainer and program director. Under the regime of V. G. Freitag, Mr. Geise has been recently appointed program director of KMIC as well as KMTR.

MART BORDEN

The Plymouth Radio Corporation of 2825 North Main Street, Los Angeles, has just introduced to the trade a very beautiful little three screen-grid midget radio. Mr. Borden, the manager of the company, believes that he has developed a radio that does not have to take off its "proverbial hat" to any machine on the market anywhere near its price class.

He said, "Such tone quality, selectivity, and will it play distance? You should just hear it!!"

The Griffin-Smith Manufacturing Company of 1125 Wall Street, has developed and is now introducing to the trade and radio public the latest type of radio-phonograph combination.

The combination is in the form of an end-table with a book-rack below.

The machine is equipped with full tone Magnavox dynamic speaker, screen-grid tubes, 45 output power tube and the very latest type of electric pick-up and turn-table.

The cabinet is of hand-rubbed walnut and, with the controls on one end, it makes a convenient, serviceable and good looking instrument for the home.

It has just been announced that Fey & Krause of 1616 South Figueroa Street have been appointed Southern California distributors for Edison Light-o-matic radio receivers. We will make a more detailed announcement as soon as we receive all of the facts about this new appointment.

Mr. R. B. Yale, president of Yale Radio Electric Company, 1111 South Wall Street, is becoming more enthused every day about the new U. S. automobile radio set. He said that this new universal radio for motor cars has the same electrical and mechanical construction built into the entire Apex line of consoles. The slogan for the U. S. Radio & Television Company has been "Quality must be far beyond the price."

The automobile radio brings to the motorist the identical radio pleasures now enjoyed at home in the living-room and it is an excellent way to have additional pleasure on a long motor trip.

Mr. Charles Kierulff of Kierulff & Ravenscroft, California distributors for Crosley radio equipment, returned from the Crosley convention last week.

"We are going to surprise the radio industry of Southern California when we make our announcement of the Crosley models that are to be offered to the public this year. We have always been able to offer real value in radio equipment, but this year we have a line-up of receivers which will surpass all radio values offered to the public before," said Mr. Kierulff.

The Waltham midget receiver is gaining in popularity every day, accoding to Mr. H. E. Howard of the Waltham Radio Corporation, 4228 South Vermont Avenue, Los Angeles.

The appearance of the set, the selectivity, power and excellent tone quality of the Waltham have so pleased the radio public that they have been buying them as fast as they could be manufactured.

Mr. Alex Hirsch, proprietor of the Radio Manufacturers Supply Company of 1000 South Broadway, is making an extended trip through the East and Middle West visiting his sources of supply and keeping on the lookout for the newest developments in radio.

Mr. Hirsch is one of the first to pioneer television in Southern California, and as it is his dream to see television machines as universally used as the present radio receiver, it is quite likely that he will have television units and kits to offer to his trade shortly after he arrives back in Los Angeles.

Slack Summer Season Declared to Be Myth

"That old myth about summer doldrums in radio is on its way with other legends," says Carl Haverlin, sales manager of KFI-KECA, Los Angeles.

"People used to tell me, 'Nobody listens to radio in the summer time. They go to the beach, or the mountains, or just play around in town. But radio —that's out.' As a matter of fact, the summer is radio's busiest part of the year. If people dance around, or go to the beach or mountains, they do it to the sound of radio. Evenings are longer—they sit up later at night listening to radio. They get up earlier, too, in summer.

"The best proof, perhaps, that radio is lively in summer, is that this year not a single commercial account of KFI-KECA has pulled out for the summer. The only exception are the school broadcasts. But these are substituted by other educational material."

Fred W. Christian, radio manager of the Electric Lighting Supply Co., and R. W. Whiston, service manager of the above company, have left Los Angeles on an extended radio tour of the western United States.

They are taking with them a one-quarter kilowatt Portable Short-wave Telephone Transmitter and will do experimental work and make tests of various locations, principally in the Teton National Forests and Yellowstone Park. They expect to tour throughout the states of California, Nevada, Arizona, Utah, Idaho, Wyoming, Montana, Oregon and Washington. They will operate on a carrier frequency of approximately 3525 kilocycles or a wavelength of about 85 meters. They will be signing the call letters W7APZ and W6DQB. Anyone hearing their station, which will be on the air continuously until June 23rd, may address them at 216 West Third Street, Los Angeles.

The boys are combining business with pleasure and expect to get in a lot of good trout fishing.

The H. R. Curtiss Company has just been appointed Philco distributors for Southern California. They will move their entire radio business to the building formerly occupied by the Philco Radio Company at 1145 Wall Street.

Mr. Claude Foote, the Los Angeles manager, has been East on an extended trip and while there took the journey with the Philco jobbers to Bermuda. Mr. Foote will return this week and we will then be able to make a detailed announcement of their appointment.

Mr. Haynes, of Davison & Haynes Manufacturing Company, 1012 West Washington Blvd., Los Angeles, is walking on air these days.

Mr. Haynes said that orders are coming in so fast from the East and Middle West for the popular Angelus radio receiver that they are kept busy literally day and night to supply the demand.

"The midget business is some business now and is growing more and more every day, and we are right in the lead," said Mr. Haynes. "The East is just waking up to the fact that the midget receiver will give the radio owner almost everything that the large receiver will give, and at a price which is so far below the big models that there is no comparison."

Mr. W. H. Sorrille reports renewed interest among the radio dealers and restaurant owners in the Jenkins Coin Machine. "The Jenkins Coin Timing Device, when attached to any radio receiver, will more than pay for itself by the customers of the restaurant wanting to hear good radio music during their meal," said Mr. Sorrille. "Before long I hope to have these machines in thousands of restaurants on the Pacific Coast."

Mr. T. P. Hodges of the Western Manufacturing Company, 1330 Waterloo Street, Los Angeles, is introducing a new radio tone control unit which is designed to regulate the tone quality of your radio set just to your individual liking. According to Mr. Hodges, your old set may take on the deep resonance of the more modern sets with the aid of this neat little device.

Mr. Sturdevant, Coast sales manager for the Brunswick-Balke-Collender Company, flew down to Los Angeles from San Francisco last week to visit Mr. Les Taufenbach, president of Western Radio, Inc., Southern California distributors for Brunswick radio receivers and records.

The KENMORE

MIDGET RADIO

Not just another mantle type set but a carefully planned, thoroughly engineered compact radio receiver. Equal in performance and tone quality to many of the large conventional type sets.

$59.50

Complete With Tubes

For living room, patio, mountain cabin, beach home, or when traveling. Make a "pal" of your Kenmore radio.

SPECIFICATIONS:

Beautifully finished walnut cabinet. Illuminated kilocycle dial. Adjustable oscillation control. Large X Core Magnavox Dynamic Speaker. Completely shielded chassis. Six (6) A.C. tubes. Honestly built to give the utmost in performance and value.

Weekly Review of Radio News-Thought and Opinion

R. M. A. HAS NEW SKIPPER

Morris Metcalf of Springfield, Mass., vice-president and treasurer of the American Bosch Magneto Corporation, was elected president of the Radio Manufacturers' Association at the time of the Radio Trade Show at Atlantic City.

Other officers elected were: First vice-president, Joseph L. Ray of New York, vice-president of the RCA-Victor Company; second vice-president, B. G. Erskine of Emporium, Pa., president of the Sylvania Products Company; third vice-president, Arthur L. Walsh of Orange, N. J., vice-president of Thomas A. Edison, Inc.; treasurer, E. N. Rauland of Chicago, president of the Rauland Corporation.

STATIONS AGREE TO ANNOUNCE LATE CHANGES

Hardly had Darrell V. Martin, Radio Editor of the Sun Telegraph, arrived at his home in Pittsbugh from the Atlantic City radio convention than representatives of local stations KDKA, WCAE, WJAS and KQV phoned him that they would inaugurate a last minute radio program correction service for changes made too late for publication in the newspapers and other publications.

This was inspired by a resolution Mr. Martin introduced at Atlantic City and unanimously adopted by the Newspaper Radio Editors' Association which read:

"Whereas we, the members of the National Radio Editors' Association, have often bee nembarrassed by publishing programs which failed to go on the air, either through neglect or error on the part of the station or networks; and whereas readers frequently believe these changes due to inaccuracies appearing in the newspapers; and whereas some program sponsors frequently take advantage of newspapers by schedule prominent personalities who never appear on programs; and whereas we appreciate that the art of radio broadcasting is past the stage where allowances might be made for such discrepancies; therefore be it resolved that the National Radio Editors' Association ask all stations to assume the responsibility of notifying the public of any changes in programs after these programs have gone to press, and stations refrain from using the names of prominent artists and personalities as 'bait' to get listeners."

The Committee on Rules ordered that a copy of the resolution be sent to every newspaper and broadcasting station as well as to the National Broadcasting Company and the Columbia Broadcasting System.

SEES BETTER RECEPTION IN FAN MAIL DROP

A motion picture star judges his popularity by the amount of his fan mail, but the Radio Commissioners consider themselves most in public favor when their mail from listeners is at the lowest ebb.

The psychology of this test of public opinion is explained by Harold A. Fafount as follows:

"I have found it is unusual for the public to go to the trouble of writing when conditions are satisfactory. But once they become bad, and radio reception is impaired, the volume of mail received by the commission shows it."

There has been a decided slump in the commission's fan mail during the last year or so, Mr. Lafount said, and thus the commissioners feel that radio reception has steadily been improved.

ANOTHER MIKE VICTIM

Microphone fright has claimed another government victim in the person of William E. Humphrey of Washington State, chairman of the Federal Trade Commission. When he went on the air for the first time recently, he was terrified throughout the 15 minutes of his talk, he confessed afterwards.

ANNOUNCEMENT

We have just been licensed under the R.C.A., LaTour and Hazeltine Patents and will now be able to afford our dealers full patent protection.

OUR NEW MODEL IS NOW READY!

A real value. A remarkable set with the following outstanding features:

Electro-Dynamic Speaker
Four Screen-Grid Tubes
Type 45 Power Tube
Single Dial Control
Completely Shielded
Four Ganged Condensers
Steel Chassis
Phonograph Pick-up
Drum Dial
Superb Tone Quality
Beautiful Walnut Cabinet
Selective—Sensitive—Powerful

All that anyone could ask for in a radio set and at a price that everyone can afford.

$69.50

Complete with Tubes

"Hap" and "Sap," the picturesque vagabonds who adorn our cover this week, extricate themselves from one tight situation only to become involved in another one equally humorous and complex. KNX listeners have been following the amazing adventures of "Hap," the Englishman, who has seen better days, and "Sap" whose tramp life is a more or less permanent state of being. Loyal Underwood writes the continuity for these skits and is "Sap," while Jack Carter makes a perfect "Hap." Follow the adventures of these two over KNX every Wednesday night from 9:00 to 9:30.

President Hoover's address at the unveiling of the statue of James Buchanan, fifteenth president of the United States will be broadcast from Washington by the National Broadcasting Company on Thursday June 26, from 11:30 a. m. until 12:00 noon, P. S. T. KGO, KHQ, KOMO, KGW, KPO, KFSD and KTAR will release the program to the west.

The Columbia Broadcasting System is making elaborate plans to broadcast the return to America after an absence of almost two years of Rear Admiral Byrd and his party. The broadcast is scheduled for Monday, June 23, between 5 and 6 p. m. Admiral Byrd will talk about twenty-five minutes on the hardships encountered on his South Pole explorations and will build a dramatic picture of life on the great Antarctic iceberg. Consult your local CBS station program, KHJ, KFRC and KOL.

KHJ introduced a new series of programs, Friday night, June 6th, 7:30 to 8 o'clock. The program has been close to the heart of Raymond Paige for many months, and consists of an orchestra of symphonic proportions. Each week a distinguished vocalist will be featured, some name of unusual interest. This organization was recently augmented to 35 pieces.

KMIC has a new Musical Director in Mr. Lowry Hester, violinist and leader of the KMIC Orchestra. Mr. Hester was a member of the Hotel Del Coronado Orchestra at the time Ray Bailey of the KMTR Orchestra was leading that band at the southern city. Then two years with the Los Angeles Symphony and three years as leader of the Leighton Orchestras were followed by five years with the orchestra in the largest cafe in China, and for the past few years with West Coast Theatre Orchestra. Mr. Hester is a violinist of ability and his orchestra at KMIC is producing some very excellent programs.

A daily broadcast at 3:15 p. m. gives KOL dialers the latest information on doings in aviation circles in Seattle. Dick Rickard, chief announcer for the station takes to the clouds in a Lockheed-Vega monoplane specially equipped with a short-wave broadcast transmitter and using a close-speaking microphone to eliminate all extraneous noises, gives listeners a birds-eye view of the latest goings-on in Seattle. The monoplane is named the "KOL."

Alwyn Bach, of the National Broadcasting Company, won the Academy Medal for Good Diction over the radio and will be given the medal on November 16th, when the Academy will open their new building.

Ben Bernie's Dance Orchestra De Luxe is now installed for an unlimited engagement in the Blossom room of the Hotel Roosevelt, and will broadcast over KFWB nightly, except Sunday. See KFWB's detailed program.

A new feature on KMTR every day except Sunday, "The Two Black Keys," presents an half hour of two pianos playing modern harmony. The identity of the two performers is shrouded in complete mystery. Dial the Hollywood station some morning at 9:30 and see if you can guess who.

Q and A

QUESTION—I was listening to KHJ today (June 7th), during the rebroadcast from a plane the description of the bombardment of Los Angeles. When the signals from KHJ faded so that they could not be heard and the station proceeded with their regular program, I started to tune into another station and, in turning the dial about 80 kilocycles below KHJ, I was surprised to hear the voice from the plane again. Did I hear this directly from the plane?

R. S. A., Beverly Hills, Calif.

QUESTION—This afternoon, while listening to the rebroadcast of the air maneuvers, I decided to see if any other station was picking up the broadcast from the air, as KHJ did not seem to be having much succees. In swinging around the dial, I suddenly picked up the officer in the plane talking very clearly on 830 kilocycles. I listened to him until he signed off, but he did not give any call letters. Was I receiving him direct?

R. H. B., Long Beach, Calif.

ANSWER—The army plane was broadcasting on 840 kilocycles. This is unusual, of course, since airplane transmitting equipment is ordinarily of the short wave type. The two correspondents, whose letters of inquiry are printed above, as well as many other listeners who wrote to us, heard the transmission from the plane direct. KHJ was receiving from the plane on 840, and rebroadcasfing on 900 kilocycles, which is quite a difficult feat, and they did very well under the circumstances. It was an army plane, and Uncle Sam is privileged to take liberties with the radio frequencies and channels, hence their use of the Canadian channel for these tests, during the daytime, when there would be no interference with other radio services.

WANTED—Assistant radio engineer, for local manufacturer. State experience, and give references in first letter.

Box 102, "Radio Doings," 407 E. Pico St., Los Angeles, Calif.

Radio in the Auto

The question of whether or not the use of a radio set in an automobile affects the safety of operation is answered in a booklet recently published by the Radio Manufacturers' Association. We quote below the four objections usually raised to auto-radio and the RMA's answers thereto.

1. That radio would be distracting to the driver and cause accidents.

Radio is not districting because it demands no attention from the driver and requires no answer, as does conversation between driver and passengers. . .

2. That the act of tuning would take attention from driving.

Motor car radio is tuned by ear. Single knob selector enables operator to tune without taking his eyes off the road. Requires no more attention than the other instruments on the car, namely; choke, lights, horn, as well as various dash gauges and road signs which must be watched. Motor car radio is less disconcerting than the rear view mirror.

3. That music would lull the driver to sleep.

Constant purring motor over extended trip is monotous and often causes sleep and resultant accident. Radio brings companionship and entertainment, promoting alertness.

4. That radio will distract drivers of other vehicles by contributing distracting street noises.

Motor car radio is designed for use within the narrow limits of the car itself, and its volume is limited to such an extent that it cannot be heard as far as the sidewalk.

In most cities there is no restriction against radio speakers playing in front of radio dealers' stores.

The ordinary household radio set has more than 25 times the volume of the motor car radio set.

There are 62 radio broadcasting stations in Cuba, according to a recent tabulation by the Department of Commerce, and of these 36 are in Havana.

Santo Domingo, in the Dominican Republic, has one station, and Port au Prince, Haiti, has one.

All are of small power as compared with those in the United States. Only in Havana is found a 1000-watt and a 2000-watt station. Others have as low as five watts.

The New
ANGELUS

Licensed under RCA Hazeltine and Lo Tom Patents

POWER
NEVER BEFORE POSSIBLE IN A MIDGET RADIO

Designed and engineered especially for Screen-Grid Tubes, with Electro-Dynamic Speaker

RECEPTION
WITH VOLUME AND CLARITY GUARANTEED IN THE MOST REMOTE LOCATIONS

The NBC Times Square Studio

By K. G. ORMISTON

There is a mighty strange theater in New York. It is located in the old New Amsterdam Theater Roof, former home of the Ziegfeld Follies. Here, high above the "Roaring Forties," in the heart of the world's greatest amusement center, one may witness a strange performance. The theater nightly welcomes 900 people, and admission is FREE. It resembles other theaters at first glance, but as the lights are dimmed, the curtain lifted, the footlights flashed up upon the stage, and the play goes on, we realize that between us and the actors there is a wall of glass, crystal clear but sound-proof. The music and voices seem to reach us from all sides, with a far greater audibility and clearer enunciation. We do not miss a single word or note of music, regardless of where we are seated in the theater.

Is this something new in the art of theatrical production? Has some keen producer realized that by electrically reproducing the voices, sounds and music by means of microphones and concealed loud speakers, every seat in the house becomes the "best seat," and that sound effects may be given a new realism by this means? As we ponder these things, it suddeny dawns upon us that we are hearing familiar voices, that the characters before us are none other than "Uncle Henry," "Mr. Editor," the "Love Story Girl," and the world's greatest drawback to science, "Prof. Lucifer Butts."

For this strange theater is the new Times Square Studio of the National Broadcasting Company, and through it radio has come to Broadway. The NBC officials thought that the public's interest in seeing behind the scenes in the broadcast studio was but a passing fancy, and the crowds that daily attempted to gain admission to the company's studios at 711 Fifth Avenue would soon diminish as soon as watching the broadcasting would cease to be a novelty. However, this prediction proved to be in error as the crowds have increased steadily. To meet this situation, and to be able to accommodate a large number of persons, the NBC decided to bring radio to the heart of the Broadway theater district.

It was no simple undertaking. The great glass curtain alone weighs six tons. It had to be absolutely sound-proof, so that the applause of the audience could not peneterate to the microphones on the stage. The acoustics of the stage presented an exceedingly difficult problem since the wall facing the audience was of glass. The proscenium is 40 feet wide and 16 feet high, and this great expanse of glass presented a reflecting surface for sound that had to be offset in the placement of the microphones and other acoustical arrangements.

The loud speakers in the theater proper are concealed in the orchestra pit, at either side of the balcony, and above the prosecenium arch. The announcer's desk, with his microphone, is mounted on rollers, so that it may be placed in any position. Two types of programs are presented. The participants in the performances may be in costume and the mirophones concealed as in an ordinary stage production, or the performance may be conducted as in an ordinary broadcast studio, with the mikes in evidence, the apparatus for producing sound effects in plain sight, etc. And when the applause of the audience is to be broadcast, the great glass curtain is lifted out of the way.

And so when our readers hear the announcement, — "broadcast from the Times Square Studio of the National Broadcasting Company in New York," they may visualize this darkened theater with its audience of Rialto pleasure-seekers, hearing exactly what you hear, and in addition, watching the performers beyond the barrier of glass.

Canada Plans Powerful Station

A new radio station which will be the largest on the Canadian Pacific Coast, with a range of 5,000 to 8,000 miles, is to be built this summer on Lulu Island, south of Vancouver, according to information reaching the Department of Commerce. The station will be in communication with all parts of the Pacific.

The Director of Radiotelegraphy at Ottawa expects to have the station in operation by early fall.

Radio Manufacturers Secretive

A unique feature of the Atlantic City trade show was the secrecy with which the new radio sets to be offered to the public in the fall were guarded. At Chicago last year everything was on view. In fact, the object of the June trade show is to afford dealers and jobbers from all over the country a preview of the new sets.

It seems, however, at previous shows that certain unscrupulous manufacturers, noting other manufacturers had something they didn't have, rushed home after the show and by fall were also offering the same thing to their customers. While some of the new sets were displayed at Atlantic City, many others were not.

Two big manufacturers had their sets in the auditorium exhibit booths, but hidden from the eyes of every one excepting their own dealers. The booth of another prominent manufacturer was darkened, but if the inquirer had been given the "O. K." the room number of a certain hotel was whispered to him, where he could see the new set.

One of the largest manufacturers in the United States made no pretense at showing his new sets. His exhibit consisted of several golden doorways, padlocked and lettered in green, "Open August 1," which is the time set for introducing the new receivers to the public. So quite a crimp was put into the pirating of ideas.

The net result was that nothing of a sensational nature was offered at Atlantic City. Year before last the trade show brought forth the dynamic speaker and the socket current set, last year the screen grid, but though there was a lot of talk about tone control, nothing radical was introduced this year.

A New Japanese Station

Our Japanese correspondent, Mr. M. Nakamura, writes that there is a new station in Nippon, with call letters JOJK. It is located at Kanazawa, Japan, and operates on 423 meters, with a power of 3 kilowatts. Make a notation of this in your Radio Doings Call Book, because we'll all try for him in the Fall.

BRING YOUR RADIO BACK TO LIFE.

The NEXT BEST *to a* MAJESTIC RADIO *is a set of*

Majestic Matched Tubes!

Any radio is better with Majestic Matched Tubes. If the reception of your present instrument is "fuzzy," weak, distorted or just ordinary, the fault undoubtedly lies in the tubes. Install a complete set of Majestic Matched Tubes and note the amazing difference. These superior tubes cost no more. Your nearest Majestic dealer has a fresh supply. Insist on Majestic Matched Tubes . . . the same tubes used in every Majestic radio.

FREE TUBE TESTING . . . *without obligation.*

It makes no difference what make set you own . . . your nearest Majestic dealer will gladly send a service man to your home and test every tube in your set. There is no charge. This is a typical Majestic Service to help you get more radio enjoyment.

Fred Howard, violinist, and one-time teacher of music and harmony in the University of Washington, has won great popularity on KYA programs as a solo-violinist, as well as a member of the second KYA instrumental trio.

Howard has made some interesting close-harmony arrangements for trio, including a beautiful adaptation of "Trees." He is heard on alternate days on the Sunshine and Bridge Hours.

The story of how William S. Paley, President of Columbia, went into radio, is that just out of college, he was first attracted to it by an effort to improve a cigar program which was being put on by his father, a wealthy tobacco manufacturer, of Philadelphia.

Young Paley wound up by buying the company.

11:00 p. m.—Tucker's Everstate Band.

A male harmony quartet that began nine years ago and is still going—that's the Captivators Male Quartet, the popular KJR and Northwest Broadcasting System unit.

The Captivators claim the title of being the oldest quartet in radio. When radio was just beginning in Seattle, the quartet went on the air over KJR and has been appearing on Seattle stations ever since.

8:30 p. m.—Preview of Sunday School Lesson.
9:00-11:00 p. m.—NBC.*

The H. R. Curtiss Company, one of the oldest and best known radio distributors in the West, has just been appointed distributor of Philco radios for Southern California, according to Claude Foote, general manager.

CLAUDE FOOTE

News of this appointment will be enthusiastically welcomed by radio dealers throughout this territory. Each year for the past three years Philco's popularity has steadily mounted. Last year only one other manufacturer sold more radios than Philco.

Now with the keen merchandising ability, financial resources and outstanding record of success of the H. R. Curtiss Company behind the Philco line, it is anticipated new high sales will be made locally.

The complete new line of Philco radios are on display at the H. R. Curtiss Company's display room, 1145 Wall street, Los Angeles. The new Philco radios have many outstanding features, including positive tone control, automatic volume control, screen grid tubes and beautiful distinctive new cabinetry.

Mr. G. W. Marshall who, for years, has been connected with Radio Doings and has acted in the capacity of Business Manager, has severed his connection with that company, and is now in the finance business. After an intensive study of the dealers' merchandising and financial troubles, Mr. Marshall decided that they needed an additional financial company in the field to help them with their time payment business.

"I have made arrangements with Mr. C. W. Smith, of the Griffin-Smith Mfg. Co., Ltd., to finance a limited number of his Royal dealers, and if this proves satisfactory, I will expand and go into general finance," said Mr. Marshall. Mr. Marshall is making his headquarters at 1125 Wall St. Tel WE. 5158.

The Yale Radio Electric Company state that they will shortly be ready to announce the 1931 line of new Apex receivers. Samples are on the West Coast undergoing every test, and Mr. R. B. Yale, manager of the concern, is enthusiastic over the performance and appearance of the new models.

The line consists of four models, including one with an electric remote control and electric and phonograph combinations.

Cabinets are beautiful and outstanding in appearance. A couple of new screen grid models have been developed by the manufacturers which assures the utmost in selectivity and performance. All models will come equipped with the new tone control, known as the Apex "Tone Blender," which is a distinct feature.

Mr. Reed, of the Master Radio Corporation, 3550 South Western Avenue, announced last week that they have just concluded negotiations with Gilfillan Brothers and will now operate under the R.C.A., LaTour and Hazeltine patents.

Mr. Perry Demarest, of the Radio Supply Company of 912 South Broadway, Los Angeles, declares that he has been rather surprised at the way the parts business has kept up during the early part of the summer. They are enjoying an excellent business in parts, kits and especially in tubes.

If television has been sufficiently developed to be presented to the public this fall, Mr. Demarest expects the season of 1930-31 to be the biggest that they have ever had.

Mr. Lewis Gruen, formerly Coast sales manager for Temple, is now Western sales manager for Nathaniel Baldwin, Inc. Mr. Gruen spent most of last week in Los Angeles and Southern California and is now on his way to San Francisco and points north.

TIMELY TRADE TOPICS

Mr. Hayward Powell of the Powell Manufacturing Company, 6121 South Western Avenue, has just announced that they have taken out a license to manufacture their sets under the R. C. A., LaTour and Hazeltine patents.

The Powells, Hayward Powell, his brother, Sam Powell, and the father have been in the radio manufacturing business for the last five years. They started manufacturing "B" eliminators when that radio development first started. Later on they built console models, "no name" brands, and chasses, and a little over a year ago started to definitely put their own name before the public eye.

They have been enjoying an excellent business with their midget receiver and are now in a position to go into large production.

The Powells expect to establish jobbers in each of the merchandising centers of the West and are so situated that they can take care of a large demand for their popular sets.

Mr. P. F. Feeny, Coast representative for the Colin B. Kennedy Company, returned last week from the East. Mr. Feeny attended the Jobbers and Representatives' Convention at the factory in South Bend and then spent a week at the R. M. A. Convention in Atlantic City. Mr. Feeny will make his headquarters at 253 West Third Avenue, San Mateo, Calif.

A new idea in cabinet service to the manufacturer has been started by the Los Angeles Cabinet and Fixture Co., Inc., of 1316 W. Slauson Ave., Los Angeles, according to Mr. Porter, president of the company.

"In the past a manufacturer of radio sets called in the cabinet manufacturer and told him to build a cabinet to fit his chassis and to cost so much. We have always believed this to be a haphazard way of doing business, so we decided to follow a different policy. We acquired the services of one of the best cabinet designers in the country. He first goes into the radio manufacturer's plant and works with his engineers, to develop the entire set. He then makes sketches, drawings and sample models (no charge is made for this service), and has everything perfectly set before production is started. In this way we are able to supply the manufacturer with a beautiful cabinet at a minimum cost," said Mr. Porter.

The Midget type radios are finding homes in many parts of this country, and quite a few foreign countries, according to Mr. H. E. Howard, president of the Waltham Radio Corp., Ltd., of 4228 S. Vermont Ave., Los Angeles, and distributor of the popular "Waltham."

"We have jobbers in all the large cities in the west, and a good percentage of our output goes to them. Large orders have come from export agents, who are shipping them to the orient, and South America. Yes, business is good and the outlook for the future is fine," said Mr. Howard.

Despite the advent of warm weather, the radio trade of the United States is booming and bids fair to surpass last year's record by at least ten per cent. A survey of retail radio business for the first quarter of 1930 indicates that sales for the whole year should approximate $645,000,000, a joint estimate of the Department of Commerce and the National Electric Manufacturers' Association reveals.

The introduction of the radio receiver in automobiles is expected to keep the trade at an above-normal basis throughout the summer, when the home sets are less in demand.

With the increase in high power stations and the improvement in both receiving equipment, static, while not eliminated, has been sufficiently diminished to permit the satisfactory reception of radio programs throughout the warm months. Broadcasters, aware of this, keep high grade talent on the air in the summer, whereas they used to revert to mediocre programs.

The estimate on the radio business is derived from the quarterly questionnaires sent to radio equipment distributors and takes into account season's variations. Consequently, the actual trade may run beyond $645,000,000 because of the growing popularity of the auto radio set.

Weekly Review of Radio News-Thought and Opinion

LINER GETS TELEVISION NEWS

Transmission by the photoradio proc- ; of pictures, stock market reports, lletins and other facsimile material m shore to the United States liner merica" while on the high seas, was complished this month by the Radio rporation of America.

According to the RCA announcement, e receiving set, installed in the smok- g room of the ocean liner, is the vis- le recording apparatus of the latest vention, combining the results of ex- riments of the General Electric Co. d the Westinghouse Electric & Manu- cturing Co., as well as those of the CA.

It likewise carries forward the very cent successful test of a visible re- rder designed by Charles J. Young, en of the General Electric and now the RCA-Victor Co., by which copies the front page of a newspaper were ansmitted from Oakland, Calif., to chnenectady, N. Y.

7HC SAYS COMMISSION CAN'T CENSOR?

Despite the avowed contention of the eueral Radio Commission and na- ional legislators that the former has o ensorship power over radio pro- rams under the Act of 1927, the Com- nission has put the second station off he air within a fortnight because of he character of its programs.

Station KFBK, of Milford, Kans., was enied a renewal of its license follow- ng a hearing on the ground that Dr. Brinkley had conducted a medi- section box over it and had so- icited patients for goat gland opera- ions. Prescriptions which the physi- cian gave over the air, it was charged, ould be filled only at one of the chain of drug stores with which Dr. Brinkley was associated.

The American Medical Association was one of the chief complainants against the station.

Two Commissioners, Judge Ira E. Robinson and Judge E. O. Sykes, voted against the removal of the station and suggested putting it on probation with the medical programs eliminated.

An appeal was immediately filed by George Strong, counsel of KFKB, in the Court of Appeals of the District of Columbia.

Only a short while before the Commission put station KVEP, of Portland, Ore., off the air because of obscene language used by one of the broadcasters.

U. S. FIRM TO OPERATE RADIO IN GREECE

Because of the world-wide repute of the American broadcasting systems, Greece has granted to an American concern, with offices in Philadelphia, a concession to erect, equip, and operate all radio broadcasting stations in that country for 20 years.

The first station to be built, according to information reaching the Department of Commerce, will operate on 25,000 watts power and will be one of the most modern in Europe and the Near East. It is expected that its programs will reach every principal city in Greece, and in favorable weather will be heard throughout Europe.

An entire American personnel will operate the station for a period of two years, after which Greece will put it in charge of an American supervisor. The expenses of the system will be defrayed by an annual subscription tax levied on receiving sets, which will vary according to whether the set is operated in a private residence, a store, or a place of amusement.

So far as Department of Commerce records show, this is the first instance of an American organization being called on to install and operate an entire broadcasting system in another country.

The Pilot Radio Dealer Is Different

He is the direct representative of the Pilot Radio & Tube Corporation. Unlike other radio manufacturers, Pilot does not sell through middlemen. Each Pilot dealer has been carefully chosen. He must be able to maintain the reputation of Pilot products through intelligent service. He knows how the Pilot laboratory staff of engineers carefully guides Pilotron Radio Tubes through all stages of production. He knows why Pilotron Radio Tubes assure you a better and a more dependable service. He realizes that each and every Pilot radio part, be it kit, set or tube, must live up to Pilot's reputation for superiority, and must in turn protect the reputation of all other Pilot products.

Your Pilot radio dealer has behind him the cooperation of the entire Pilot Radio Engineering Staff. You will find his advice most valuable.

STUDIO NEWS

Eddie Armstrong, KFI's tenor ballad nger, appears on the cover this week. or those whose ears are weary of the ɹzz assaults which greet us too freuently over the air, Mr. Armstrong's yle of singing and choice of songs ill be indeed a balm. The schedule ɔr KFI is Wednesday, at 3:45, and aturday night, at 9:00. KECA presents fr. Armstrong on Thursday evenings, t 9:30, and Saturday at 8:30 p. m.

"Unt comes it now! Professor Herıan Schnitzel of the University of Cinnopolis, O-Ho-Ho"! None other than he famous broadcaster of German diaect is to appear before the microphone ɔf KNX every Sunday, from 7 to 7:08 ɔ. m. Professor Schnitzel will be renembered for his inimitable programs ɔver the National Broadcasting Comɔany System.

Roy Ringwald, director of KHJ Ensemble, brilliant arranger, composer and musician, is leaving KHJ on July 10th, to become a member of the Biltmore Trio, that famous feature of Earl Burtnett's Los Angeles Hotel Biltmore Orchestra. Mr. Ringwald comes from Santa Monica and, in spite of an imposing list of accomplishments, is only twenty years of age.

On July 4th, KMTR offers "The Writing of the Star Spangled Banner" with the KMTR Ochestra, under the direction of Ray Bailey. The program will be heard at 8 p. m. This musical continuity as prepared by Harry Geise, program director of the station, tells in dramatic form how our national anthem, "The Star Spangler Banner" was taken from an old English drinking song, "To Anacreon in Heaven," and the lyrics, inspired by Francis Scott Key, while he was on board the flag of truce boat during the war of Independence. This program will be released also over KMIC, Inglewood, at the same time.

With the idea of serving the people of the San Joaquin Valley during the day, as well as the night, station KWG, Stockton, will be joined to the Don Lee chain of stations on June 30. KWG has recently been purchased by the James McClatchy Publishing Company, which owns stations in Fresno and Sacramento, already members of the same Don Lee Columbia network. This gives Don Lee a total of nine transmitters, the largest and most complete system on the Pacific Coast. They are: KFRC, San Francisco; KHJ, Los Angeles; KMJ, Fresno; KFBK, Sacramento; KWG, Stockton; KOIN, Portland; KVI, Tacoma; KOL, Seattle, and KFPY, Spokane. The official welcome to the new station will be given on the Blue Monday Jamboree of June 30.

Five spots on the dial, in Southern California, on July 1st, from 10 to 11 p. m., will bring the outstanding program of the day, the musical extravaganza, which emanates from the studio of KMTR. With Edmund Lowe, noted stage and screen star as master of ceremonies, over the five-station hookup, will be heard the famous Saxaphone Bands of vaudeville fame, many screen celebrities and a special musical program featuring the augmented KMTR Studio Orchestra, the Dare Sisters, Roy Rockwood, baritone; Billy Markowitz and his Sizzling fiddle; Preston Lodwick, renowned xylophone soloist, and other outstanding features to be announced. This gala event is given as a tribute to the sixth annual Relief Association Benefit of the Pasadena Fire Department, which will be given July 4th, in the Rose Bowl. The broadcast will be heard from 10 to 11 p. m., July 1st, from KMIC, KTM, KGFJ, KFVD and KMTR.

KTBI announces the addition of Mr. Christian M. Books to the staff. Mr. Books will act in the capacity of Program Director and Announcer.

QUESTION.—With the disgusting amount of advertising injected into practically every radio program, and the over-abundance of trashy stations that clutter up the dial so that it is practically impossible to get out-of-town reception, one realizes the mess into which radio has drifted in this country through the lack of government ownership or control. Great Britain has the ideal system, and I, for one, deplore the fact that our government lacked the vision to place radio upon a similar basis in its inception.—W. W., Riverside, Calif.

ANSWER.—The above extract from a letter constitutes a comment rather than a question, but we find on our desk at the same time the following statement by Mr. E. B. Newill, vice-president and chief engineer of the General Motors Radio Corporation, relative to the situation in England. It so adequately answers our correspondent's argument that we decided to print it as a reply in this department.

"How would you radio fans like to pay a tax on your receiving sets and then have the choice of only about three programs, all of which have been prepared largely with the idea of what you ought to listen to? You probably would not.

"Then be glad you're in the Good Old U. S. A. when you tune in tonight and get just what you want. For over in Great Britain there are only three programs in the English tongue—and the set owner must pay an annual tax of $2.43 to listen in on these.

"Radio over there is a government affair, with a balanced program throughout the day ranging from a non-sectarian religious service for the shut-ins through to a dance music program during the dinner hour and scattered periodic talks on home subjects and lessons in French and Italian, or some other such subject. So it is a case of take what is offered rather than tune in on what you want.

"The average American receiver can pick up locally some three chain programs and from two to ten local independent broadcasts. The British set owner has the choice of three programs — one from the local transmitter — of which there are 19, a second from Daventry-5XX, sixty miles from London, which transmits at high power the same program as London 2LO and is designed to reach sections remote from the low power local stations, and a third from Daventry - 5GB - Experimental, which broadcasts a program originated mostly in the London studios and is an alternative for those who do not care to listen to the regular London program.

"One thing more—over there announcers remain anonymous."

Synchronization Experiment Fairly Successful

For some time prior to June 6th, stations WHO, Des Moines, and WOC, Davenport, both in Iowa, conducted tests in simultaneous operation on the same channel (1000 kilocycles) after midnight. These tests proved so satisfactory that permission was requested from the Federal Radio Commission to operate permanently on the synchronized basis. Permit was issued June 6th, and since that time these two stations have operated simultaneously on the same frequency. This experiment is very interesting for the reason that there is no land wire between the two stations by means of which synchronization is usually accomplished.

WHO and WOC are each of 5000 watts power and are separated by 190 miles. Special equipment, designed and built by the Bell Laboratories, is employed, together with matched crystals. At Marengo, a point midway between the two stations, there is a monitoring station which receives the carriers and programs from both WHO and WOC simultaneously, and the output is carried back to Davenport by land wire. The Davenport operator thus is able to check on the synchronization and make the necessary minor

9:00 p. m.—Rhythm Makers; Rev. Ethel Duncan.
10:00 p. m.—Mariners Dance Orchestra.

WOC-WHO Experiment

(Continued from Page 13)

adjustments to keep the two carriers in perfect step. The controls at Des Moines are fixed.

Over an area midway between the two stations, there is some interference. It is claimed that Iowa is better served by this simultaneous operation of the two stations. However, it is pointed out that since the two stations are but 190 miles apart, that a single high-powered sation could adequately serve the territory now covered by the two stations, and eliminate the high cost of the half-way monitoring station and telephone lines to one of the stations.

The Westinghouse Company abandoned their simultaneous and synchronous operation of WBZ and WBZA, at Springfield and Boston, respectively, for the reason that the maintenance expense was too great. Instead, they now are consolidating WBZ and WBZA and will operate one station with 15,000 watts power. These two stations have been synchronized by wire, and served to overcome "dead spots" in the Boston area where the Springfield station was but poorly heard.

The essential features of these programs are identical with those sent us by the stations

Fifteen thousand persons gathered at the airport of the Aero Corporation on south Western Avenue last Sunday afternoon to witness the return of "Mr. Tall Feller," "Zeke," Zeke's cousin, and Zeke's little pig, "Estate." Direct from the Ozark Mountains in Arkansas, the big green and gold tri-motored Fokker of the Macmillan Petroleum Corporation, brought the Beverly Hill Billies together again. They appear nightly except Monday, over KMPC, from 10 to 11 o'clock.

Radio lectures by college professors from all parts of the country who have come to the campus of the University of Southern California as visiting instructors in the 1930 summer session, are announced by the radio education division of S. C. for the July broadcasts over KMPC.

The essential features of these programs are identical with those sent us by the stations

TELEVISION NOT HERE YET

While gratified at the recent developments in television experiments, Radio Commissioner Harold A. Lafount believes that the visual broadcasting art has not yet "arrived."

After citing the recent successful demonstration of virtual life-size television in the General Electric laboratories at Schenectady, N. Y., the Commissioner added: "Television is still in the experimental stage, however. Engineers themselves who are working within the laboratories in their endeavor to hasten the arrival of the visual art will not predict, even approximately, whether it will be months or years before it can be afforded the public."

The Federal Radio Commission, he declared, is doing its utmost to foster television development from the regulatory side. There are inherent difficulties in television by radio, he said, primarily because the art requires channels above 10 times the width of the channels employed for regular voice broadcasting.

Melodions Italian melodies, seldom heard on the air will be played by Zac Kalbach's Goldoliers Orchestra for KJR and Northwest Broadcasting System artists Saturday evening from 9 to 10 o'clock. The program will bring listeners melodies dearest to the hearts of the Italians, the selections being gleaned from songs popular in the country and in the village streets of Italy.

"OREGON WILDCAT" IS ARRESTED

Robert Gordon Duncan, self-styled "Oregon Wildcat," whose harangues over the air were responsible for the recent cancellation of the license of station KVEP, Portland, Oregan, has been arrested for violation of the Federal Radio Law which forbids the broadcasting of "obscene, indecent or profane language." The Radio Commission will probably take part in the prosecution when the trial is set.

Simultaneous with the opening of the new towers and dedication of the screen-grid transmitter of KYA now being installed in the Whitcomb Hotel, KYA will throw open newly decorated studios in the Loews Warfield Building with improved system of lighting and ventilation. The studios, accordings, to announced plans, will be among the most beautiful and efficient on the Pacific coast.

WANTS RADIO IN EVERY FARM HOME

A radio in every country home is the wish of the Virginia Commissioner of Agriculture, George W. Koiner, as expressed in the following statement recently issued:

"It is stated that 35 per cent of the farmers have radios," Mr. Koiner said. "In some sections there are more than in others. The radio is a great boon to the isolated country home. The best music in the great cities may be brought to the home which could never be heard otherwise. Also the important market news and the interesting sporting news for both the old and the young. We wish there could be a radio in every country home."

Trade Meetings Discontinued Until September

The Radio and Music Trades Association of Southern California will not meet during July and August for their regular first Thursday of the month meeting at the Breakfast Club. According to Mr. Al Farquharson, Secretary of the Association, a tentative date has been set for August 30th, the first day of the Radio Show, and the meeting place will probably be in the Cocoanut Grove at the Ambassador Hotel, Los Angeles.

After carefully inspecting the new Philco models, which are now being shown at the H. R. Curtiss Company's display room, 1145 Wall Street, radio dealers enthusiastically agree Philco radio values are higher than ever before. Prices are lower too, they note, and many brand new features provide an entirely new thrill in radio performance.

The four new Philco models offer a complete price range and include Console, $119.50; Lowboy, $139.50; Highboy, $179.50; Radio-Phonograph, $239.50. As the models advance in price, new mechanical features and increased cabinet beauty are found.

The "hams" continue to gather around the windows of Radio Manufacturers' Supply Company, 1000 South Broadway, like bees to a honey pot. This concern is featuring equipment for the amateurs, and has arranged an exhibit in one of the Broadway windows, which includes hundreds of "QSL" cards, which the hams use to acknowledge hearing others' signals. All amateurs are invited to bring in their cards for display purposes. Same will be returned in good condition. There seems to be a great spurt of amateur interest and enthusiasm at present, much new blood entering the field, and finding the fascination of this instructive and pleasurable hobby. Nightly these amateurs communicate with each other, either by Morse code or voice, over great distances. The thrill afforded them by their activities is unequalled in any other branch of radio.

The Western Music and Radio Trades Association Convention, to be held at the St. Francis Hotel, in San Francisco, from June 30th to July 3rd, inclusive, promises to be one of the greatest radio conventions ever held in the West. With the convention will be combined the First Annual Pacific Radio Trade Show, held in the new William Taylor Hotel.

Monday, June 30th, will be strictly for business, displays and inspection of the new models. Tuesday will be Music Day, with a full morning and afternoon of musical presentations and committee meetings. At 6:30 p. m., a banquet will take place in the Colonial Ballroom of the St. Francis, and from 8 o'clock to 12. the guests will dance. At midnight Philco will put on a midnight frolic at the Paramount Theater.

Wednesday, July 2nd, will be designated as Radio Day, with another full day of musical presentations, committee meetings, luncheon in the Colonial Ballroom at the St. Francis, and a banquet at 6:30. A dance will again take place from 8 to 12.

Thursday, July 3rd, the Golf Tournament will be held at the California Golf Club, and after the game, the golfers and their guests will be entertained at a stag dinner.

Great plans have been made to entertain the lady guests, and there will be automobile trips, luncheons and theater parties during the entire time of the convention.

From the rumors floating around, it looks as though at least half of the radio and music men in Southern California will be in attendance at the convention, which will help to make the 1930 Trade Show a real success.

TIMELY TRADE TOPICS

On Tuesday evening, June 24th, a dealers' preview of the new Edison radio receivers was held at the showrooms of Fey & Krause, Inc., 1616 So. Figueroa St., Los Angeles. The new Edison receivers, featuring the Light-O-Matic tuning principle were attractively displayed, and an enthusiastic reception was accorded them by a large number of dealers. Mr. H. D. Alshuler, manager of the radio division of the new concern, was kept busy renewing old franchises and signing up new dealers, who are determined to do a real job with Edison Radio this year. Fey & Krause, Inc., are the exclusive Edison distributors for Southern California and Arizona.

The announcement of the new line-up of radio receivers by the Crosley Radio Corporation has made everyone very happy in the Kierulff & Ravenscourt organization, the California distributors for this popular line of receivers.

Mr. Kierulff said, "Crosley has brought out some great radio sets in the past, but this year he has produced the best radios for the value that have ever been offered to the public. We expect to do more business in the last five months of 1930 than we have ever done before."

Mr. H. E. Howard of the Waltham Radio Corporation, Ltd., manufacturers of the popular Waltham midget receivers, stated that they have appointed three new distributors on the Coast.

The Domestic Appliance Company, 1610 8th Avenue, Seattle, Wasihngton, the Billings Radio Manufacturing Company, North and Elm Avenues, Fresno, California, and Edwin W. Earle, 662 Alma Avenue, Oakland, California, will, from now on, act as jobbers in their districts.

The Plymouth midget set has been very popular with the trade and public and, consequently, the Plymouth Radio Corporation of Los Angeles, California, the manufacturers of this popular line, have had to constantly increase production.

Many distributors have been appointed throughout the Middle West and South, and this last week Mr. Mart Borden, manager of the company, received an order from a new distributor in Alabama, which will necessitate another increase in production.

The midget radio was designed and first built in Los Angeles, but it looks as though other parts of the country will purchase more of this type of set this year than the West.

"The trade instantly saw the value of the new Royale 'Companion', and are placing large orders for this new model," said Mr. C. W. Smith, of the Griffin-Smith Manufacturing Company, Los Angeles, California.

The Royale "Companion" is a combination electric phonograph and radio set, built into a very attractive walnut end-table. The end-table is 27 inches high, and is so constructed that it will fit along the side of an easy chair in a manner that all controls for both radio and phonograph are within reach, which makes it possible for one to operate it without getting out of their chair.

"Our dealers are so enthusiastic about the new Apex line and have placed such large orders for the new sets that it looks as though this will be a real Apex year in Southern California," said Mr. R. B. Yale of the Yale Radio Electric Company, Los Angeles, California, distributors in Southern California and Arizona for Apex receivers.

Screen-grid tubes, dynamic speaker, beautiful cabinets and extremely low list prices make the Apex line a very attractive one this year.

When Listenwalter & Gough take on a line of merchandise they have always done a real job, and they are certainly living up to their reputation in the distribution of Angelus midget receivers in the state of California.

According to Mr. Haynes, Listenwalter & Gough, through their dealers, have been selling so many Angelus sets that they (Davison & Haynes Manufacturing Company), have had to work two shifts in order to keep up with the demand.

Weekly Review of Radio News-Thought and Opinion

IORE HIGH POWER STATIONS LOOM

An increase in maximum power roadcasting stations from nine to wenty or more looms as a result of he action of the Federal Radio Comission this week limiting the number f cleared channels for use of 50,000 vatt stations to twenty, or four in each f the five zones.

While the Commission has made no romises to grant new licenses to use hese channels, half of the cleared hannel band, it is understood that some f the pending applications will likely e granted, though not before Fall.

Judge Ira E. Robinson, former Chairnan, appears to be the only member f the Commission left who favors a eduction in power for broadcasting stations. Prior to the motion for lesignating the 20 channels, he proposed that 25,000 watts, instead of 50,000, be set as the maximum power. This was defeated 4 to 1. And Judge Robinson was the only member who voted against the other proposal..

There are now nine 50,000 watt stations, with five more holding construction permits. In addition, there are thirteen applications pending.

Commissioner Harold A. Lafount, in explaining the Commission's action, made it clear that the channels, and not stations, were limited by the order. Thus, if the synchronization experiment in Iowa proves a success, as indications are that it has, two or more stations may operate on the same cleared channel.

RADIO MAY PLAY ROLE IN POLITICS

With the revelation that former Senator James M. Reed, of Missouri, has been retained as Chief Counsel for Grigsby-Grunow Company, of Chicago, one of the leaders of the Radio Protective Association, speculation has been heard in Capital political circles on the possibility of the radio independents and the Radio Corporation of America clashing in the 1932 Democratic Presidential primary.

Owen D. Young, Chairman of the Board of the Radio Corporation, is believed to have his eye on the Democratic nomination, while Mr. Reed's recent speech at Sedalia, Mo., is considered as his initial bid for the honor.

Should this speculation prove true, cries of "radio trust" will in all probability ring throughout the convention hall unless the Federal courts should meanwhile acquit the Radio Corporation of charges set forth in the suit of the Department of Justice.

It is also cited as a new departure in politics that the fiery Missourian launched an attack on the "radio trust" in his political address after accepting the position as counsel for the independents. Moreover, it is pointed out that Grigsby-Grunow, which is the arch-enemy of the RCA, sponsored the broadcast of Reed's speech.

HEARINGS SET FOR HIGH POWER APPLICANTS

Following the amending of general order 42, so that four of the eight cleared channels in each of the five zones would be designated for use by 50,000 watt broadcasting stations, the Federal Radio Commission has set for hearing in the fall applications of thirteen stations for the maximum power.

Under the recent order, tnere can be only 20 cleared channels, or half of the total in this country, used by 50,000 watt stations. This does not mean, necessarily, that there can be only 20 such stations, as experiments have proved that synchronization or simultaneous operation of high power transmitters is not impossible and may become practical.

1000 SOUTH BROADWAY

Corner 10th St., *"The Famous Radio Corner"*

LOS ANGELES

On the cover this week are the Beverly Hill Billies, who enjoyed a meteoric rise to fame over KMPC.

From left to right—Hubert Walton, Lem, Hank, Jad, Zeke and Mr. Tall Feller. In the foreground, "Estate," Zeke's pig. Ezra is out of sight behind Lem.

More than fifteen thousand people greeted Beverly Hill Billy Radio Scouts upon their return from an airplane trip to Arkansas in search of a legacy left to "Zeke," and to extend a welcome to Mr. Tallfeller and Hubert Walton, fourteen-year-old- Arkansas boy, discovered by Glen Rice, KMPC Station Manager, 171 miles from Little Rock. Arkansas, in the heart of the Ozark Mountains. The newest addition to KMPC's Hill Billy broadcast was discovered by the radio manager after a long automobile journey and a twenty-five-mile ride on mules into this little-heard-of country. After overcoming strenuous objections raised by the boy's parents they finally agreed to his coming, with the proviso that he be returned to them within six weeks. The boy sings, yodels and plays the "geetar," and has been doing so since he was seven years old. A year of "larn-in'" is the extent of his education, a two-room log cabin located on a mountain side is his home. He, as well as the other Hill Billies, will be heard nightly except Mondays from ten until eleven over KMPC.

The daily reports of the Wall Street Journal have been added to the series of programs presented by KFI, Los Angeles, in the interests of public service. These reports will be heard every morning at 10:00 with the exception of Thursdays at 9:45 and Saturdays at 9:15.

The course of the market, important financial news, world events which react on the banking world, and similar news, will be included in the new service.

KGER try-outs are now being held Thursdays at 1 p.m., according to Bill Ray, manager. These are not broadcast, but are held in the main studio of the station.

Professor Herman Schnitzel, humorous German character, is being heard over KNX every night except Sunday from 7 to 7:08, and not just on Sunday night, as announced in last week's issue. We hope that you have not been missing the Professor's quaint philosophical observations on the news of the day.

The Prince of Wales' speech at a dinner of the National Union of Students in London on Monday (July 7) will be broadcast throughout the United States and Canada over the Columbia and National Broadcasting network at 12:25 (P.S.T.). Tune in your local NBC or CBS station at this hour.

The absence of the True Story Hour from the schedules of Pacific Coast Columbia stations is not an error. This enormously popular hour will not be heard again on the coast during the season. However, there are compensations being offered by KHJ. Charlie Wellman is back with a bigger and better "Chasin' the Blues" program for every Saturday night at 9:00 and the "Bally Hoo" program promises to give other favorite features a run for the money.

Some of the most exciting football games in the history of the game are being re-created in an authentic manner over KMTR every Monday night at 6:30. Football fans will look forward each week to these games.

Tom Wallace—KNX

Tom Wallace did a flying tackle from athletic coach of the Long Beach (Cal.) school system into the studios of KNX, where he now announces the principal evening programs of the Hollywood broadcaster and manages to let his fine baritone voice be heard now and then in solos.

TOM WALLACE

Tom is a native of Bisbee, Arizona, and received his education at the University of Arizona at Tucson.

Athletic and scholarly honors came with unusual regularity to Wallace. During his college days—and that's not so long ago, either—he was always prominent in football, baseball and basketball, being captain of the baseball team. He was also president of the student body, a member of the dramatic and glee clubs and a member of Kappa Sigma fraternity.

After school days, Tom became a football coach for the Long Beach school system while, in a somewhat sub-rosa manner, he studied singing with John Ardizoni, one of the leading vocal coaches in Southern California.

One day he dropped in at KNX studios to see whether any baritones were needed. They were, and Tom sang more or less regularly for three years as a guest artist of the station before the urge of radio got too strong and when he was offered a place as announcer in September, 1929, he accepted with alacrity.

Having been, at times, a California state official in sports, Tom is deeply interested in all such activities. He has a theory that the public would like to have the intermissions between halves in football games used by radio announcers to give analyses of plays that may have been made that day or in past games, answering listeners' queries—instead of descriptive material.

Maybe we'll hear him "air" his theory in fact sometime soon.

Hobby: Well, you've guessed it—sports, particularly football.

Appearance: A husky blond with, they say, "it."

Free Blimp Rides

When the Goodyear airship, "Volunteer," glides into its home port here tomorrow, it will have accomplished something that has never before been done by any aircraft in its class. The "Volunteer," with Pilot Bud Campbell at the controls, will have completed a round trip journey from Los Angeles to San Francisco and return. This is the longest trip on record.

The "Volunteer" returns to Los Angeles to take its very important part in the free-ride offer just announced by Walter M. Fagan, president of Pacific Wholesale, Inc., Sparton Radio distributors for Southern California. According to Fagan's offer, every purchaser of a Model 589 Sparton Radio from a Sparton dealer will receive a free ticket for a thrilling half hour ride in the Goodyear airship.

"The Model 589 Sparton features the new Antennae accumulator and the new Sparton Cardon tubes," Fagan said. "These features place the latest Sparton well in the forefront of the radio industry.

"By purchasing a Model 589 during this free-ride offer the buyer is getting two air thrills for one price—a ride in the "Volunteer" and the new Sparton radio."

To Be Tested

The Federal Radio Commission will soon be able to show critical Congressmen how equally or unequally the broadcasting facilities of the United States are divided among the five radio zones in accordance with the terms of the Davis Amendment to the Radio Act of 1927.

A unit method of evaluating power, frequencies, and time of operation has been worked out as a new "yardstick" by the Commission engineers and is now being used to analyze the broadcast spectrum. The survey will reveal in the terms of the unit precisely the distribution of radio facilities among the zones and the States of each.

Last winter, in accordance with a request of the Senate Committee on Interstate Commerce, the Commission prepared a chart to show how the stations and channels were scattered over the country, but the tabulation proved so involved for the laymen that it failed to stop the Congressional critics who declared their constituents were being treated unfairly.

Better Cross-Country Reception Seen

Reception in the West of programs broadcast by Eastern radio stations will improve within the next year, according to Radio Commissioner Harold A. Lafont, because of a predicted decrease in sun spots.

"A study of West-East night radio transmission by scientists proves such transmission to be inversely correlated with solar activity," he said. "Nine years ago when radio broadcasting was just starting, we were in a minimum of solar activity, a sunspot minimum, and reception here in the East from Western stations was at its maximum.

"For the past several years we have been passing through a maximum of sunspots. Measurements made by Dr. Greenleaf Whittier Pickard at Newton Center, Mass., have shown low field values from Western stations, in consequence of which but slight heterodyne interference has existed between East and West coast stations.

"Scientists tell us we are now entering the sunspot minimum period, with the result that field strength of West coast stations is increasing in the East and an extrapolation of the curve indicates that within a year we shall again have high field strength from Western stations. The same applies to the reception of Eastern stations in the West.

"The work of Dr. Pickard in correlation of radio reception with solar activities checks closely with the conclusions of other workers in the field,

Proposed Radio Center

Broadcasting is to be done on a so much larger scale in the future that when we look back upon what we are doing now, it will seem crude and primitive. Where today a solist or two, or a small company of entertainers assemble in a studio, John D. Rockefeller, Jr., at a cost of $250,000,000 proposes to erect four immense theatres, and a great symphony hall in New York, under the direction of Leopold Stokowski, conductor of the Philadelphia Symphony Orchestra, primarily for the purpose of assembling large opera companies and orchestras for broadcasting purposes. A 60-story sky scraper will house 27 broadcast studios.

This project, which has even New York blinking, provides for the attendance of audiences to witness these performances, but with the coming in of television, ten year or so hence, it is not difficult to foresee the time when the Rockefeller development may itself be out of date, and it may be old-fashioned to attend any kind of a theater.

Folk will be able to sit at home, whether it be in Boston or Albuquerque, N. M., and see and hear everything.

A problem of the future will be to make them spend more money than the price of a radio or television set to avail themselves of these performances. This may be solved through sound and sight entertainment being distributed by means of wires, instead of being broadcast through the air. It might then be metered out at so much an hour through an attachment to the telephone or the electric light socket.

Questions & Answers

A Weekly Department Conducted by K. G. Ormiston, I.R.E

QUESTION—I have been wondering why broadcasting stations do not have the same pitch (that is, some stations have a different pitch of tone and voice than others). Is this caused by using different types of transmitters? (2) Just how do the chain programs reach the broadcasting stations in Los Angeles from New York? Is it by a direct wire from New York? (3) What happened to the "New Set Owners Page" in Radio Doings? I am quite sure all of your readers enjoyed this department and would be happy to see it make its appearance in Radio Doings again.—Chas. M. Moore, Pasadena, Calif.

ANSWER—This is due to different types of transmitters, or where the same type of transmitter is used, the pitch is often varied through additional equipment installed by the engineer of the station. For example, in nearly all of the stations, mixing panels (whereby two or more microphone circuits may be fed into the speech amplifier simultaneously with individual "faders" on each) have been built by the operators themselves, and the various combinations of impedances in these units effect the overall audio characteristics. Usually it is not so much an actual shift in the pitch as it is a suppression of the highs and over-amplification of the basses, or vice versa.

The acoustical properties of the studio also enter into the ultimate result, as well as the type of microphones used, etc. Each station engineer strives for what he considers the best tone, and possibly no two have the same idea as to how music should sound. In very few cases is the original installation of the Western Electric Company or RCA left intact, but the boys in charge constanly inject their own ideas. To give you a rough idea of the Los Angeles stations: KFI and KNX are practically identical, 5000 watts, Western Electric. KHJ, KFWB, KFOX, KECA and KTM are practically identical, 1000 watts, KTM being the latest type. KMPC, KMTR and KELW are the same, 500 watts, W. E. KGER is the newest RCA-Victor screen-grid type, 1000 watts. KFVD, KMIC, KGFJ are composite, being locally built.

(2) Yes, the New York chain programs reach the Los Angeles stations over telephone lines leased by the chains. That is a simple statement, but there is a tremendous amount of equipment and personnel involved in the functioning of these lines. The total telephone network of the country used in chain broadcasting is in excess of 25,000 miles. Between the New York studio and the Los Angeles radio station there are about 35 repeaters, or amplifiers, which raise the signal level, to compensate for the losses in the lines. These employ vacuum tubes with A, B and C power supply, volume indicators, monitoring facilities, etc. They must be watched constantly. The lines themselves must be carefully equalized so that the wide band of audio frequencies will be transmitted uniformly. The corps of telephone men now employed in the United States to supervise the transmission and performance of the chains is over 300. This is in addition to those who care for the regular wire and equipment maintenance.

(3) Since you want the New Set Owners Page back in Radio Doings, back she goes! You 'll find it in next week's issue.

PROBE TELEVISION CHARGES

Reports that experimental television stations are selling time in the same fashion as broadcasting stations, are being investigated by the radio police of the Department of Commerce upon request of the Federal Radio Commission.

Television licenses are issued now only for test purposes to further the art; consequently no station is permitted to commercialize his permit.

The commission has also turned over 20 cases of various sorts, in which it is alleged radio stations are operating without licenses, to the Department of Justice. The names and locations of the stations have been withheld.

The essential features of these programs are identical with those sent us by the stations

New Polymet Products

Polymet Manufacturing Corp., is offering for the first time a complete list of audio ransformers, power transformers, for both 25 cycle and 60 cycle circuits, and choke units.

These transformers have been designed to correspond with standard practice and are available either in stock forms, or for manufacturer's use. Slight variations in windings and corresponding voltage output, can be promptly arranged without delaying production deliveries.

Inasmuch as Polymet, through ownership of the Strand & Sweet Mfg. Co., produces its own magnet wire, and has very large coil winding facilities at its Coilton Division of Easton, Pa., the company is fabricating transformers "from the ground up."

The essential features of these programs are identical with those sent us by the stations

8:00 p. m.—Rudy Vallee and his Connecticut Yankees.
8:30 p. m.—Preview of Sunday School Lesson.
9:00-11:00 p. m.—NBC.*

"A car, a car, my kingdom for a car," said H. R. Curtiss, driver of this one-horse shay at Hamilton, Bermuda, and echoed by Claude Foote and Barton A. Stebbins, passengers, of Los Angeles,

who attended the Philco radio distributors' convention, which was held at Bermuda.

The H. R. Curtiss Company, of which Mr. H. R. Curtiss is president, and Claude Foote, Southern California manager, are distributors in Southern California for Philco receivers. Mr. Barton A. Stebbins handles the advertising for the company.

The announcement by Keller-Fuller Manufacturing Company of 1573 West Jefferson Street, Los Angeles, of their new dynamic midget receiver, caused considerable interest in the trade.

The new set, while it looks on the outside like the older "Radiette," and will sell for the same price, $59.50, is very different inside.

The new set employs an entirely different kind of circuit, a screen grid tube and a dynamic speaker.

Mr. Fuller reports that orders have been coming in very fast from the Middle West and South, and they now have their entire sales organization completed. They have fifteen district managers covering the entire United States who, in turn, have appointed, or are appointing distributors for each section. The latest distributor to enter the "Radiette" ranks, is the J. W. Jenkin's Sons Music Company of Kansas City, Missouri, who operates stores and distributing points in six of the principal Mid-Western states.

The Gray & Danielson Manufacturing Company of 2101 Bryant Street, San Francisco, have definitely entered the small set field with a midget receiver, selling for $64.50, and carrying a name, "Remler," well known to old-time radio men.

Mr. Banta, formerly head of the Banta Company of Los Angeles, is the new manager of this company, and will make his headquarters in San Francisco. Mr. Frank G. Freeman, the Southern California representative, can be located at 2704 South Hill St., Westmore 1976.

The Brunswick-Balke-Collender Company have just announced that they have appointed Mr. Hall Berringer as North Western representative, and that he will have his offices in the Volker Building, 1000 Lenora Street, Seattle, Washington.

Mr. Hall Berringer has been in the radio business for about fifteen years, first as a "brass pounder" on trans-Pacific steamships, then in the radio department of the Leo J. Meyberg Company, then San Francisco manager of Kierulff & Ravenscroft, then sales manager of the John G. Rapp Corporation, and last, but not least, radio manager for Winestock, Scovel, Nichols Company.

All of Hall's old friends wish him the best of success in his new venture.

The Flint Radio Company, formerly of 3446 South Hill Street, Los Angeles, have found it necessary, due to a greatly increased business to move to larger quarters at 2425 West Washington Boulevard.

TIMELY TRADE TOPICS

Trade Previews New Apex Models

It was conclusively proved last week that Apex radio receivers, manufactured by the United States Radio and Television Corporation and distributed in Southern California and Arizona by the Yale Radio Electric Corporation of 1111 Wall Street, Los Angeles, will enjoy real popularity again this year.

Instead of having one large dealer meeting, Mr. R. B. Yale decided to have open house for a week and the plan was apparently very acceptable to the dealers of Southern California, as several hundred came during the preview period to look over and test the new models which were on display.

One of the new innovations which is being featured this year on all Apex

models is the "tone blender." You can now actually play radio music exactly as you want to hear it. A complete selection of tone emphasis is at your finger tips—flip the knob one way and all the instruments of the lower register will come booming in; flip the knob the other way and the heavy notes fade into the background while the trebles are augmented to complete your musical picture in a brighter vein.

Four cabinet models of walnut are beautiful enough to pass the inspection of the most discerning and to get their approval.

Griffin-Smith Moves

The Griffin-Smith Manufacturing Company, Ltd., moved last week from 1125 to 1224 Wall Street. The new building will give them two and a half times as much floor space for manufacturing as they had in the old establishment.

Although C. W. Smith has been in

the radio business for many years, the Griffin-Smith Manufacturing Company was started but a short four months ago, and during this period they have had a phenomenal growth. Starting in a very small way, they have kept increasing their daily production schedule until today they are among the three or four leading midget manufacturers in Southern California.

Mr. Smith reports that they are getting their distributing organization whipped into shape and they expect to have, before very long, representatives in all the different districts in the United States. They will appoint these distributors as quickly as they can increase their production to take care of the increased demand which will naturally follow the new appointments.

Mr. Smith is very proud of their new Royal "Companion," the radio-phonograph combination, and invites everyone to come to the new studio located at 1224 Wall Street for a demonstration.

FOR RENT

Large building which can be used for office and warehouse. Located in the heart of the wholesale radio district. 3,000 square feet of floor space. 1125 Wall Street. Telephone WEstmore 5158.

Weekly Review of Radio News-Thought and Opinion

RADIO INSPECTOR MOVES OFFICE

The Los Angeles office of the Radio Division of the Department of Commerce is now located in the Brownstein-Louis Bldg., 751 South Figueroa, Room 523. The office is in charge of James M. Chapple. It was formerly in the City Hall building.

JUDGE SYKES HERE JULY 17

Judge E. O. Sykes of the Federal Radio Commission will be in Los Angeles July 17, and for about a week thereafter. The Judge is holding hearings in Seattle in the KJR-KOMO-KVI controversy, beginning July 10, and at the conclusion of that session will come South. Hearings to be held here are in regard to radio channels and services outside the broadcast spectrum.

The Federal Radio Commission is endeavoring to eliminate the zone idea, whereby each of the five members was primarily interested in the radio facilities of his own zone. Under the new plan, Mr. Lafount is as much concerned with a broadcast station in Florida as he is with one in California, and Judge Sykes is expected to worry about our West coast problems along with thoes of of his native state. Furthermore, it was thought best to settle the Seattle argument by sending one of the commission's jurists, who was unfamiliar with the situation, and would hence be guided solely by the evidence submitted by the contestants. It is expected that Commissioner Lafount will visit one of the other zones during the summer.

McNAMEE VS. SCHMELING

Shall a radio announcer of a prize-fight be selected by the broadcasting company or by participants in the fight? Did the NBC favor Sharkey in the recent fiasco?

These are questions raised by Schmeling in his efforts to disqualify McNamee as the announcer in the next fight. We don't believe a fighter has any more right to tell a broadcasting company who to put in as an announcer than an actor would to tell a newspaper what critic to assign to a theatrical performance.

A broadcaster, be he Aylesworth, President of the NBC, or McNamee, wouldn't last fifteen minutes with the radio audience if he did other than give the man unbiased account of a prize-fight or anything else broadcast.

The trouble, in our opinion, was that McNamee, if anything, was a little too honest in acquainting the radio audience with what a close shave Schmeling had from being defeated. It was this, we believe, which caused der Maxie to make this squawk.

STUDY INTERNATIONAL RADIO PROBLEMS

While most folks are either on vacations or just sliding along on their jobs, Government radio experts will be at work this summer gathering data on international technical radio problems.

An organization meeting was held recently and other sessions will be held at infrequent intervals. Undecided questions, which were left handing fire at the International Conference at The Hague last Fall, are to be considered along with the application of policies agreed upon at the European meeting.

Preliminary reports will be made by the several Committees to the full Committee on September 4, and these will, in turn, be recommended to the conference of the Interantional Technical Consulting Committee on Radio at Copenhagen in 1931. The International Radiotelegraph Convention will be held at Madrid in 1932.

The C. Merwin Dobyns Station

KGER

A NEW STAR in the broadcasting firmament

NOW on the air with the first RCA-Victor Screen Grid Transmitter west of the Rockies, KGER blankets not only the rich market of Southern California, but the entire Pacific Southwest.

To broadcast advertisers the station offers that rare combination of coverage and listener-acceptance that invariably brings satisfying results.

POWERFUL • POPULAR
PRODUCTIVE

Charles McQuirk, writing in Liberty Magazine, referred to the young gentlemen on our cover this week as the "most romantic singer I ever heard." And that is Ted White, KHJ's newest find. Mr. White started life as a newspaper reporter on the United Press Association, and from there trekked to vaudeville and musical comedy. "The Willows," the haunt of the rich and the famous in Reno, Nevada, packed them in to hear Ted White crooning for 76 weeks. Having entertained in night clubs all over the country, it is little wonder that Ted's "Top o' the World Night Club" program on Wednesday nights at 9:30 is proving one of the most popular features on the Pacific Coast. See KHJ's program for other appearances of this much acclaimed young man.

A series of six or eight black-outs, one after the other, combine to make the "Laf-O-Grafs" one of the most entertaining programs to be released from KNX. Dial in next Tuesday night at 8 p. m. and see if you don't agree.

Bill Ray's Ragtime Revue, long a KFWB Sunday night attraction, is being unpacked from moth balls and cedar chest and by the time this magazine is in your hands will probably be on the air over KGER from 10 to 12 midnight, Sundays.

Arthur B. Reeve, one of the world's greatest writers of detective stories and creator of the famous "Craig Kennedy," has joined the ranks of National Broadcasting Company writers and will work in collaboration with Finis Farr in the writing of a series of radio detective stories. The first of these will be on the air Monday afternoon, July 14, at 4:30, and at this writing KOMO and KGO will release the program. More NBC stations will undoubtedly add this feature as soon as possible.

On July 3, KTM's Ranch Boys began to "strut their stuff" before the microphone nightly from 9 to 10, instead of from 7 to 8 in the mornings. This change in schedule is in answer to a city-wide appeal to give everyone a chance to hear this popular feature.

Kenneth Lee is a new addition to the staff of KMTR as announcer and continuity writer. Mr. Lee graduated from U. S. C., majoring in advertising. From a local advertising firm he came to KMTR, where he is understudying for Harry Geise, program director.

Wm. L. Norvell has been appointed new manager of KEX. Mr. Norvell was formerly with Foster and Kleiser in Portland and district representative in Walla Walla, Washington, and Eugene, Oregon.

"Symphonies Under the Stars," played in the world-famous Hollywood Bowl in Southern California, are being broadcast every Saturday night for eight weeks, having begun July 12 over the National Broadcasting company. Alfred Hertz, internationally known German conductor, affectionately called "The Father of the Bowl," directed the orchestra during the initial program. Succeeding concerts will be given under the batons of such noted directors as Karl Krueger, Bernardino Molinari of Rome, and Enrique Arbos of Spain. This series of summer concerts is one of the most celebrated in the United States. Presented under a star-flecked sky, in a huge, natural amphitheater in the Hollywood Hills, the four programs a week attract thousands of music and beauty lovers from all parts of the country. Stations through which the Hollywood Bowl programs will be released are KHQ, KOMO, KGW, KPO, and KFI.

New Set Owners' Page

tatic-Interference-Special Aerials

By K. G. Ormiston

Not so long ago, all of the extraneous ise emitted by the loud speaker of lio receiver was called "static" by e set owner. He was not aware of e existence of electrical interference; ıt is, the noises produced in the set electrical circuits, devices and appli- ces of man-made origin.

But lately this subject of electrical in- ference and the activities of the vari- s interference committees and their ecialists have received so much pub- ty, that the public has swung to the er extreme and is prone to call all raneous noise electrical interefer- e. As a matter of fact, with the reased sensitivity of the modern re- vers, the level of natural static has reased; and it is important that the owner should recognize this fact.

The average set owner, after hearing much about electrical interference, serves that when his set is operating h the volume control fully advanced KOA, for example, there is consider- e popping and scratching. He im- diately attributes this racket to elec- al interference and contemplates the tallation of a special antenna and und installation of the "shielded d-in" type. Since these special an- na installations are helpful only in ucing the effects of electrical inter- ence and improving the signal-to- erference ratio, and do not reduce the ects of natural static, it is very im- tant that the set owner be able to ognize static and differentiate be- en it and man-made noises. It would foolish for him to spend money in ing to conquer the former.

The "shielded lead-in" antenna is an ergency measure to be used only in es where electrical interference is severe. It is not an efficient antenna inasmuch as the shielding reduces the signal strength, but is useful in combatting interference for the reason that by proper design the interference can be reduced in greater proportion than the signal.

We visited the home of a fan the other evening where an elaborate shielded installation had been put in, in spite of the fact that he had never been troubled with electrical interference. The result was that a beautiful 85-foot flat-top aerial gave him only the received broadcast signal strength to be expected from about 20 feet of wire. Most of the energy picked up by the antenna took the path to ground afforded by the capacity between lead-in and shield. A short wave set, connected to this aerial and ground system gave less signal strength from Eastern stations than was obtained from simply touching the aerial post of the set with the finger and using no ground connection. This is due to the fact that the capacity effect between the lead-in and shield, at the very high frequencies of short waves, constitutes practically a direct short-circuit to ground.

And so, we would advise that this special antenna and ground arrangement be used only where electrical interference is present in an objectionable degree. DO NOT CONFUSE INTERFERENCE WITH STATIC. Natural static is particularly pronounced during the summer months, and is always present with distant stations. It is often objectionable with semi-distant stations, and sometimes even mars the reception of powerful stations only fifty miles dis-

Static

(Continued from Page 13)

tant. It sounds more or less like machine guns as reproduced in the "talkies," though there is no regularity to the "pops." If this sort of static is all that your receiver reproduces in addition to the broadcast signals, then there is nothing for you to worry about. If, on the other hand, you hear noises which are obviously man-made, because of the fact that they are periodic or appearing at regular intervals, or start and stop suddenly, or coincide with the passing of trolley cars, the flashing of signs, turning on and off of electrical fixtures or appliances, the dialing of phones, etc., then it will be worthwhile to consult your dealer or the Interference Committee of your Radio Trades Association regarding minimizing these disturbances by means of a special aerial and ground installation.

Hot Shots From San Francisco Show

The Pacific Radio Trade Show, held last week at the William Taylor Hotel in San Francisco, was not only a great success but allowed all of the old time radio men, some of whom hadn't seen each other for a year or more, to get together and recount old times.

Hall Berringer from Seattle, Sturdevant from "anywhere," Henry Lapkin of San Francisco, Les Taufenbach and his whole bunch from Los Angeles were strutting around the Show with their chests stuck out because of the great acclaim which Brunswick was getting from the trade. They were especially proud of that marvel of mechanical, electrical and acoustical engineering, the new Brunswick Automatic.

Phil Goth, distributor; Charlie Walter, representative; Davison and Bob Haynes, manufacturers, were all proud of their new Angelus models. All were feeling gay and optimistic.

Shaw, of Arcturus fame, had the first booth in the auditorium and kept things going and attracted a lot of attention with a good-looking dancer, an accordion and a guitar player.

Bennie Kruger, the big CeCo man from the South, was much in evidence and thinks more of his tube line than ever.

The Radiotron group were out in force and were asking everybody to send one of their fast communication letters back home to their wives, sweethearts or friends.

Another group of tube men much in prominence was the KenRad crowd. H. G. Blakeslee, coast representative, and Dick Smiley, general sales manager, were making whoopee and enjoying themselves.

Sparton again tried to make dudes out of everyone by handing out several thousand canes. Leigh Borden, representative, Harry Curtis and Walter Fagan, distributors, were strutting around trying to look as though they were used to carrying canes.

C. W. Hunter, representative, and Mr. Bodman, general sales manager, were talking fast and furious about the new Silver models. "Silver will be good this year," they said. Good for them, we hope it is true.

The Atwater Kent crowd were there, of course. Willis, Ray Thomas, Mark Smith, Ernest Ingold officially represented A. K., and while they didn't show any sets, they displayed nice red hats, of which they were justly proud.

Big Herb Horn of Los Angeles is at last connected with a crowd after his own heart. The Clarion people gave out green dice for souvenirs and since Herb is the most famous crap shooter in the radio industry he was in perfect accord with this policy.

The Kierulff & Ravenscroft crowd, who handle Crosley, was well represented, Charlie Kierrulff, Duffy, Bill Houghings from Los Angeles; Garett Arnold and his group from San Francisco, Wayne Miller and Bialtkowsky, factory representatives, were pushing around between their booth in the basement and their highest room on the 23rd floor. They are very happy about the new Crosley line-up and expect to do big things this year.

Lloyd Holten, of Rola fame, was much in evidence. He was so happy with his new line-up of sets and speakers that he had the ends of his mustache turned up which made him look as though he were perpetually laughing.

The Philco crowd were out in force and enjoying everything the Show had to offer. McWhorter, Claude Foote, Stanley Curtis, Bart Stebbins and many others were seen about.

There must have been between a hundred and a hundred and fifty Southern California radio and music men and women at the Show, and everyone that we talked to said they were enjoying themselves and getting a great deal out of the Convention. A few who are not mentioned above but whom we saw at the Show are R. B. Yale and his wife of Apex; Herb Zenker and wife of Blue Bird; Fred Dean and wife of Prest & Dean; Fred Prentiss and wife of Zenith; George Lane of Bosch; Ross Hartley, Roy Worth of the Electric Corporation, Dave and Sidney Spector, Fredrickson of Cunningham, Stilliman of Edison, Fritz Falck and wife of Advance, Jimmie Hermans of Pacent, the whole General Motors crowd—L. C. Warner, Jimmie Condon, Henry Gardner, Don Wallace, Otto Bloom, Wiley Doran, etc.; McNeeley of Gilfillan, Starett of Lyric, Bill Cook of National, McDonald of Radio Corporation, Sette of Stein, Bushnell of Sulmock, Lombard Smith, Bert

(Continued on Page 45)

The Dayton Scientific Corporation has recently been incorporated in the state of Ohio. Offices and plant will be located in Dayton. Manufacturing of radio and electrical devices and also research in these lines will be the functions of this company.

The officers are Oscar H. Hulberg, President; H. L. Burns, vice-president and treasurer, and George F. Holland, secretary. Of these, Messrs. Burns and Hulberg are well known to the radio trade.

One of the first products of this corporation will be a short wave receiver suitable for the use of the non-technical trade, and will be sold through distributors. Thirty-three distributors in the United States and South America have been appointed up to July 1. About seventy will be appointed in this country, according to present plans.

Mr. Julian K. Sprague, vice-president of the Sprague Specialties Co. of Quincy, Mass., was a visitor in Los Angeles last week, and while here announced the appointment of the Marshank Sales Company, 224 East 16th St., Los Angeles, as factory representatives. The Sprague Company manufactures mica and electrolytic condensers of high quality. Dave N. Marshank of the Marshank Sales Company will personally represent the line. Since the names of Sprague and Marshank are both so well known to the trade, we need say no more!

The Rola Company, manufacturers of loud speakers and radio receivers, with factory and offices in Oakland, California, will open a Southern California branch at 1321 Maple Avenue, Los Angeles. Mr. Lloyd Holton, general sales manager of the company, made this announcement last week during the Western Radio and Music Trades Convention in San Francisco.

Mr. Mart Borden of the Plymouth Radio Company, prominent midget radio manufacturer of Los Angeles, announced the appointment of two new distributors during the past month. They are: Arizona Radio & Supply Co., 903 West Moreland, Phoenix, Arizona, and Wholesale Radio Supply Co., 269 7th Street.

Jack Miller, who was for several years with Radio Doings, and more recently connected with the Jackson-Bell Manufacturing Company, is now with H. R. Curtiss Co., 1145 Wall Street, Los Angeles. Jack is selling the new Philco line of receivers as well as the J-B midget, and if enthusiasm means anything in this life, he should sell 'em fast and plenty.

Mr. Davison of Davison-Haynes Mfg. Co. of 1012 West Washington Blvd., Los Angeles, makers of the popular Angelus radios is now in Seattle making final arrangements with the Seattle Hardware Co. to act as Washington distributor. With the completion of this deal, Davison-Haynes will have a complete jobber coverage in the west.

Hot Shots From S. F.

(Continued from Page 44)

Knight of Ohiohm, Jerry Hill of De Forest, Emmet Patterson of Patterson, Mart Borden of Plymouth, Dick Huber of United and many others.

Majestic had a nice display and much interest was shown in the new models. We didn't see any of the Ungar & Watson crowd but presume they were too busy to get away from Los Angeles.

Yes, the Show and Convention was a great success. Next year they are planning on holding it at Vancouver and after the speech given by Mr. Kelly enumerating the many joys of his home town there will probably be as large a delegation going to that Convention as attended it this year.

TIMELY TRADE TOPICS

New Philco Models

The eagerly awaited new Philco radios have arrived in Los Angeles. Four brand new features, tone control, station recording dial, automatic volume control and screen grid plus, bring radio enthusiasts an entirely new thrill in radio performance.

After carefully inspecting these latest radio models, the public will enthusiastically agree, radio values are higher than at any other time in the history of the industry—more new desirable features at new greatly lowered prices.

Evelyn Hagaman, Concert Pianist

Tone control, acclaimed radio's newest miracle by radio engineers, enables the operator to use his own personal touch to secure the finest reception from each radio program. Now through Philco's tone control, four positions of tone quality—brilliant, bright, mellow, deep—enable the user to instantly change the tonal pitch of the program to suit his individual taste and mood. Also, stations which come in harshly in poor locations, or are marred by "interference," now by turning tone control to mellow or deep may be thoroughly enjoyed. Thus many additional fine programs are made available.

Philco's new illuminated station recording dial is designed so that favorite stations may be permanently logged and tuned in quickly and easily.

The new automatic volume control will prove a great boon to distance fans especially, for it counteracts fading so that listeners can not only get, but hold and enjoy, the fine programs of far-away stations.

The new models include console, lowboy, highboy, and combination radio-phonograph, and have been richly but simply designed.

"Radio Doc" of Pasadena, whose fine store is located at 1581 E. Walnut, has established and built up an enviable dealer and service business, despite the fact that he must spend his waking hours in a wheel chair. He ventured into Los Angeles last week for the first time in seven years, for the purpose of inspecting the new Brunswick receivers, distributed by Western Radio, Inc., and to sign the dealers' franchise.

Weekly Review of Radio News-Thought and Opinion

GREETINGS, JUDGE SYKES!

Judge E. O. Sykes of Mississippi, vice-chairman of the Federal Radio Commission, whose picture appears on the cover of this issue, is in Los Angeles holding field hearings. The hearings pertain to radio facilities outside the broadcast spectrum, but nevertheless broadcast station owners and broadcast listeners will be greatly interested in the Judge's visit and will put forth every possible assistance to the end that he may acquire an accurate picture of the existing conditions here in Southern California.

On behalf of the Radio and Music Trades Association of Southern California, the broadcasters and the set owners, Radio Doings extends greetings to Judge Sykes, a most cordial and hearty welcome to Southern California, and sincere appreciation for the accomplishments of the Federal Radio Commission.

NEW POLICY ON HEARINGS ADOPTED

So great has the volume of applications become within the last year or so, the Federal Radio Commission has decided to follow the procedure of other Federal agencies in the matter of conducting hearings.

Hereafter, examiners, and occasionally one or more Commissioners, will hold hearings and recommend action to the Commission as a whole. After looking over the testimony, the examiner's report, and an explanation for his findings, the Commission will send copies to the participants of the hearing who may file an exception within 15 days.

During the summer, one or more Commissioners will be empowered to act for the whole body on routine renewals and applications as the several Commissioners will spend a great deal of time visiting the five zones.

KFI RENEWS APPLICATION FOR HIGH POWER

Because of the recent action of the Federal Radio Commission setting aside half of the 40 cleared channels for use by 50,000 watt broadcasting stations, KFI, of Los Angeles, which was authorized two years ago to utilize maximum power but failed to take advantage of it, has applied for permission to put into effect its postponed plan.

The station is already operating on a cleared channel, 640 kilocycles, with only 5,000 watts. Louis G. Caldwell, counsel, told the Commission that the station had delayed installing 50,000 watt equipment because until only recently such transmitters were considered in an experimental stage.

COMMISSION CLEARS DOCKET

The Federal Radio Commission has cleared its application docket and some of its members have gone on vacations or field inspection trips. In a prolonged meeting last week, the commission disposed of all applications which had reached the decision stage, about 175, and postponed hearings on pending cases until next Fall.

Maj. Gen. Charles McK. Saltzman, chairman of the Commission, has gone to Lake George, N. Y., for a month's vacation, while Judge E. O. Sykes, Vice-Chairman, is holding field hearings at Seattle, Wash., and Los Angeles, Calif.

Judge Ira E. Robinson intends to return within a few days to his home in West Virginia for a brief vacation and an inspection of his zone.

Harold A Lafount and William D. L. Starbuck are remaining in Washington for the present, though the former said he plans to take a field inspection trip shortly.

CORNER 10TH ST., "THE FAMOUS RADIO CORNER"

LOS ANGELES

The National Broadcasting Company has scheduled the following political speeches for the week of July 20th to 27th. Over KFI, KFSD and KGO, on Monday at 7:00 p. m., Governor Young will speak, and Wednesday at 7:45 p. m., the same speaker. James Rolph will give a campaign talk over the same three stations on Friday at 7:15 p. m.

On July 26th, the Ascot Speedway program will replace Charlie Wellman's "Chasin' the Blues" program from 9:00 until 10:00 p. m. The new program is under the sponsorship of the American Legion and comes to listeners directly from Ascot Speedway where, in addition to the broadcast of the races, complete with sound effects, prominent motion picture celebrities will speak over the microphone. The entire Pacific Coast Columbia System will take this program, incuding KHJ, KFRC, KMJ and KVI.

For devotees of minstrel shows, KGER offers you an hour's entertainment of good all-around colored minstrel performers on Thursday nights from 8:00 to 9:00.

Glenn Edmunds, director and manager of the Glenn Edmunds' Orchestra, which plays nightly at 6:00 p. m. over KGFJ, and Carol Johnson, pianist and arranger for the band, have written a new tune which is to be featured by the Biltmore Trio. The name of it is, strangely enough, considering the youthfulness of the composers, "Tired of Love."

Something different in the way of intermission offerings during a dance program has been inaugurated by KNX, Hollywood. From the famous Madame Zucca's Inn, the broadcaster offers a grand opera sextet, in the more stirring selections from the music drama catalogs, together with classic but melodious and brilliant solos.

No "sweet," quiet tunes are offered and the fans seem to like these nightly varieties, although at first blush jazz and grand opera would not seem to be good mixers.

Eminent women composers contribute the songs for a fifteen-minute recital broadcast by Lucile Fowler, western concert contralto, over KOA, Denver, Thursday, July 24 ,at 6:30 p. m., P. S. T.

The notable thing about Salvatore Santaella's orchestra, which appears nightly, except Sundays, at 10:00 o'clock, over KTM, is that every man in the orchestra is an outstanding soloist in his own right. An artist of the first rank himself, Santaella has brought together only the best in the profession, and, as a consequence, boasts one of the most perfect orchestra units on the Pacific Coast. Prominent in the orchestra is Nick Aguilar, bass violin and guitar, and one of the outstanding guitar soloists on the coast.

"Billy Markowitz' 'is one of those fellows who play beautiful "legitimate" violin and "hot" sizzling fiddle. This will be demonstrated Tuesday night at 7:00 o'clock over KMTR. Billy has spent the past few years at the local motion picture studios, doing "talkie" and sideline playing.

One of the most beautiful programs that the Studio Editor has heard greeted our ears over KNX the other night. Upon investigation, it was discovered to be the Hungarian Ensemble, with Margit Hegedus, violinist. Consult KNX's program for the schedule of concerts, and don't fail to enjoy this extraordinary feature.

New Set Owners' Page

SERVICE

The general public has come to appreciate the value of having the family car serviced regularly. Engine crank case oil, rear end, transmission, chassis, body—all details are checked over if the car is to be kept in top-notch condition and made to last as long as possible. It is realized that such periodical servicing results in proper lubrication, adjustment and slight replacements long before real trouble and expense can occur.

If the usual radio set were considered in the same light, with periodical servicing, there would be more radio enjoyment at less expense. We maintain that the average radio set should be examined every six months, if it is used several hours each day. At the end of six months of use, the tubes lose their efficiency, the tuning condensers may be slightly out of step, there may be dust or dirt on the volume control, and so on. These matters are trivial. Yet the performance of the set is greatly affected, without the set owner being aware of the gradual falling off in efficiency. After a year of use, some resistors may change sufficiently to throw the tone quality far off, let alone the greatly reduced efficiency of average tubes.

It is our belief that the majority of radio sets in homes are operating at half their intended efficiency, due to lack of servicing year after year. Tubes are often used for thousands of hours or long after they are practically exhausted, even though they may still light. Noisy volume controls may have to be carefully cleaned. Defective resistors may have to be replaced. Broken-down condensers are inexpensively replaced, giving the radio set years of additional life.

Remember the slogan, "Use your set several hours daily. Have it serviced twice a year."

* * * *

Service men in Southern California are examined by the Radio Trades Association as to their knowledge and ability. Those who satisfactorily pass the requirements carry a card of certification, bearing the holder's photograph and the signature of the secretary of the association. Insist that your set be serviced by a certified technician. He will produce his card upon request.

There is no "Limit" to your earnings in Electricity

LEARN "RIGHT" in Los Angeles

Young men this minute face wide open and astonishing opportunities in Electricity. There is no limit to earnings . . because there is no limit to this gigantic, expanding field.

Men Wanted!

Within three months thousands of trained men will be needed to harness Boulder Canyon Dam alone. The first call naturally is for trained men. Be prepared! National will quickly train you for these and other splendid opportunities opening up daily.

Dr. Lee de Forest, the distinguished Electrical Engineer, predicts such an Electrified world within the next few years that today's Electrical development will look like child's play.

Actual Shop Methods

Remember, at National . . we teach by actual shop methods. Not by correspondence, dry lessons or puzzling, dull books. You work on thousands of dollars worth of actual equipment . . just like learning in the big everyday Electrical plant out in the field in which you will later work.

22,000 GRADUATES OF THIS BIG MILLION DOLLAR SCHOOL

Right at your very door is NATIONAL . . where thousands of men, of all ages, have come from all parts of the world, and have graduated, ready for big pay jobs. You can learn this big paying profession quickly here, under expert instructors. Previous training unnecessary, if you can read and write. Start any time. Days or Evenings.

Use Our Great Job Service

NATIONAL will help you to employment, both while in school and after graduating, absolutely Free of extra charge. Visit NATIONAL today, or send for our BIG FREE BOOK.

THAT $30,000,000 SUIT

Former Senator James A. Reed, of Missouri, potential Democratic Presidential candidate, launching a $30,000,000 trust suit, in behalf of the Grigsby-Gurnow Company, against the Radio Corporation and affiliated groups in which Owen D. Young, another Democratic Presidential possibility is the moving spirit, is an action which apparently may be heard from in the 1932 Presidential campaign.

QUESTION—Do WBAP, Fort Worth, and WFAA, Dallas, both use the same 50,000-watt transmitter? If so, this is the only case of this kind in the United States, isn't it? H. J. McA., Tacoma,

ANSWER—Yes. The transmitter is located about midway between Dallas and Fort Worth, and is served by studios in the two cities. When controlled from Fort Worth, the station becomes WBAP, and when connected to the Dallas studio, it is WFAA. The same arrangement was used in Chicago by WGN and WLIB. At certain hours the Tribune station, WGN, became the Liberty Weekly station, WLIB, but there was only one transmitter. There are several instances of this around the country, where two stations were forced to share time by the commission, and they wisely decided it would be more economical to operate but one transmitter, and share time in using it.

The 24 Hour Station

By K. G. Ormiston

Keeping good folks joyful 24 hours a day would appear to be an undertaking that would try the fortitude and patience of even a Job, and yet that is what Los Angeles' "youngest" radio station is doing.

KGFJ is our youngest station not in point of years, but in spirit. Its owner-manager, Ben S. McGlashan, is but 26

BEN S. McGLASHAN

years of age. He started in the broadcast business as remote control operator at the Montmartre Cafe in 1925, where he used the slogan "Everybody is happy." And that is the spirit that has stuck to him and today so obviously pervades the atmosphere of KGFJ. He was the "Big Brother" of KFWB in 1925-26 and made countless kids happy in that role. While working at KFWB he decided to own his own broadcast station, and in January, 1927, KGFJ put its first feeble voice on the air from the roof of the Odd Fellows Temple at Washington and Oak streets.

For three years and a half KGFJ has gone through all of the trials and tribulations which confront a station that must be self-supporting. Subsidized by no wealthy newspaper, automobile distributor, picture producer or what-not, this little station has had to stand on its own feet and progress. And progress it has, until today it occupies beautiful quarters on the roof of the J. V. Baldwin Bldg., 15th at Figueroa, which puts to shame many stations of greater power and prominence; has installed modern equipment which enables it to lay down a strong signal of excellent quality over an area inhabited by more than a million people; and has eliminated all classified advertising from its programs. In this last feature KGFJ stands alone with only one or two of the major stations. The station is probably best known for the fact that it has operated continuously day and night, 24 hours per day, for more than two years. We believe it is the only 24 hour station in the United States. As Ben says, "Nobody else would be crazy enough to do it!"

Ben is assisted by H. Duke Hancock. We remember when Duke had a little shack on the end of the Venice Pier, where he operated a "ham" outfit which was dignified by a sign informing the curious that it was the "Venice Wireless Station." This was eighteen years ago! Later, when the "City of Honolulu" burned at sea, it was Duke who made the very necessary arrangements via wireless for the timely arrival of the rescue ship which saved all of the Honolulu's humans (and Duke). His broadcast training was acquired at KHJ and KFWB where he served as operator. (This was before anybody ever called 'em "technicians").

A significant fact which is indicative of one of the reasons why KGFJ is a successful station, is that the first sponsor they ever had is still numbered among the satisfied cash customers. Which reminds us of an incident at one of the luncheons where the broadcasters get together to pledge their allegiance to Waldo Tupper. The manager of one of the big stations was wandering about the table looking for a place to sit, when some friend suggested: "Sit by Bennie McGlashan. He might tell you how to make a broadcast station pay!"

De Forest Addresses Radio Engineers

Dr. Lee De Forest, inventor of the three-element vacuum tube, addressed the Los Angeles chapter of the Institute of Radio Engineers at the Engineers Club last Thursday evening, July 3rd. He discussed his early work and the rise of the radio industry to its present pre-eminent position. He spoke of his first experiments with the electron tube.

"The little thing that originated in Chicago has eventually, in thirty years, built up an industry of almost inconceivable proportions. It has entered many industries aside from radio. You would be astonished if I read you a list of the enterprises in which radio tubes have proved their usefulness. I have heard a list which I cannot memorize. To mention but a few, the radio tube is used in, or has made possible, sound motion pictures, long-distance telephony —which, by the way, was the first outstanding use to which the vacuum tube was put—broadcast transmitters, world-wide telegraphy, television, beam transmission, facsimile telegraphy, amplifiers of all sorts, musical instruments, traffic control, metering machine control, theater light control, electric reporting, analyses of musical sounds, guidance of airplanes, beacons, radio compasses, automatic inspection, rejection and matching processes of various sorts, and in agriculture.

"Some 6,000 research scientists are at present engaged in developing and producing electron tubes in America and Europe. The vacuum tube industry has grown to a billion dollars a year business. The business in vacuum tubes for radio purposes alone in this country last year totaled $600,000,000. It is rather interesting to reflect on how great oaks from little acorns grow."

Dr. De Forest is president of the Institute of Radio Engineers, with headquarters in New York City.

Commission Investigates Fakers

The Federal Radio Commission is turning its attention to censorship of broadcast material. While the law does not empower it to act as censor, the Commission contends that where broadcast material is not in accord with the public interest, convenience or necessity, the refusal of a license or the revoking of a license is well within the defined powers of the regulatory body. Two stations have already been ruled off the air because of the nature of talks which were detrimental to the public welfare.

The Commission is now turning its attention to those stations which broadcast Rajahs, gypsies and the like,—professed fortune tellers and crystal gazers who invite listeners to mail their questions to the "prophet" at the station, and "as many as possible will be answered over the air." The Rajah then will read questions, giving only the initials of the writers, and tell what the "crystal shows very clearly" as to the inquirers' problems, including success in love and business. It is usually suggested, sometimes in a subtle way, that one dollar should accompany each letter.

The Commission is acquiring a large portfolio of complaints and information concerning the many stations that permit their facilities to be used by these fake fortune tellers. All told, about thirty stations are in danger of losing their licenses.

Now that the number of 50,000-watt stations allowable in each of the five zones has been definitely set at four, KFI and KNX will no doubt proceed with the installation of high-powered equipment under the construction permits which they hold. KGO will be the third 50,000-watt station, and a fourth and final construction permit will no doubt be issued shortly.

HAROLD W. SMITH
National Trained Radio Expert

In center picture at right is H. M. Tremaine, Service Manager, California Victor Distributing Company, also F. V. Somerville (left), and G. C. Sullivan, both National graduates.

"He's Best Victor Man in Los Angeles"

so says H. M. Tremaine (Smith's boss), who continues:

"Your men (we have three now) are undoubtedly TRAINED RIGHT, because they make good with us from the very start. THEY KNOW THEIR STUFF, and we are glad to have a school like yours to get good Radio men when we need them."

Chas. Freshman Co., Inc., and dozens other great Radio concerns have favored National Graduates and continue month after month.

Learn Days or Evenings

We teach you days or evenings, without hard, dry books to puzzle you and without dull, boresome classes, where you are either held back by slow students, or rushed out of important subjects before you have time to thoroughly master them. National training is practical, thorough, interesting usable and valuable,

LOOK! National's Great Radio JOB SERVICE gets RESULTS!

Month after month year after year, quickly and dependably—national's famous Job Service helps place its Radio graduates in GOOD JOBS WITHOUT A PENNY EXTRA CHARGE, Get this great service back of you, to help you also, to climb the Big Pay ladder in this FIVE BILLION DOLLAR INDUSTRY.

Million Dollar Institution

You learn every branch of Radio quickly in our great MILLION DOLLAR SCHOOL, under long experienced Radio Engineers. You get lifetime Job Service, life-time Technical Consultation Service, plus many other features, and not a penny extra charge. Whether working or not, SEE US NOW. Visitors always welcome.

Visit Us or Write Today

It's easy to learn fascinating Radio quickly, in our Big Shops on our mammoth outlay of equipment. Write for Free Radio book, with its amazing facts about this giant industry, and its astonishing opportunities for you.

Polymet has brought out an entirely new line of wire-wound tubular resistors, which are supplied on porcelain tubes, and entirely protected with high baking Bakelite compound of unusually attractive appearance and excellent durability.

These resistors are supplied in single value units or in tapped units, for use as voltage dividers. They are supplied as stock items in single value units up to 100,000 ohms resistance and 20 watts dissipation. For manufacturer's use any usual values and current capacities are available on special order.

Television is still in the laboratory stage, in the opinion of the Federal Radio Commission, and the art has not developed far enough to enable any station to provide radio-movies on a commercial basis.

The essential features of these programs are identical with those sent us by the stations

A special convention of electrical interference experts was held in Fresno, California, July 16-17. It was attended by representatives of the public utilities of the state, and radio trades association interference specialists. George R. Walters of the Southern California association was the moving spirit in calling the convention together. The meetings were closed except to the duly authorized delegates.

The familiar chimes which for six years have marked the station call of KFI, Los Angeles, have a successor, which now does the same duty for both KFI and for its associate station, KECA. The new bells are operated by hand, not electrically as the old ones.

Christian Scientists of Southern California will receive from KFI-KECA, Los Angeles, a regular Sunday program scheduled indefinitely from now on for the hour of 10:50 a. m. (P. S. T.). The program will consist of talks by authorized exponents, and they are sponsored by United Church of Christ, Scientists, in Los Angeles.

The Federal Trade Commission has placed a ban on the practice of a certain coffee distributing company of declaring in radio advertising that its brand is treated with a special ripening process. An investigation has proved the claim false.

See Page 17 for NBC Program

Tuesday evening, July 8th, the Leo J. Meyberg Co., Radiola distributors, were hosts to the dealers of Southern California at dinner at the Jonathan Club, Los Angeles. H. E. ("Shorty") Sherman presided. The occasion was the introduction to the trade of the new screen-grid superheterodyne models of the Radiola line. This new set is creating a furor in that it possesses a degree of sensitivity heretofore never attained except in laboratory receivers.

H. E. SHERMAN

Mr. Sherman, who guides the destinies of the Leo J. Melberg Company, is also president of the Radio and Music Trades Association of Southern California, and a dynamic figure in the California radio world.

C. R. Spencer, 1109 N. Van Ness Ave., in Hollywood, conducts a very complete radio service laboratory. Prompt and efficient service for set owners, whether they reside in Los Angeles or in the other end of the State, is Spencer's specialty. His mail order service for out-of-town fans is becoming a substantial part of his business. A special department for caring for the service work of radio dealers is another important branch of his complete service. The technicians employed by Spencer are certified by the Radio Trades Association of Southern California, and employ the Supreme Diagnometer for all test work. This is the most complete instrument for radio test work, making more important tests on a radio receiver than any other device.

Approximately 200 radio dealers holding Crosley franchises, together with their sales and servicemen, were guests Wednesday night at a pre-view showing of the Crosley 1930-31 line in the store of Kierulff & Ravenscroft Inc., California distributors.

Crosley cabinets this year have remarkable eye appeal and are partly made of "repwood" a material used exclusively by Crosley and developed for its unusual baffling effect.

The screen grid tubes are said to work at approximately 40 per cent greater efficiency than last year and the larger sets consequently carry only seven tubes including screen grid detectors as compared to last years 8 tube models.

A new and patented volume control eliminates "blasting" when tuning from one station to another and makes it easier for set owners to bring in distant stations at maximum capacity.

Amrad radios this year become a standard part of the Crosley series and are being manufactured in the Crosley factory. They incorporated all Crosley improvements but are eight tube sets including four screen grid tubes.

Non-franchised radio dealers of Southern California were the guests of Kierulff & Ravenscroft Inc. Thursday, Friday, Saturday and Sunday at a "open house" preview showing of the new line.

"From every standpoint," said A. E. Ravenscroft, "this years Crosleys are the best that ever bore the name and without a doubt they will occupy a dominating position in the field for the next twelve months. Crosley is the first of the national manufacturers to recognize the basic soundness of the California originated "clock model" sets and a Crosley "midget" leads the line."

Those who addressed the meeting Wednesday were Mr. P. W. Bialkowsky, Pacific Coast representative of the Crosley Radio Corporation, Mr. W. N. Miller, Kierulff and Mr. E. L. Duffy.

TIMELY TRADE TOPICS

A number of interesting comments on radio conditions on the West Coast were recently made by Mr. Vernon K. Wilson, Asst. Sales Manager of Triad Mfg. Co., Inc., of Pawtucket, R. I., makers of Triad Radio Tubes.

Mr. Wilson, who has just returned to the factory from an extensive business tour throughout the West found an amazing popularity being accorded the miniature or midget radio sets. They are probably far more popular in the West than in any other part of the country. A number of these he found not only equipped with Triad Tubes, but many dealers are selling them with

R. J. NOEL

Triad Tubes as standard equipment. It is the popularity of these sets which has done much to keep radio sales in the West at such an excellently high mark.

"Two minds with but a single thought," might well describe the two Noel Brothers, R. J. and G. N., of California, the single object in both minds being the putting over of Triad Radio Tubes in their respective territories. That they have been successful is easily evidenced in the recent enlargements made necessary in the Southern California organization, headed by R. J. Noel.

D. N. Marshank of the Marshank Sales Co., factory representative of the Pacent Electric Company, believes that the electric pick-up has far surpassed the most optimistic sales expectations held for it. The public saw in it a means for furnishing the widest possible variety of music and entertainment without any of the disadvantages of radio broadcasting.

D. N. MARSHANK

"The greatest talking point in favor of the pick-up is its quality of reproduction. Without question, the combination of a good pick-up, a good record, a good amplifier and loudspeaker will afford the finest, most natural and life-like reproduction available; free from static and man-made electrical interference.

"The talking movie is probably the greatest single argument the dealer can use in making the sale of an electric pick-up. Here he is approaching the customer on familiar ground and the suggestion that it is possible to have this sort of reproduction in the home invariably meets with instant approval."

An elderly gentleman came into our office the other day and showed us the tiniest radio sets we had ever seen. He made them by hand with the aid of a magnifying glass, being a watch maker by trade. A complete crystal set built into a wrist watch, and other tiny little crystal sets so small that the crystal in its mounting cup was not much larger than a pin head. And yet they worked. His name is Ezekiel Kan, and his shop is in the Stack Bldg., at 228 West 4th street, Los Angeles. He is a specialist on complicated watch mechanisms, and makes these miniature working radio sets as a hobby.

Weekly Review of Radio News-Thought and Opinion

A SHOT AT HENDERSON

Perhaps the Louisiana House of Representatives is gunning for W. K. Henderson, operator of Station KWKH, Shreveport, and perhaps not. But, any rate, the legislators have passed a law "to prohibit slander over, through, or by means of what is commonly known as the radio."

The bill provides a penalty of a fine of not more than $100 or imprisonment in jail for not more than 30 days, or both. California was the first state to enact a radio slander law.

RADIO COMMISSION MOVES

Although the mid-summer, especially in Washington, is not the time most people choose for moving, the Federal Radio Commission has transferred all its offices, personal, and equipment from the Interior Department to the National Press Building.

The Commission has been in cramped quarters for sometime. In its new location it will occupy an entire floor, and all of its agencies will be connected instead of being scattered as in its former home.

The Commission began its career in the Department of Commerce and remained there from March 15, 1927, when it moved into the Interior Department building.

OVERDOSE OF ADVERTISING

Declaring that radio is intended for a higher use than now made of it, Judge Ira E. Robinson, Federal Radio Commissioner, declared in a recent address before the Institute for Education by Radio at Columbus, O., that listeners "are becoming sick of commercial advertising given them hourly.

"Auctioneering speeches, sales talks, price quoting, and the like have become so prevalent that the very excess of the same will do good in reminding the people of radio's real province and worth," he said.

LITTLE RADIO LEGISLATION PASSED BY CONGRESS

The tumult and the shouting over alleged radio trusts and monopolies and injustices to certain States and sections by the Federal Radio Commission heard frequently in the halls of both the House of Representatives and the Senate during the last seven months have died down until next December.

A survey of the legislative activity in radio during the past congressional session reveals little in the way of accomplishment, despite the fact that many bills were launched and a prolonged hearing on radio communications was conducted by the Senate Committee on Interstate Commerce.

Probably the most significant achievement of either branch of the national legislature was the inquiry and subsequent demands made upon the Department of Justice by certain Senators that led to the filing of an anti-trust suit against the Radio Corporation of America and its affiliated companies in the Federal District Court at Wilmington, Del.

LICENSES EXTENDED AGAIN

All broadcasting stations which filed applications for renewals of licenses have been given an extended life of the customary ninety days beginning August 1.

The Federal Radio Commission made a blanket extension of all stations except three which are operating on channels prescribed by the Court of Appeals of the District Columbia following appeals in the recent reallocation proposal that is still in litigation.

STUDIO NEWS

Saturday evenings at 7:15 over KECA ance Valentine, whose picture appears this week's cover, sings the part of 'he Puritas Skipper" on the program the California Consolidated Water ompany. Each week "The Skipper d His Parrot" take the audience on ngful adventures before the mast on e water ways to health. In the comratively short time that this rollickg program has been on the air, forerly over KFI on Mondays, it has won amazingly large audience, probably e to its originality and the fact that lentine's rich voice is so admirably ited to the sea songs which are fered. Note the flattering attention en by the parrot.

Not content with a Yehudi Menuhin d a Riggiero Ricci as prodigies of e violin, California is now producg an entire orchestra of one hundred ildren! It's happening at KNX, Holvood, and the orchestra consists of s ranging from 2¼ to 6 years of age. nito Mussolini, dictator of Italy, has itten that he is publicizing the orestra of tiny ones in the newspapers Rome, and the secretary of the King Norway has written requesting an tographed photograph of the group his Majesty. The man responsible this orchestra is Professor Karl ldrem, and KNX through "Big Broth-Ken" is fortunate in having Moldrem the task. This unique orchestra is en heard on Big Brother's hour ev- evening at 5:15.

'he following is the political speech npaign schedule for the week of July August 2: The National Broadcast- Company presents Governor Young Monday night at 7:15 through KGO, 'I and KFSD. Wednesday night the ne speaker at 7:45 through KGO and I. Friday night at 7:15 Mayor James lph, Jr. will tell why he will make a d Governor, over KFI, KGO and SD, and on Wednesday at 8 p. m. he l talk from KTM. KHJ and KFRC have scheduled Mayor Rolph from KFRC on Monday, July 28th, at 7:30. During the S. & W. Forum, Tuesday at 8:30, Governor Young is scheduled to speak, although this is not definite at this writing. Wednesday over the above stations Buron Fitts will speak at 7 p. m.

No matter what your taste in entertainment is, you are bound to be entertained at least once during KHJ's Review, which has been extended to an hour, 7 to 8, on Saturday nights. The program presents the cream of the week's entertainment all in one bottle.

The Banjo Boys, well known to a large audience in Los Angeles and vicinity, have changed the hour of their program from afternoon time to 9:30 p. m. every night, including Sunday, over KMTR, when they are heard in the same patter, songs, banjo tunes and good-humored remarks about everybody and everything.

The Westlake String Ensemble over KMTR every day except Sunday at 11 a. m., furnishes a program of semi-classical as well as popular ballad selections—a pleasant interlude.

For listeners who have been touring Southern California with Seymour Hastings over several local stations, the following revised schedule will enable you to continue these enjoyable trips without missing a one. KFI, Tuesday and Friday, 12:30 to 1 p. m.; KGER, Tuesday and Friday, 3:15-3:45 p. m.; KHJ, Wednesday, 5 to 5:30.

To cheer up sleepy Sunday evenings, KFVD, in Culver City, is offering an hour and a half of pep—Radio on Parade. There is to be quite an array of well-known radio and talking picture talent, representing many types of entertainment. Tune in to KFVD on Sunday evening at 9:30 and begin the week with a smile.

New Concern Distributes Bosch

Formation of Collins-Lane Co., to be Southern California distributors of Bosch radio products, was announced this week. The new distributors are already actively engaged in merchandising the Bosch line, which includes motor car radio and motor boat radio, as well as the household sets.

The new company is headed by Wilbur H. Collins, for five years California distributor for Kelvinator. The Collins-Kelvinator Company is the largest distributor of Kelvinator in the country and has led in sales during the past five years.

Sales and promotion will be under the management of George Lane, widely known to the radio trade through ten years of merchandising experience. He was, until the formation of Collins-Lane Co., in charge of Southern California sales for American Bosch Magneto Corporation.

The new company brings to the radio field a wealth of experience and a financial strength comparable with any in the West.

Besides the men mentioned above, the personnel includes R. H. Collins and L. D. Robertson, both identified with the Collins-Kelvinator Company and other distributing organizations.

R. H. Collins was formerly sales manager for Buick Motor Company and was director in General Motors. Later he was president of the Cadillac Company, and on his retirement, came to the West with his three sons to embark upon distribution activities in the automotive and electrical fields.

Wilbur H. Collins has been prominent in the distributor field in Los Angeles for seven years, five of which he has headed the Kelvinator distribution company. Previous to that association, he was Chrysler distributor for Chicago, and has been in the distribution end of business for more than twenty years.

Ten years of radio merchandising stand behind George Lane, who in 1920 opened the radio department of Barker Brothers, coming to that position from six years' experience as a wireless operator on board various ships.

In 1923, Lane was named Pacific Coast manager for the Colin B. Kennedy Corporation, and held this position for three years, when he accepted a managerial position with John G. Rapp, Kolster and Crosley distributors.

In 1927, Lane became Southern California representative for the manufacturers of Bosch Radio, and his present connection serves to carry on a brilliant record in radio merchandising.

Simultaneous with the announcement of the new company and its appointment as Bosch distributors, came the announcement of a special dealer preview of the new Bosch radio line. Wide enthusiasm has been registered for the new Bosch Radio models, which, the new distributors say, include every refinement now claimed as a part of modern radio.

The sales staff includes some of the best known men in radio merchandising who have been organized as a "flying squadron" to hasten the introduction of dealers to the new and phenomenal Bosch line.

Included in the sales organization are R. E. Farra, C. D. Tanner, T. A. Churchill, J. W. Duckworth and R. E. Tarney.

Engineering and service departments will be under the supervision of Tommy Poulsen, who has been familiar with Bosch engineered sets in the past.

Dealers were invited to a special three-day preview on Monday, Tuesday and Wednesday of this week, and many of them expressed the belief that the new Bosch will be the outstanding radio receiver this year.

Lane Predicts Better Business

That high-grade radio merchandise is going to enjoy an excellent year's business was the statement this week of George Lane of Collins-Lane Co., newly appointed distributors in Southern California for Bosch Radio Products.

"There are three important factors in the radio situation today," said Mr. Lane. "One of these is the general attitude of the public, another is the situation of dealers, and the third has to do with condition of business.

"The public generally is alert to values in radio. Following the chaos which hit the radio business last season, the general public has become wary of instability, lack of quality, poor radio investment, and inferior performance. For this reason I believe only superlative merchandise has a chance to be outstanding this season.

"The dealers who pulled through the tough season we have just witnessed are strong, smart and disposed to be extremely cautious as to the number of lines they will represent, and the type of merchandise they will carry. This again points to success for better grade merchandise, provided proper assistance is given the retailer by his distributor. Dealers naturally look to profits. The radio lines which succeed this year must pay profits.

"The general situation of business is constantly improving. We have information that all the large associations of business concerns in Southern California are preparing for a good selling season between now and January 1. Everything points to better business not later than August or September.

"Surveys made for us indicate that department stores are actively engaged in outlining large promotion efforts during the final six months of the year, and the department store is an excellent index as to sales possibilities.

"All of these things are encouraging to us as Bosch radio distributors. We feel that there is every reason for optimism and the belief that business is going to be good.

"The new de luxe Bosch radio is an outstanding set. It is the only one we have seen which combines all the modern improvements and refinements in one reeciver.

"The new Bosch has tone selector, volume control, electric meter tuning, speaker mute, and many other special Bosch features.

"One of the most interesting developments is custom-tuning. This means that every Bosch set will be individually balanced to the home wherein it plays, and will be tuned to the aerial and ground set-up. This means, of course, that the new de luxe Bosch will establish unusual performance records," concluded Lane.

Lafount to Visit Small Stations

Declaring that satisfactory operation of small broadcasting stations is just as important as that of high power broadcasters, Radio Commissioner Harold A. Lafount will leave Washington July 23 on a tour of inspection of smaller radio plants in the Western area between the Mississippi River and the Pacific Coast. He will not return until the middle of August.

Most of the area included in Commissioner Lafount's itinerary has never before been visited by an administrative radio official. The tour will also include the site of Boulder Dam so that the radio needs of the horde of workers and their families during the next seven years of construction may be determined.

Commissioner Lafount's itinerary follows: Leaving Washington July 23, returning August 15: Cheyenne, Wyo., July 25; Laramie, Wyo., July 26; Salt Lake City, Utah, July 28; Ogden, Utah, July 29; Pocatello, Idaho, July 30; Boise, Idaho, July 31; Twin Falls, Idaho, Aug. 1; Reno, Nev., Aug. 2; Las Vegas and Boulder Dam, Nev., Aug. 4; Prescott, Ariz., Aug. 5; Jerome, Ariz., Aug. 6; Flagstaff, Ariz., Aug. 6; Albuquerque, N. Mex., Aug. 7; Raton, N. Mex., Aug. 8; Trinidad, Colo., Aug. 9; Kansas City, Mo., Aug. 11; St. Louis, Mo., Aug. 13.

PACENT

Electric Pickup Booster

HUNDREDS of owners of certain popular model radio receivers have found that their sets give admirable radio reproduction but do not give the desired volume from records played electrically. These receivers need only the addition of a booster stage to give wonderful volume and quality from phonograph records.

Here is a compact, inexpensive unit for use with radio sets having a power detector and one stage of audio, that gives a tremendous boost to pickup volume without distortion.

Can be connected by anyone in two minutes. Write for literature.

Quantity, Quality or Both?

By K. G. Ormiston

Judge Eugene O. Sykes, vice-chairman of the Federal Radio Commission was in Los Angeles from July 16 to 21, during which time he held official hearings pertaining to certain short-wave stations and channels, and informally interviewed the local broadcasters, complaining listeners, and applicants for new stations. He is returning to Washington, via San Francisco, Denver, and his home in Mississippi.

As is usual, most of the broadcasters had a bad attack of the "gimmies," and endeavored to convince the Judge that they should have more power, more time, better frequencies, etc. A committee of listeners contended that they could not get Amos 'n' Andy in their locality, and wanted something done about it. Another group believed that their town should have a radio station, as the summertime service from existing stations is poor.

We do not know just what general impression of our radio conditions the Judge took away with him. We know that he is of the opinion that we have too many stations, and that in the survival of the fittest and the elimination of the weak, the slogan of the Commission (and the Law), "public interest, convenience, or necessity," will automatically be the governing factor.

We do not agree with Judge Sykes in his belief that we have too much broadcasting in Southern California. We take exception to the QUALITY, and not the QUANTITY. We haven't too much broadcasting, but we have too much POOR broadcasting. We feel that Southern California should be permitted to retain all of its present facilities,—channels, power and time. We believe that some of these facilities can be put to much better use in the public welfare than at present. We agree with the Judge that some of our present stations have no business on the air, but in their elimination, we do not want to lose radio units which they represent. We want them replaced with stations that will render a worthwhile public service. If all of our present stations were doing a first-class job, you would never hear the statement that we have too much broadcasting. If every one of the present carriers brought us a good program of interest and entertainment to a large number of people, each station would have justified its existence, and there would be no complaints. It is a pity that any one of these few and priceless channels should be assigned to a station which does not serve the public to the maximum, commensurate with the time and power available. But in our anxiety to eliminate it, let us not lose the service which that channel is capable of rendering in proper hands. If a franchised street car company gave us poor service on a certain street, we would not tear up the tracks and have NO service on that street. We would franchise someone who WOULD give good service.

Our second firm conviction is that no station located in the metropolitan area of Los Angeles should be permitted to operate with more than 1000 watts power. Stations of 5000 watts belong out in the country. When KNX increased its power to 5000 watts, they moved out in accord with the Commission's instructions. KFI has operated with 5000 watts in the heart of the city, with the understanding that it was but temporary, pending the erection of their 50,000-watt station at an outside point. With the removal of KFI, we believe that the Commission should insist that any station which obtains a power assignment over 1000 watts, must locate outside the metropolitan area.

We believe in high power, because more useful power expended in each channel means more listeners reached. And high power is necessary if we are to serve the population of the small towns and farms which are at a distance from major stations. BUT, wherever high power is used, it is essential that we do not blanket a vast city population within a few miles of the station.

General Motors Radio Dealers Meet

When the General Motors Radio Corporation called a dealer meeting, the dealers responded 100 per cent, as every dealer was in from Arizona and Southern California. The hottest day of the summer was picked to hold the meeting, July 14th, and in spite of the heat and in spite of the fact that the whole meeting was devoted entirely to business the dealers were well pleased.

The remarks from some of the prominent dealers were as follows:

Mr. Charleston Dow, president Fitzgerald Music Company, "I am not generally in favor of such dealer meetings but this one was a revelation to me. It was the best dealer meeting I have ever attended."

Mr. Roger Howell, owner and manager of Reliable Radio Shop, Long Beach, California. "I have attended a lot of dealer meetings but I have never been to one that held my interest so thoroughly and which was devoted so entirely to business."

Mr. C. W. Mills, of Bauersfeld and Mills, Phoenix, Arizona. "The more I think of this, the more I realize that we have just been thru a wonderful session."

The meeting as a whole was devoted almost in its entirety to the presentation of the General Motors plan of "Management and Compensation of Retail Salesmen." By the use of this plan they can become expert sales managers and conduct their business in a thorough business-like manner knowing that each step that they are taking is one which fits them for the moremost position in the Radio industry today.

The dealers present decided that it would be advisable to go into the Los Angeles Radio Show and so General Motors Radio will be represented at the "Radio Show Beautiful" with representative dealers in attendance.

Don Wallace, Zone Manager, Addressing Dealers

Mr. L. E. Martin, factory production engineer told of factory straight line production and the General Motors "No Overhead" methods of operation.

Mr. George E. Dyna, assistant to the Zone Manager made all arrangements for the meeting and the dealers were unanimous in their opinion that the arrangements, orderliness and fine attention to details thruout the entire meeting were typical of the General Motors way of doing things.

General Motors Acceptance Corporation was represented by Mr. A. E. Vogt who explained the GMAC plan both wholesale and retail.

Regional Manager, Mr. L. C. Warner told of the background behind the General Motors Radio Corporation factory and how General Motors have been surveying the field for the past three years and have now decided that the time is

(Continued on Page 36)

The New Brunswick Radio

By K. G. O.

It is particularly gratifying to us that Warner Brothers was the first motion picture producer to promote synchronous sound reproduction, while other producers laughed at the new innovation. It is equally gratifying that Warner Brothers has entered the radio receiver business in purchasing Brunswick.

Our personal interest is based on the fact that more than five years ago we were instrumental in interesting Sam and Jack Warner in radio broadcasting. In fact, we engineered and installed the original KFWB in the studios on Sunset Boulevard early in 1925. It was their interest in radio and their contact thus established with the Western Electric Company which caused them to lend a responsive ear to the fantastic story of Vitaphone, when others scoffed. And now, because they have long been "radio minded," we find them in the radio business, manufacturing a line of remarkable receivers under the famous name of Brunswick.

The Brunswick chassis is particularly interesting to the technically minded for the reason that the designing engineers have departed from the worn-out paths of the plagiarists and have injected some originality into the set. The volume control, for example, is new and yet absurdly simple. It consists of a tiny variable condenser which controls the energy reaching the grid of the second RF stage. And having no sliding contact of any description, it must forever remain noiseless in operation!

There are no transformers in the radio circuits, other than the input to the dynamic speaker and the power transformer in the power supply unit. The output stage consists of two '45 type power tubes, but they are connected in parallel, and not in push-pull. This increases the handling capacity. The screen-grid power detector which feeds the output stage through resistance coupling in conjunction with a filter, operates with a higher plate voltage than the usual design and has a greater distortionless output.

The controls are mounted concentrically, so that the set is turned on or off, tuned, set for local or distance reception, and the volume regulated without moving the hand from the one central control knob. A small secondary knob operates the tone control whereby the high register may be suppressed in order to emphasize the bass notes or to reduce static and electrical interference.

The transparent dial strip carrying the kilocycle numbers moves by the escutcheon window horizontally, and space is available to write in the station call letters with a pencil. This is a new and very attractive dial arrangement.

The chassis is finished with the precision and nicety of a high-grade scientific instrument. The "tin-can" type of construction, to which we have been more or less accustomed, is utterly absent in the Brunswick.

We borrowed one of the new sets from Les Taufenbach of Western Radio, Inc., the Southern California and Arizona distributors, for a few days and studied its performance carefully. And while the midget manufacturers have used up all of the descriptive possibilities in eulogizing their products and have left no adjectives for the really fine radio receivers, a more obvious endorsement is the fact that the performance of the Brunswick has so impressed 118 leading radio merchants that they are banking on it to be one of the best sellers this season. We personally found it to be a very satisfactory receiver from every standpoint. It is a particularly nice receiver to handle. The local-distance switching arrangement permits reducing the volume on powerful locals,—the volume control is smooth and uniform. The sensitivity, selectivity and tone quality are as unusual and advanced as all of the other outstanding features of the set.

10:00 p. m.—NBC, Spotlight Review.

James Regan and a capable cast will present "Circumstantial Evidence" to KFI listeners on Thursday evening at 8:45. Radio dramas are gaining in popularity and are indeed a welcome relief to an audience surfeited with musical programs. Stuart Buchanan's dramatic presentations over KHJ are among the finest bits of radio work that the Studio Editor has heard. Let's hear more from Mr. Buchanan.

Have you been numbered yet? Jack e Bell Boy, piloting the all-night pro- ram over KMIC from 12:30 until 6 a. . every morning, has the unique plan ' allotting a number to each requestee ; he calls in for a selection on the oadcast from 3 to 6 a. m., called the Dawn Patrol." The names and num- ers are kept in a book by Jack and fter the first call, numbers instead ' names are used. The early hours om 12:30 to 2:30 a. m. are devoted miscellaneous requests and from :30 until 3 a. m. the program is known ; "The Three Bums" hour, about hich there is a certain mystery which ay or may not be solved by listening ı.

Jack Bell was a musician by trade ntil Fate guided him into the techni- al and announcing field of radio. His personality and ability to be technician, announcer and telephone operator is winning him scores of friends and listeners on this program.

The Columbia Broadcasting Company promises listeners several features of unusual interest. On August 8th be prepared to hear Colonel Charles Lindbergh, shyest of all national heroes, speak to the world on International Aviation. The talk will originate in the studios of WABC and be broadcast to the world over an international hook-up. The time is from 6 to 6:15 p. m., P. S. T. The second outstanding program will be the presentation of Sir Oliver Lodge speaking from London, England, on Sunday, July 27th, during the International Broadcast at 8:30 a. m. over the CBS System. Consult your local CBS station program.

The essential features of these programs are identical with those sent us by the stations

G. M. Radio Dealers Meet

(Continued from Page 20)

ripe for General Motors to go into Radio to be a leader as they have with 75 other products.

The Keynote of the entire meeting was based on the two General Motors Slogans: "We are Building an Institution in Radio," and "Building for the Future by Building Right."

Don C. Wallace, zone manager, conducted the meeting. Wallace is deserving of a great amount of credit for the showing he has made in the management of his district.

KGER's news broadcast has been changed from 9 p. m. every night to 8:55 p. m., and Sally's Home Hour over the same station has been lengthened to a full hour every week day at 9 a. m.

Little, but oh my! is an apt descrip-
on of the compact new "Midget" radio
ets which have taken the public by
:orm.

"Scarcely bigger than a regulation
ɔot-ball, the 'Midget' is nevertheless a
ɔmplete full-fledged radio in every re-

Lila Lee and Her Midget

ɔect, simply condensed in size," points
ut H. R. Curtiss of the company bear-
ıg his name, California distributors for
ıe Jackson-Bell Midget Radio. This
opular little set is manufactured in
os Angeles.

"How often have you wished for mu-
c or entertainment or companionship
hen such a radio set would have filled
ıe bill exactly? The 'Midget' therefore
the ideal set for the small apartment,
ıe hotel room, the summer cabin, the
ıudent's room, or as a second auxiliary
et in the home.

"Because of the low price and easy
ırchase terms, the 'Midget' fills a real
place in radio, providing thousands of people with a convenient, economical means of real radio enjoyment who otherwise would have to forego this pleasure, companionship, and sustaining influence. If you have not seen or heard one of these mavelous 'Midgets,' a surprise and delightful experience awaits you at your nearest radio dealer."

W. C. (Bill) Hitt, the smiling factory representative for Aerovox products, has returned from a trip throughout the northern territory. He brought back his happy disposition, so things can be so bad in those regions to the north.

Mr. W. Goodwin, general sales manager for the Crowe Name Plate and Manufacturing Company, of Chicago, announced the appointment this last week of Mr. W. B. Knight of 741 South Kohler Street, Los Angeles, as California representative for his company.

W. B. Knight

The Crowe Name Plate and Manufacturing Company are pioneer manufacturers of escutcheon name plates, dials, etc. Their products are widely used by both local and national manufacturers.

Mr. Goodwin is spending several weeks in Southern California, and remarked that he is more than pleased with the amount of business which they are enjoying in this state.

Weekly Review of Radio News-Thought and Opinion

RADIO POLICE SURVEY PROGRAMS

The radio police are making a national survey of broadcasting programs and the service of stations to the public at the request of the Federal Radio Commission. Every one of the 600 odd stations in the country will be checked and tabulated according to its worth to the area which it covers.

Empowered by the radio law of 1927 only to order a station off the air when it does not serve "public interest, convenience and necessity," the Radio Commission wants to be certain that all broadcasters are providing this service, particularly in view of the congestion of stations in the broadcast spectrum.

The survey is being made by the nine Federal Radio Supervisors of the Radio Division of the Department of Commerce, under the direction of William D. Terrell, Chief of the Division, and their assistants. Because of the size of the task and the plan to make the check in each of the four seasons, the canvass will take at least a year.

There will be something doing if the Federal Radio Commission ever makes public the results of the classification of radio stations as shown by the survey. One observer, expressing skepticism with regard to the survey, remarked that the radio supervisors in endeavoring to appraise a station would perhaps encounter as many opinions as persons talked with.

Yet, almost any child on the street in any of the cities could tell the relative standing of the radio stations. Even in cities like New York, Chicago and others it would not be difficult to secure a fairly accurate estimate of which stations were the most popular.

Nevertheless, when Uncle Sam attempts to evaluate the stations officially, he will surely be treading upon dangerous ground.

LAFOUNT INSPECTS MONITOR STATION

The central monitoring station, or the police headquarters of the air, which is nearing completion at Grand Island, Neb., was inspected last week by Harold A. Lafount on behalf of the Federal Radio Commission.

This station, built in accordance with plans drawn by the Navy department and under the direction of the Radio division of the Department of Commerce, will be put into operation about September 1st. It will keep check on the 20,000 government controlled radio stations throughout the world, warning them when they are off their assigned frequency.

Mr. Lafount made an inspection of the station to learn the necessary steps to be taken by the Radio Commission so as to obtain daily reports regarding the operation of stations under its jurisdiction. He conferred with Benjamin Wolfe, the superintendent, who is virtually the police chief of the air.

Secondary monitoring stations to operate in conjunction with the Grand Island "primary" station are located in the various radio districts throughout the country. On the Pacific Coast, the Portland secondary montoring station, under the direction of Edwin Lovejoy, radio supervisor of the Seventh district, is completed and ready to be put into operation.

The San Francisco and Los Angeles Stations will soon be ready also. The Los Angeles monitoring station will be located on Point Firmin, and here precision equipment, operated by experts under the direction of James Chapple, local radio inspector for the Department of Commerce, will provide an absolutely accurate frequency check of all stations.

The New BOSCH SUPER SCREEN GRID RADIO

Illustrated here is the new de luxe Bosch Radio, Model D. Gorgeously cabineted in walnut, and with the new Bosch de luxe chassis. Priced at $199.50. (Tubes, $24.60.)

There's no doubt about it!

You must see and hear the new Bosch super screen grid Radio to realize how completely these new models have revolutionized the standards of modern radio reception.

Two entirely new receivers in four beautiful cabinet designs.

The new Bosch Standard, 8 tubes (4 screen grid), simplified and improved to meet the most exacting requirements. Reasonably priced at $148.50 and $163.50. (Tubes, $21.30.)

The new Bosch de Luxe, the only radio combining in *one* receiver *all* the refinements now heralded as modern—plus many Bosch features not found in any other make. Priced at $199.50 and $257.50. (Tubes, $24.60.)

BOSCH RADIO

... The New BOSCH SUPER SCREEN GRID RADIO ...

Pounding leather straight from the cow country of Arizona, Horse Fly and his Wranglers (on this week's cover) loped into town for a two weeks' vacation. Perhaps they listened in and heard some of the pseudo-cowboys trilling their stuff over the local stations and thought the public deserved to know what cowboys really sound like. At any rate, KNX lassoed the sextette and we now have authentic cowboy songs, solo and ensemble. The white-faced horse carries Horse Fly, the boss of the outfit, and the others answer to the names of Nubbin, Iron-Tail, Shorty, Sleepy, and Slicker. See KNX's program for a schedule of their hours on the air, and then be sure to tune in.

Colonel Charles Augustus Lindbergh, whose consistent dodging of all publicity has made his rare appearances the more valuable, will talk from the studios of WABC over an international hook-up of the Columbia Broadcasting Company System on Friday night, August 8th, from 6:00 to 6:15 p. m. The subject of the short address will be "International Aviation," of which Colonel Lindbergh knows about all there is to know. Tune in your local Columbia station for this outstanding feature of the week.

Dove Irene Kilgore, Oakland's pretty, petite Irish singing colleen, who in 1928 won nation-wide recognition as one of the best voices in America, will be heard in a special broadcast over KPO Sunday evening, August 10th, 6:15 to 6:30 o'clock. Miss Kilgore, who won second place in the 1928 National Radio Audition conducted by the Atwater Kent Foundation, has a coloratura soprano voice of exquisite beauty and was selected by judges of the contest as the best of approximately 150,000 contestants.

Helene Smith, who has been heard over the radio since 1924, is now giving a series of 1:15 p. m. hour programs, except Wednesdays, over KGER in the form of a request recital of popular numbers.

Walter Kelsey is very much pleased with his new job as assistant musical director of KFRC. With so much directing, both in rehearsals and on the air, Walter hasn't as much time for singing and playing. He plays half a dozen instruments.

Bill Sharples and his "gang" of merrymakers have been enthusiastically welcomed by KTM fans since their coming bag and baggage to that station last week. They are now a daily feature over KTM from 7 to 9 in the morning, and also are appearing on that station every Wednesday night from 8 to 9 o'clock. The "gang" consists of Grandma and Grandpa Sears, Hal Lieberman, Chester Watson, Ralph Little, Archie Wallace, Charles Cronkhite, John Michelmore, Bunola Kay, Caroline Hermann, Leo Mannis, Hallie Campbell, Preston Lodwick and Clarence Muse, not forgetting to mention the one and only Bill Sharples, the New Idea Man himself.

The "Pennant Collegians Quartet" will be heard over KMTR Thursday evening at 6:30 o'clock. Four young men very popular at the University of Southern California, who have ventured out into the business world as exclusive artists over KMTR, are fast gaining favor. Their modern arrangements of popular melodies which they made famous on the campus are equally as popular over the air.

Meredith Wilson, KFRC's musical director, Robert Olson and "Mac" have collaborated on a new song called "In the Land Where the Lost Dreams Go." They worked upon the theory that a song must have at least three names on it to be a success. It's a deep secret which of the trio really wrote the song. At any rate, "In the Land Where Lost Dreams Go" will be heard on KFRC quite often in the future.

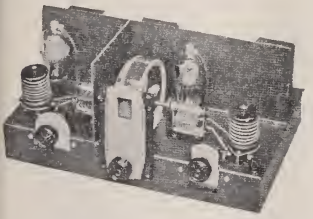
New National A. C. Short Wave Receiver

The National Company of Malden, Mass., has perfected an A. C. short wave receiver that satisfactorily meets the requirements of ideal S. W. reception. It is humless, has single-dial control, gives loud speaker reception from foreign broadcast stations, delivers good tone quality, is non-critical in tuning and is very neat in appearance.

The set was developed by James Millen, chief engineer of the National Company, in collaboration with Robert S. Kruse. Mr. Kruse is our leading authority in the design of short wave equipment. Nearly a year of work was devoted to the development of the set, particular attention being given the problem of hum elimination. Since it is often desirable to use head phones on the short wave set, when foreign stations are very weak, it is essential that the degree of A. C. hum present be practically nil. Furthermore, the problems involved in the elimination of hum are far greater in a short wave receiver than in a set operating over the regular broadcast band of frequencies.



Front of chassis, showing RF and detector stages. Three audio tubes and transformers are behind shield. Four sets of plug-in coils cover from 14 to 115 meters.

When dealing with short waves, it is not so much the diagram which counts, but the manner in which the circuit is used. Little things, like the order in which the tube heaters are wired, the insulation of the bearings in the variable condensers, the type of material used in the coil forms, and so on without end, is what makes the difference between successful design and one which is a failure.

The circuit itself comprises a tuned screen-grid radio-frequency stage, in which provision has been made, if desired, for the use of the heater type pentode tube, where slight additional gain at the expense of selectivity is wanted; a screen-grid regenerative detector; a two-stage transformer-coupled audio amplifier, employing push-pull in the second stage and with provision for plugging 'phones into the output of the first stage when desired; and a separate power pack especially designed for short-wave work.

The interstage coupling transformers are of new and special design, also the variable tuning condensers. The power unit is shielded in a steel case and is to be mounted at least three feet from the set proper. The added sensitivity of the screen grid detector over the 27 type makes possible the use of less regeneration for the same signal strength, hence an improvement in tone quality. The audio channel with the push-pull output stage also provides a high type of tone fidelity not found heretofore in short wave receivers. Single dial control is another advantage, and the use of the projection type of dial provides an accuracy in logging together with a very attractive appearance.

The National products, including this latest development in A. C. short wave receivers, are stocked in Los Angeles by the Radio Supply Company, 912 South Broadway.

Name Your Favorite Stations in Radio Doings Popularity Survey

The Federal Radio Commission is desirous of ascertaining the comparative popularity of broadcast stations throughout the country, as such information will be invaluable to them in deciding the degree to which each promotes the public interest, convenience and necessity.

Every station, when presenting a case before the Commission in Washington, naturally produces voluminous evidence to support the contention that it has a vast audience and is extremely important to the public welfare. Stations obtain letters from mayors, civic organizations, clubs, etc., attesting to their merit. They offer as evidence the fact that they appear frequently among the "best bets" in the newspaper radio pages. They boast of the number of phone calls received during a request program. They get the support of Congressmen or Senators. They pull every possible political string. Some of them maintain attorneys in Washington the year around, who keep in constant touch with the Commissioners.

And all of this means nothing. If it meant anything, the Commission would be forced to believe that every station is vitally necessary to the public welfare—that every one of them has a great and appreciative audience. As a matter of fact, some of them are adequately fulfilling the obligation placed upon them when licensed to broadcast, some of them are doing a mediocre job and many are a total loss as far as any real benefit to the public is concerned. The Commission knows this, of course. But with all stations clamoring for more power, more time, or better channels, the Commission must in some manner apply a measuring stick and determine for itself the relative merit of the stations. It can then intelligently cancel the licenses of the poorer ones, and grant the applications of the worthy.

Toward this end, the Commission has requested the assistance of the Radio Division of the Department of Commerce. The Division has instructed its radio supervisors and inspectors to make a survey. These men will compile data from every available source relative to the popularity of the stations in their districts. And it is the popularity with the listening public that is important, not the opinion of public officials or a few organizations, or the results of any survey made under conditions where prejudice may be present.

A survey obtained directly from the listening public in a manner precluding prejudice would naturally be the most valuable. Radio Doings believes that its vast family of readers is representative of the total radio audience of Southern California, and that they will gladly cooperate in assisting the radio supervisors in compiling this information for the Federal Radio Commission.

We feel that the results of a survey made by asking our readers to note their opinions and suggestions on the back of this page and mail to us, will provide something definite and comprehensive for the guidance of the Radio Inspector and the Commission. We will see that all of the filled-in and returned forms reach James Chapple, the radio inspector of the Department of Commerce in Southern California. In the interests of your own enjoyment of radio and the protection of your investment therein, fill out the reverse side of this page and mail to us this week. Be sure to write your name and address at the bottom of the page, otherwise your vote will not be counted.

RADIO DOINGS POPULARITY SURVEY

Below are listed twenty of the braodcast stations of Southern California, arranged in the order in which they tune in on your dial. Please indicate your opinion of the relative merit of the stations by numbering them in the order of their value to you. For example, if you like KHJ best of all, place the number "1" in the space provided, and then put "2" after your second choice, "3" for your third, etc. Stations that you do not listen to or have no interest in, just leave blank. A space is provided for your comments also. If you believe that a certain station should have more power, or more time, or that there is interference from some other station, or that any station should be eliminated, etc., just write it in the column provided for "Comments" after the call letters of the station.

Please fill out carefully and thoughtfully, tear out this whole page and mail to RADIO DOINGS, 407 East Pico St., Los Angeles, Calif.

Stations Scrap for Highest Power

The Federal Radio Commission will have to exercise the wisdom of Solomon this fall in determining which of the numerous applicants for 50,000 watts are entitled to the awards.

Since the recent issuance of a General Order limiting to 20 the cleared channels which might be used by the maximum power broadcasters, the filing of applications for authority to install 50,000-watt transmitters have increased by leaps and bounds. More than a dozen such applications have been recorded within the last few weeks, and a total of 20 are now on file awaiting hearings.

Of the 51 stations assigned to the 40 cleared channels set aside for the exclusive use of high powered broadcasters, 35 either are licensed, hold construction permits, or have applications pending for 50,000 watts. All of the pending applications have been designated for hearing, along with any more that may be filed, this fall, when the commission reconvenes.

KNX and KFI of Los Angeles have construction permits for the maximum power. Providing the new stations are completed by the specified time, they will be automatically licensed.

11:00 p. m.—Tucker's Everstate Band.

E. R. Patterson, of the Patterson Radio Corporation, Los Angeles, made a "flying" trip to Chicago last week. Leaving Los Angeles early Sunday morning, he arrived in Chicago Monday morning. After a day of business in the Windy City, he departed Monday evening and was back in Los Angeles Tuesday evening. He missed only two business days from his office here, and yet spent a full day in Chicago and slept comfortably on Pullman cars both nights.

The Sylvania Tube Company of Emporium, Pa., is forging ahead by leaps and bounds, according to Mr. Wm. H. Cooke, 216 Laughlin Building, Long Beach, who is the California representative.

"The Sylvania engineers are putting forth every effort to attain the highest degree of quality obtainable. The factory is equipped with the latest type of machinery. The finest of materials go into the making of Sylvania tubes, so, all in all, we believe that we are producing one of the best and most durable tubes that is on the market," said Mr. Cooke.

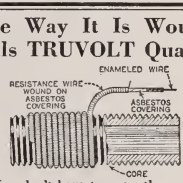
The Way It Is Wound Tells TRUVOLT Quality



You don't have to *guess* the quality of TRUVOLT Resistors. Their stamina has been *proved* in thousands of hard places. Nichrome resistance wire wound over an asbestos-covered copper core—then wound in turn on a fire-clay base. Cooler operation, more stable values and longer life. The exclusive sliding clip provides accurate, quick adjustment. All usual sizes.

Variable TRUVOLTS have the same construction, plus knob control. Last longer because of endwise travel of contact. 22 stock sizes. List price $2.50.

You can rely on Electrad Resistors for every radio and voltage control need.

Wire Dept. RD 82 for Data

175 Varick St., New York, N.Y.

ELECTRAD INC.

George Lane, General Manager of the Collins-Lane Company, of 1414 West 7th Street, Southern California distributors of Bosch Radio, has gathered

George Lane

around him a group of wholesale salesmen who might be classed as real "old timers" in the game.

T. H. Churchill, R. E. Tarney, C. D. Tanner, Ray Farra and J. W. Duckworth have all been in the radio industry from five to fifteen years.

This group, headed by Mr. Lane, should certainly bring success to the new company.

Announcement has been made by the Amrad Corporation of Medford Hillside, Mass., of the appointment of C. E. Flynn as Pacific Coast representative for the Mershon Division. Flynn is very well known to the Coast trade, having for a long time represented the Magnavox Company. And when Flynn starts out representing anything he doesn't fool with it! Reminds us of the story of the colored gent who carefully peeled a banana and then rammed it into his mouth in its entirety and disposed of it in one bite. His friend, looking on in amazement, remarked, "Boy, yuh sho do like bananas!" "Well," replied the first darkie, "I doesn't fool wif 'em!"

Mershon electrolytic puncture-proof condensers are used in a great many of the best known receivers from the eastern factories. These condensers have many decided advantages over the tinfoil and paper condensers. They provide sufficient capacity to the circuit for effective filtration in far less space and at a reasonable cost. They will continue to operate without interruption over a period of years, withstanding the shock of recurrent voltage surges without damage. They are puncture-proof.

The Amrad Corporation has published an excellent booklet covering the principles and construction of electrolytic condensers and their application to high-voltage filter circuits in radio receiver power converters and radio transmitters. It is free to those who address the company at Medford Hillside, Mass., and request a copy.

Weekly Review of Radio News-Thought and Opinion

THIRTY-ONE STATIONS MAY LOSE LICENSES

Thirty-one broadcasting stations have been bad and are in danger of being dismissed from the school of radio stations by the Superintendent, the Federal Radio Commission. Instead of being given the customary 90-day licenses on August 1, they have been awarded only temporary permits and have been cited for hearings before October 31, when the licenses expire.

While no announcement has been made of the specific charges against each statoin, pending the scheduling of the hearings, Ben S. Fisher, Assistant General Counsel, explained that the offenses are various.

Chief among them are frequency deviation, the use of excessive power, operating without license, operating without a licensed operator, failure to announce the use of phonograph records, and failure to announce call letters and station location every fifteen minutes. Some of the stations were cited merely because they appeared to be operating for private gain rather than in the public interest, he said.

All of the stations are comparatively small. Because of the congestion of broadcasters, it is likely that they will be taken off the air following the hearings in the early fall unless they present mighty strong defense.

The western stations in the list include KMPC, Beverly Hills, Calif.; KBPS, Portland, Ore.; KFQW, Seattle, Wash.; KGAR, Tucson, Ariz.; KVOA, Tucson, Ariz.

In the case of KMPC, we believe that its owners, the MacMillan Petroleum Corporation, backed by the University of Southern California, will be able to present a case which will insure the continuance of broadcasting.

NEW STATION PLANNED AT HAVANA

A new 50 kilowatt radio broadcasting station at Havana, Cuba, is to be erected by the Cuban Telephone Co., in conjunction with a large American broadcasting company and the Cuban Tourist Commission, according to a report received by the Department of Commerce.

The promoters believe that this new station would serve as a necessary radio link between the United States and South American countries. Expense of maintenance of the station would be about $140,000 a year.

SEES EDUCATION VIA RADIO SLIPPING

Unless educators of the country get together and formulate a future program respecting the allocation ot radio channels, the experiment of education via radio may be abandoned even before it is given a fair test, Armstrong Perry, of the Federal Office of Education, believes.

Pointing out that during the last six months 14 of the 77 educational broadcasting stations ceased operation, Mr. Perry said they were in danger of disappearing altogether. Lack of financing and want of technique in radio matters explain the failure of the educational stations, he said.

A sample of the television receivers, 1000 of which are now being regularly used in and around London, has just been received in New York. Baird, the inventor, is building a short-wave television station on the English coast with which he hopes to "look" across the Atlantic.

A photo-cell operates a camera at the Longchamps race track, near Paris, which takes a picture of the finish line just as the horses cross it.

LOS ANGELES

Let's Be Satisfied!

Frequently an irate listener writes that our broadcast structure is a mess, and suggests that England has the ideal system in licensing receivers and operating the BBC stations with the funds thus acquired. Here is the opinion of an English correspondent, writing from Bristol, England:

47 Robertson Road, Eastville,
Bristol, England.

Dear Sir:

The June 28th issue of Radio Doings is just to hand (through the kindness of Willis Werner, San Diego), and I was very interested in the letter from "W. W.," Riverside, Calif., deploring U. S. broadcast conditions.

What a joke! He (or she) is condemning the U. S. system whilst we at the same time are cursing ours! I should like to make "W. W." listen to our programs for the rest of his life and he would soon squeal for a change.

In your remarks you mention that we have a choice of only three programs. For 90 per cent of the time that three becomes two, for 3LO and 5GB take the same program. Think of it—a choice of only two programs! Those two programs are not entirely alternative, for the B. B. C. have a wonderful habit of making one program do for the two stations by sending them out on following nights.

We have about 12 hours of broadcasting on week days and 5¼ on Sundays. Dance music does not commence until 10:30 p. m. on the former and not at all on Sundays. The Sunday program consists of religious addresses, cantatas and other "uplift" matter reminiscent of the eighties.

No, "W. W.," be content with your lot, for you have a wonderful thing called "competition" which we haven't. How would you like to have a choice of only two grocery stores and both of them owned by the same firm?

Your stations have to fight and fight hard to keep their audiences. The B. B. C. have an assured annual income of approximately $5,000,000, whether they broadcast or not, for our license fees are paid, not to listen to the B. B. C., but to "maintain a wireless receiving station."

From personal experience I can honestly say that there is no comparison between English and American programs. J. SAUNDERS.

U. S. Wants Radio Engineers

The United States Civil Service Commission announces the following open competitive examinations: Senior Radio Engineer, $4,600 a year; Radio Engineer, $3,800 a year; Assistant Radio Engineer, $2,600 a year.

Applications for senior radio engineer, radio engineer and assistant radio engineer must be on file with the Civil Service Commission at Washington, D. C., not later than August 27, 1930.

The examinations are to fill vacancies occurring in the departmental service and in the field.

Competitors will not be required to report for examinaton at any place, but will be rated on their education, training, experience, and fitness.

Full information may be obtained from the United States Civil Service Commission at Washington, D. C., or from the Secretary of the United States Civil Service Board of Examiners at the post office or custom house in any city.

Not a Scratch Mars the Program

when Super-Tonatrol controls the volume. Special all-metal construction, new fused resistance element and floating silver contact. Dissipates five watts. 7 types, $2.40 and $3.50.

Complete with moisture-proof metal housing.

Showing fused resistance element and floating silver contact.

Also standard Tonatrols for battery receivers, $1.50 to $3.

ELECTRAD'S experience and specialization is your guarantee of volume control performance. *Write Dept. RD-816 for useful literature.*

ELECTRAD INC.

Watchtower Radio, sponsored by the International Bible Students' Association, have changed the time of the Thursday morning broadcast to Sunday afternoon, at 4:30, making three broadcasts each Sunday. Sunday, 9:00 a. m., to 10:00, and 4:30 to 5:00; also over KNX at 1:00 to 2:00.

KNX has secured the services of Eddie Holden, famous up and down the coast for his amusing character of Frank Watanabie, Japanese boy. On KFRC's Blue Monday Jamboree, Frank, his troubles and joys, was one of the high spots. Here in Southern California, we did not have the opportunity to hear Frank's tri-weekly programs over the San Francisco station and, consequently, appreciate the opportunity offered by KNX to hear Frank Watanabie every night except Sunday, from 6:15 to 7:00.

Dr. Ralph L. Power, one of the best known figures in Southern California radio world, is now directing the publicity for KGER in Long Beach. Since the granting of 1000 watts to this station, the staff has been enlarged considerably, and many plans completed, and many still under way for a bigger and better KGER.

Two new and interesting programs have been inaugurated at KMTR, which are creating much comment with the radio audience. They are the "Hollywood Sweepstakes," and "Howdy Songs With Happy Harry," at 10:30 p. m., every night except Thursday. Visitors are welcome at the studio to watch the actual running of the race; the radio audience is taken by mythical remote control to the "Radio Race Track," where the announcer gives a "neck by neck" description of the race.

This program is followed by "Howdy Songs With Happy Harry," singing a special verse to each listener-in who will write to him, asking for it.

Guy Lombardo and his Royal Canadians returned to KHJ and the Columbia chain with a brand new series of weekly programs sponsored by Robert Burns Panatela, beginning Monday, August 11, at 6 o'clock. One of the features of the new series will be the regular appearance of a mystery soloist who will be known as The Lady in the Smoke. There will be a male quartet specializing in college songs, each program being dedicated to a different American college.

A "Studio Frolic" on KMIC at 6:30 p. m. is a new feature presenting Rocky Bernard, tenor; Dare Sisters Duo in popular harmony songs and piano numbers; the well known Lani McIntyre and Harmony Hawaiians, and various special features from time to time.

Max Fisher and his music are being featured during this new weekly presentation which originates in NBC's Los Angeles studio, KFI. Hale and Derry, Leon Lucas, and various vocal combinations contributed to the initial program.

Ted Fiorita and his band became a regular Columbia feature recently.

Mr. Fiorita has one of the finest combination concert and show bands in America. He has had a noteworthy career as a bandmaster. For three years he was at the Edgewater Beach Hotel in Chicago, going from there to the Ambassador Hotel in Los Angeles. He will broadcast his programs over WABC and the Columbia network direct from the Hollywood Gardens in New York. Consult your local CBS program.

Studio News

When Heywood Broun, Columbia Broadcasting System air columnist, bade his radio audience "good-bye" with a deep voice, registering finality, he sent a complete nationwide radio network into chaos, caused the making of scores of telephone calls and the writing of innumerable letters, post cards and telegrams . Broun, for the first time in his radio career, had "put one over on himself."

Radio program schedules everywhere listed Heywood Broun for one more week before his vacation commenced. These schedules were correct. Yet this final "good-bye' 'from the lips of Broun startled listeners, station managers and newspapermen everywhere, and all immediately began querying the Columbia System.

The following Monday night at 11:15 p. m., E. D. S. T., Broun was back on the air to say that he guessed he was wrong and that despite the fact that he was ready . . . packed and everything . . . to leave for the mountains, he'd have to put it off for a week.

Broun's radio vacation began Sunday, August 3. He will be back on the air at the same time with his radio column Monday, August 25.

The New York City Police Department, representing a standing army of 19,000 men, is the chief contributor of plots and material for the Crime Prevention Detective melodramas which are broadcast each Monday by the National Broadcasting Company.

Arthur B. Reeve, noted writer of detective fiction, and Finis Farr, NBC continuity writer, are co-authors of the dramas. Before beginning their series the two writers took an intensive course of training at Police Headquarters under the tutelage of the department's most astute and experienced detectives. With the program in full swing the authors and the actors keep in contact with headquarters, frequently attend the headquarters morning lineup, and a member of the department has been detailed to search through the police archives for material suitable for the series.

The Crime Prevention series was conceived, not as radio entertainment, but to show how crime is prevented and to acquaint the layman with police methods of defending society against the machinations of tricksters, racketeers and other criminals.

NBC officials asked Arthur B. Reeve to supply the dramas because of his familiarity with the Police Department and his recognized ability as a story writer. He is the creator of Craig Kennedy, the scientific detective, and other fictional criminologists. Now he has created another crime detector, Thurlow Wade, who appears as a leisurely person, wealthy and independent, devoting his studies to a perusal of crime and the ways of criminals. Wade has developed a remarkable faculty for remembering faces and his keen gaze can penetrate almost any disguise.

Finis Farr, author of the radio mystery thriller known as "Mystery House," and writer of short stories, we selected to assist Reeve in writing the dramas.

When the two took under consideration the Crime Prevention program, Grover A. Whalen was Police Commissioner, John O'Brien was Chief Inspector and Edward P. Mulrooney, who has since succeeded Whalen as Commissioner, was then Deputy Chief Inspector and head of the Detective Bureau. The mystery dramatists saw the three police executives and began working directly with Mulrooney, who was so anxious to cooperate that he offered one of his best men as a researcher to comb the files for material for use in the series.

In further cooperation with the Police Department, crime commissions and other similar bodies, a guest speaker, selected because of his knowledge of crime prevention practices and the criminal, is being presented each week. Commissioner Mulrooney opened the series, was followed by Chief Inspector O'Brien, and the third speaker was Assistant Chief Inspector Sullivan .

Each drama of the series re-enacts some criminal case drawn from the police records. The characters and the situations are fictional, but the method of preventing the crime parallels some historical case.

Pacific Coast NBC stations releasing these broadcasts every Monday from 4:30 to 5:00 p. m., P. S. T., are KGO, KOMO and KFSD.

Davison-Haynes Mfg. Co. Enlarge Distributing Organization

The Officers, Sales Force and Department Heads of the Davison-Haynes Manufacturing Company

The entire personnel of the Davison & Haynes Manufacturing Company, the company that manufactures the popular Angelus midget, console and radio-phonograph combination, is busy as bees these days.

The two partners, Mr. Haynes and Mr. Davison, have hustled around for six months and consequently have built up as fine a distributing organization throughout the country as is enjoyed by any of the independent manufacturers.

They first signed Listenwalter & Gough on a contract to be distributors for the state of California. This concern has been in business in this state for many years and has behind them an enviable merchandising record.

Barrett & Walter, enterprising factory representatives, were appointed to help build up the dealer organization in the West. Mr. Coblentz, formerly promotion sales manager for Steinite, was made the Eastern representative, and Mr. C. A. Richards, with 35 years of foreign trade, was appointed the export agent.

Besides shipping thousands of sets to distributing outlets throughout the East and Middle West, large shipments of Angelus receivers have been sent to Canada, Mexico, New Zealand, France and South America.

To assure complete distributing coverage of the Pacific Coast and Southwestern Canada they have appointed Crown Distributing Co., Inc., exclusive distributor for Oregon, Seattle Hardware Co., exclusive distributor for Washington and McKenzie, White & Dunsmuir, exclusive distributors for British Columbia. All of these companies are outstanding and well known in their field and with their hundreds of retail customers they should distribute many thousands of Angelus sets

The Davis & Haynes Manufacturing Company has demonstrated what two active young executives can do in the radio business when they have the proper financial set-up and good merchandise.

Protect Your Favorite Stations by Taking Part in This Survey!

The Federal Radio Commission is gathering a mass of data relative to the 600 and more broadcast stations in the United States. They must have this information in order to be guided in the awarding of additional power and time to worthy stations, and in the revocation of licenses of those stations which render the least public service. Data as to the financial responsibility and technical operation and efficiency is also being compiled. This material is obtained directly from the stations, but the value of a station to the listening public can only be obtained from the listeners themselves.

Radio Doings is assisting the radio inspector of the Department of Commerce in this district in making a survey of station popularity. The opinions of thousands of listeners in Southern California, obtained in a manner which precludes the possibility of prejudice, will be invaluable to the inspector in formulating his report to the Federal Radio Commission. Radio Doings readers are asked to carefully fill out the form on the opposite page. Please do not stop with numbering your three or four favorite stations, but express an opinion regarding all of them. Indicate in the "Comments" column the ones which should be eliminated (if any), in your opinion. Indicate the ones which you believe should have more power or more time, etc. Do not hesitate to condemn as well as commend. Please be sure to write your name and address at the bottom of the page. This is necessary to prevent duplication and to authenticate the survey.

We will continue this survey through August and September, and will publish the final results about October 1st. The complete file of data will then be turned over to James Chapple, the Department of Commerce radio inspector in Los Angeles. It will constitute as accurate an indication of public opinion regarding the relative merit of the stations as is possible to compile.

Surveys have been made several times by stations themselves. These are bound to be inaccurate, due to the fact that the inquiry agents who go from door to door are employed by the station, and quite naturally endeavor to bring in reports pleasing to their employers. And most anything can be accomplished by a little suggestion. Even if the agent is employed by a newspaper, the paper usually has a station affiliation, which is sure to influence the result. Or even if there is no prejudice behind the solicitor, he has definite ideas of his own regarding the stations, and in his conversation with the set owner, is apt to make suggestions.

It is obvious, therefore, that the Radio Doings Survey will be more accurate than any yet taken. Neither this magazine, or any member of its staff, has any connection with any broadcast station. Furthermore, since the survey is not obtained by personal interview, but by the simple process of asking the reader to thoughtfully fill in the survey form in the quiet of his own home, it is obvious that only his true opinion will be expressed therein.

We know that the Commission plans to cut off stations which clutter up dial space without rendering an adequate public service. We know that they have the axe out for those stations which permit their facilities to be used by fake Rajahs, fortune tellers, and matrimonial bureaus. Stations which operate for the private gain of the owner and not for the benefit of the public, are being scrutinized carefully. All stations are being closely checked for frequency deviation, failure to announce the call every fifteen minutes, failure to announce records with the phrase, "This is a phonograph record."

The Radio Law of 1927 may be bad in many respects, but one thing stands out like a shining star, and that is the test which every station must meet,—"Public interest, convenience and necessity." It is a struggle for the survival of the fittest, and the Radio Doings survey will ascertain which are "fit" in the public mind.

RADIO DOINGS POPULARITY SURVEY

Below are listed the stations of Southern California, listed in the order in which they tune in on your dial. Please indicate your opinion of the relative merit of the stations by numbering them in the order of their value to you—"1" for your first choice, "2" for your second, etc. Mark zero after the stations which are of no value to you. A column is also provided for your comments and suggestions. Be sure and write your name and address at the bottom of the page, otherwise your vote will not be counted.

Fill out carefully and thoughtfully, tear out the whole page and mail to RADIO DOINGS, 407 East Pico St., Los Angeles, Calif.

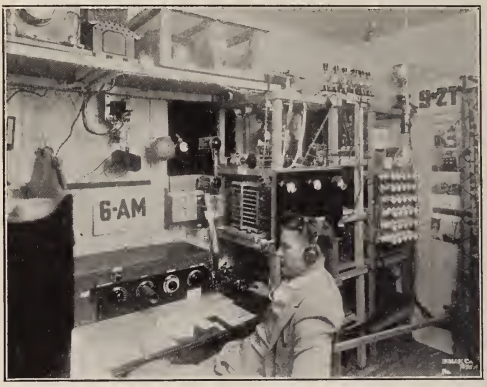
Wallace's Amateur Station

A private radio station that any operator in America might envy has just been completed by Don C. Wallace, of W6AM, in the new home he has just built at 4214 Country Club drive, Long Beach. Wallace, who is Southern California zone manager for General Motors Radio, made careful tests of radio reception before he purchased the site for his new home. It is located on a small hill facing a golf course, with the river below, and the tests proved it an excellent location.

Aerials are carried from two one-piece poles, 95 feet in height and 200 feet apart. There are 3000 feet of ground wire buried in trenches, and in addition two ground rods each 86 feet in depth, and each buried in moist earth. All power wiring leading to the house is buried.

Wallace uses a 1000-watt crystal control transmitter, on 7200 kc., 3600 kc., 14,000 kc., 28,000 kc., plus many experimental frequencies. He was the winner one year of the Hoover cup for the best all-round experimental station in the United States, the major portion of which was made by the operator himself.

With the new equipment Wallace hopes to outdo even such feats as that of last winter, when he for a time was one of the few operators in America to keep in touch with the Byrd party in the Antartic. He is the holder of a commercial first class license, and was operator on the S. S. George Washington when it carried President Wilson to the peace conference at Paris. Mrs. Wallace holds amateur operator's license W6MA, and Mr. Wallace has in addition to his regular amateur license an amateur portable license W6ZZA. On his frequent trips to the General Motors Radio factory at Dayton, Ohio, he takes his portable set with him and converses with Mrs. Wallace every evening.



Don Wallace Operating his 1000-watt "Ham" Station, W6AM.

Mershon Electrolytic Condenser

Certain metals, such as aluminum, magnesium, and tantalum, when immersed in an electrolyte, possess the property of allowing electricity to flow in one direction and not in the other.

In the presence of various electrolytes, if a current is passed between an electrode of aluminum and an electrode of some other metal, and the aluminum electrode is positive with respect to the

other, a film of aluminum oxide will form on the aluminum electrode. This film will be extremely thin, but quite high in dielectric strength. The Mershon Electrolytic Condenser makes use of this film as the dielectric.

Due to the fact that the dielectric film is stable only when positive potentials are applied to the aluminum, the condenser may only be used where direct potentials are inherent to the application. In other words, it cannot be used directly on alternating current. It must be used on voltages that do not reverse in polarity. Satisfactory conditions are present in the output of alternating current rectifiers, and it is there that Mershon Electrolytic Condensers at present find their greatest, though not only, application.

Mershon Electrolytic Condensers are manufactured by the Amrad Corporation, Medford Hillside, Mass. It is estimated that there are more than 3,000,000 Mershon condensers in use today.

While Dr. Julius Klein, Assistant Secretary of Commerce, is vacationing, six bureau heads of the Commerce Department will carry on his series of talks on "The World's Business," heard each Sunday evening over the Columbia Broadcasting System at 3:45 p. m.

Automatic Vs. Fixed Line Voltage Regulator

The problem of line voltage fluctuation in the operation of the electric radio set has brought various forms of so-called line voltage regulators into existence. Some are claimed to be automatic, while others are claimed to be fixed, and much confusion exists as to the relative merits and meanings of these types.

Briefly, the automatic line voltage regulator is one which varies its resistance in accordance with the applied line voltage, thereby maintaining an approximately even input voltage to the receiver with which it is connected in series. Unless the device is provided with a self-compensating resistance winding, capable of varying its resistance over a wide range in accordance with fluctuating line voltages, it is not an automatic device. The fixed line voltage regulator is simply a straight resistance, which reduces the applied line voltage by a given degree, due to the series resistance. The resistance remains the same at all times. The voltage drop is therefoer more or less the same over a wide range of line voltages. The only purpose of such a device is to protect the receiver against excessive line voltage. When the line voltage drops down to normal, however, the resistance remains in circuit, hence the set receives insufficient voltage for proper operation. In many instances such a device will actually work greater havoc on receiving tubes than its absence, since certain tubes, particularly power and rectifier tubes, operating at insufficient voltage, are apt to arc badly. With the automatic line voltage regulator, however, when the line voltage drops to normal, the series resistance is reduce dto negligible proportions, thereby impressing almost the full line voltage on the radio set.

9:30 p. m.—NBC, Golden Legends.

In contrast to the exaggerated salaries certain radio announcers are supposed to be receiving, is a reliable report received from New York that a star announcer there—one whose name is known to practically everyone in radio—is actually drawing only $75 a week from the broadcasting company for which he works.

Evidently Calvin Coolidge is changing his mind about the radio. While in the White House he was quoted as saying that it was "a lot of noise." However, in an article last week he wrote:

"The radio has done for people of mature years what the school house has done for the youth in the way of lifting them out of themselves and giving them new ideas."

RADIO COMMISSION SEEKS FINANCIAL DATA

A comprehensive financial report of the radio broadcasting industry will be the result of a survey now under way, by order of the Federal Radio Commission. A form has been sent to each of the 600 broadcasters in the United States, asking about profits and losses of the stations, amounts spent for programs, and all other pertinent data for the fiscal year.

The research may be compared with the financial statements required by the Interstate Commerce Commission from railroads, and is in accord with the Radio Act of 1927.

Other branches of the radio industry, including communications and television, will be asked to file similar statements.

This will be the first survey of the financial strength of broadcasting stations.

The Commission intends to keep this information confidential, and it will not be open for general public inspection.

There are, of course, blues singers and blues singers, but Nita Wayne has a way all her own, and it must be a pleasing way to judge from her popularity with radio fans. Miss Wayne dispenses her crooning from station KFWI, in San Francisco, on Friday nights, from 10:30 to 11:00.

9:00-11:00 p. m.—NBC.*

Claude Foote, manager of the H. R. Curtiss Company, is usually a very genial person, but of late has been very grouchy.

He says that since they have taken on Philco he has been kept so busy that he is unable to play golf, and consequently his game has suffered badly.

Just a tip to the unwary: Claude is a four handicap man from Flintridge, so if he inveigles you into a game with him, ask for lots of strokes.

Mr. C. W. Smith of the Griffin-Smith Manufacturing Company, manufacturers of the popular Royal receivers, is slowly recovering from the painful accident which he had several weeks ago.

Mr. Smith hopes to be off his crutches within a week, and as soon as that momentous event occurs he expects to take a trip throughout the Inter-Mountain and Middle-Western states, at which time he will complete his jobber organization.

Mark Smith, General Sales Manager of Atwater Kent, Inc., is a busy man these days. The new Atwater Kent line is here and he expects to make Southern California more Atwater Kent conscious than ever before. Here's luck, Mark.

Herbert H. Horn, the "burly" jobber of Hill Street, reports exceptional interest in the Jackson-Bell midget receiver. Mr. Horn stated a short while ago that he was undecided as to whether or not the fad for midget sets, midget golf courses, etc., was really a fad or would be permanent. He is now convinced that midget equipment has brought pleasure to many thousands of people who could not afford the more expensive merchandise and that the midget business is here to stay.

Paul V. Parker, familiarly known as "The Sphinx," returned to the fold last week after a six months' absence, during which time he managed the Radio Electric Shop in Culver City, and is again a representative of Radio Doings. Mr. Parker says it is good to be back again and he has had an enjoyable week renewing friendships among the trade.

Mart Borden, the jolly, rotund manager of the Plymouth Radio Co. of Los Angeles, manufacturers of the Plymouth Midget radio, returned to town last Saturday after a week spent in San Francisco, Oakland, Fresno and way points.

Mr. Borden said: "Before we introduced our new model we wanted to give it a thorough test, so I pulled out the old car, put in a new set and started north. To make the test complete I twisted the dials every time I stopped. A few minor defects showed up under this strenuous road test but, as a whole, the new set was most satisfactory. We will be making a very interesting statement to the trade within a few weeks."

RADIO DOINGS, August 16, 1930. Issued weekly at 407 East Pico, Suite 400, Los Angeles, Calif. Volume 17, No. 8. Subscription $3.00 a year. Entered as second class matter, November 25, 1922, Los Angeles, Calif., Post Office, under Act of March 3, 1879.

Adios!

FOLLOWING this edition the "Little Red Book of Radio" will be no more. It has remained in its present form for over eight years and we have now decided that it is time for it to grow up.

"Adios" means good-bye to the Little Red Book, but in this case it also means the beginning of a new era in radio fan periodicals.

Next week's publication of Radio Doings, August 23rd, will be our initial endeavor in a larger, more beautiful and more complete magazine for the radio user.

There is a definite place for a scientifically compiled, dependable and accurate magazine for the radio owner as there are many things about his set, the programs, the broadcasting studios and broadcasting personalities which he wants to know, and which he will know in a most entertaining way through using the "new" Radio Doings.

The dealers are always eager for the latest news of the new trade developments, policies of the manufacturers, changes in broadcasting stations and call letters and news of the leaders in the industry.

RADIO DOINGS will supply this helpful and necessary information in a more complete manner than has ever before been attempted.

Look—watch for—and then read carefully the edition of August 23rd. We want your suggestions and criticisms. Any comments will be most welcome, for then we will be able to keep on supplying you with the kind of radio magazine that you want.

HERE IS YOUR STATION DIRECTORY!

You will appreciate RADIO DOINGS, the up-to-the-minute station and program guide, delivered to your home each week. There is no trouble or worry on your part; simply enclose a $3.00 check with this coupon and RADIO DOINGS will begin at once for a whole year.

RADIO TOPICS of the DAY

Weekly Review of Radio News-Thought and Opinion

HIGH POWER IN CUBA

When the new 50,000-watt station is built in Cuba, it will no longer be a novelty to hear what is going on in the little island to the south.

Up to now the highest-powered station listed in Cuba is CMK, at Havana, with 2000 watts. When Havana begins broadcasting on 50,000 watts, a cleared channel will have to be provided for it in the United States, otherwise there is liable to be serious interference caused by our stations.

Because of the comparatively low power used by the Cuban and Mexican stations, there has not been much trouble up to the present time on this score, but when they begin stepping their power up to 50,000, a brand new problem, and an exceedingly delicate one because of its diplomatic and international nature, may present itself to the Federal Radio Commission.

BLIND IN NEED OF RADIO SETS

A plea for radio sets—the cheapest kind would do so long as their are efficient—is being made by M. C. Migel, president of the American Foundation for the Blind at 125 East 46th street, New York City. Calvin Coolidge is the honorary president of this organization.

"We now have applications from approximately six hundred needy blind people, to whom a radio would be a gift from heaven, but who are unable to procure such sets," Mr. Migel pleads.

"Our Foundation has, during the past two or three years, distributed several thousand completely equipped radios throughout the country to needy blind people, and we have on file hundreds of letters, telling of the great boon that this has conferred upon them, and of the inestimable blessing that these radios have brought to their lives, otherwise spent in monotonous darkness."

RUDY SIGNS LONG CONTRACT

The Sunshine Hour broadcast of Rudy Vallee will be continued as usual each Thursday evening while he is on his summer tour. A contract has been signed with him for this hour for 70 additional weeks beginning September 4th.

PASTOR'S BROADCASTS CAUSE COMPLAINT

Another case involving censorship rights before the Federal Redio Commission is the complaint against the Rev. Robert P. Shuler, pastor of the Trinity Methodist Church, of Los Angeles, and operator of Station KGEF in that city. The minister is charged with the broadcasting of "reckless denunciations."

Judge E. O. Sykes, vice-chairman, returned to Washington from the Pacific Coast, where he conducted a series of hearings on pending radio applications, with the complaint. It was submitted to him by George D. Lynch, of Los Angeles, a former official of the American Legion. Judge Sykes will present the matter to the Commission for its consideration.

I. R. E. GOES TO TORONTO

The Institute of Radio Engineers will meet in Toronto, Canada, August 18th to 22nd. This will be the annual convention.

STATION WABC FINDS SITE

If the hearing to be held on August 15th does not develop too much opposition, the Columbia System has found a suitable location for the new 50,000 watt station for WABC in Wayne Township, Passaic County, N. J. The twenty-five broadcasters in the State have been invited to be present at the hearing.

Miss Nita Wayne, on the cover this week, croons blues and ballads in an unusually pleasant voice over KFWI, San Francisco . Turn your dial to 930 kilocycles some Friday night between 10:30 and 11:00 and hear if Miss Wayne's voice doesn't entertain you agreeably.

Proving to you that there is still something new in radio, Folgeria, the first serial comic opera of the air, began August 14th at 9:00 p. m. from KHJ. Folgeria runs rampant for 52 weeks. The story has been written by two of the highest-paid continuity writers in Hollywood, and each week an original theme song will run through the operetta and listeners may get a copy of it. Raymond Paige and his 35-piece orchestra will be augmented by a marimba band.

Special—The Women's Derby, an eight-day race for planes of 200 horsepower engines, is scheduled to take off from Long Beach on August 17th, officials of the National air races have announced. This event, one of seven derbies arranged for men and women pilots, offers prizes totaling $7,000 for the winner of the 2245 event. Bill Ray, manager of KGER, has announced that the station will have exclusive broadcast rights for the event and will have a battery of announcers to throw out a verbal description of the events.

Following the compilation of a record of six KJR employees who have, are being, or will be married in two months, Leo Moen, control operator, announced that he is in the parade and will be married shortly to Pat Murphy, a Bellingham girl who is now living in Seattle. Sydney Dixon started the marriage parade two weeks ago. Gray U. Munjar, assistant manager of the Northwest Broadcasting System, followed, being married on July 26th to Miss Betty Woodward. Five other KJR employees are now counting the days until they march to the altar.

KNX, Hollywood, inaugurated its new studio in the Pantages Hollywood Theater, recently with a program which presented Slim Martin, popular maestro of mirth and melody; the greater Pantages orchestra; a male vocal chorus of twenty voices, and instrumental soloists and others. From 6:30 to 7:00 p. m., each Monday, Wednesday and Friday hereafter, the same super-aggregation of talent will be presented, with the addition at each broadcast of featured stage stars who may be appearing at the mammoth new million-dollar show mansion. In addition, every Sunday night, from 10:30 to 11:30, a special "Footlight Frolic" will be broadcast from its new studio by KNX. This program is expected to be one of the finest and most entertaining on the air, since it will be a roundup of the highlights from the preceding week's programs.

Green River brings a new series to the CBS chain. The puzzle fad, "What's Wrong With This Picture?" is adapted to the limitations of radio. Prizes to the listeners detecting the most errors in announcements of musical numbers, are given each week. Madame Belle Forbes Cutter, "the perfect radio soprano," and Joel Lay, baritone, and orchestra make the music more difficult to guess. 8:00 p. m., Tuesday, over members of the Columbia Broadcasting Company.

The axiom, "Crime doesn't pay," will have to be revised in the case of James Knight Carden, declamationist at KFI-KECA, Los Angeles .

Carden has just completed script for a 52-week, five-times-a-week serial story which begins its adventurous life over KFI on Aug. 18, under the ominous title of "Emperor of Crime."

The serial will be broadcast on Mondays, Tuesdays, Wednesdays and Fridays at 7:00 p. m. (P. S. T.), and on Thursdays at 7:30 p. m.

Studio News

Edwin John Albright is his "full time" name, but to thousands and thousands of KNX fans he's plain "Eddie," friend to every one of the folk he daily addresses at 10 o'clock with "Hello, everybody, it's ten o'clock this morning!"

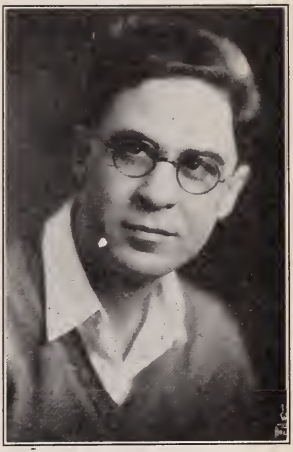
"Eddie," then, is one of the old-timers in Southern California radio. He made the very first announcement to be put on the air when the 500-watt station that preceded the present 5000-watter came to life. He's been with KNX ever since.

Born in New York state, "just a few years back," Albright was reared in Oil City, Penn. Later he gravitated to Chicago, when he studied singing with a view to taking his baritone voice into grand opera.

The chance finally came, but when it did Albright was "out on the road" in Lyceum work, and to have left the company would have put others out of work, so Eddie stuck.

There followed years of studying and roaming, including five years on Orpheum time in a musical act.

At any rate, he arrived in Los Angeles in 1920 pretty much "fed up" with music. So much so, in fact, that when he was offered a position just vacated by the great Lawrence Tibbett, who had gone East, Eddie refused and turned to—selling life insurance ! !



"Eddie" Albright

However far away this sales effort seemed from radio and music, it led Albright right to it.

The concern he worked for wanted to put on radio programs. Eddie was the only man in their employ who knew anything about music or programs, and so he was elected.

His work on this insurance hour attracted the attention of the new owners of KNX—The Los Angeles Evening Express—and he was offered the chance to announce the inaugural program. Eight thousand telegrams came in. Eddie was offered a permanent "man of all work" job—and took it.

To list all Eddie's accomplishments or activities would take too much space. However, he conducts the original radio "family" club, now six years old; he is the "Mr." of the original "Mr. and Mrs." skits, now three years of age; he is now reading his 82nd full-length novel to his afternoon audience; he has sent out in the past 18 months 250,000 free copies of poems he has written and read on the air—and he announces most of the day time programs from KNX's main studios.

Hobbies: Golf, "Pitch and Putt" and deep sea fishing.

Description: Medium height; sparkling black eyes; thick black hair; kindly smile, and a "regular chap."

Harold Horton, KFRC announcer, once played the part of the doctor in "White Cargo," the sensational play that is now sweeping over the country as a "talkie." It was during his histrionic career in Chicago, Harold has had a wide and varied experience in dramatics all over the world. His latest assignment on KFRC has been to the "Feminine Fancies" program, heard each morning, except Sunday, from 9:30 to 10:30 o'clock, over the Don Lee chain.

Brown Enlarges Laboratory

N. E. Brown ("Brownie"), apparently hasn't heard anything about stock market flops or hard times, because he has just blossomed forth in a new location where office and laboratory are considerably more commodious and pretentious than at the old address. There is a well worn path to the door of the old laboratory at 6805 So. Western Avenue, not because Brownie builds a better mouse trap than his neighbor, but because he builds anything and everything better.

N. E. BROWN

Business has grown to a point where more room for equipment and workmen is absolutely necessary, hence the move to the new quarters at 6223 So. Western Avenue. In attempting to remember some of Brownie's past accomplishments, we recall that he has installed complete telephone exchanges, installed and operated light and power plants, inaugurated the first automobile school in the world at Minneapolis and the first auto school west of the Rockies in Los Angeles. Served on technical committees at the first airplane meets, designed and built airplane engines. Built the first two-speed free engine multi-cylinder motorcycle. Was superintendent of a large electrical plant building a complete line of electric motors. Has read many papers and given talks before technical organizations, and is at present delivering two lectures per month to two separate associations of motion picture operators. At one time Brown was even technical editor of Radio Doings!

Brown specializes in building equipment for broadcast stations, sound recording studios, movie theaters and all users of sound reproducing equipment. A department is also maintained for radio service work.

Complete Radio Broadcasting and Receiving Equipment of Any Capacity.

Portable and ship Transmitters.

Sound Equipment of Highest Quality.

Amplifiers at Any Frequency, for any Power and Purpose.

Audio Transformers and Chokes for Any Use, Volume Indicators and Equalizers.

Attenuation Networks.

Motor Generator Sets.

Synchronous Motors.

Repeat orders and increasing clientele have forced

N. E. BROWN

Radio Commission Faces Heavy Schedule

The number of dissatisfied radio station owners in this country is pretty close to the 400 mark, with approximately half of these program broadcasters. This is a heavy percentage of the 608 stations now on the air.

What the Federal Radio Commission does with its time is clearly shown by the fact that hearings will be held at the rate of five a day on "hearing days" through September, October and November. And no applications which were received after July 1 will be included in this intensive three-month effort to straighten the difficulties out, so that the broadcasters and the public alike will be satisfied.

The ever-increasing duties of the Commission are reflected in the number of applications now being received, members of the Commission have pointed out. Under the law, hearings must be held before the Commission can take negative action on applications of other than a purely routine and miscellaneous nature.

Among the applications pending and designated for hearing are about a score from stations seeking the maximum allowable power of 50,000 watts. All of these applications either have been or will be designated for hearing at the same time, to cover a week's period in September. Because these requests are interlocking, the Commission decided it would be advisable to hear them consecutively.

The records show also that 100 stations have violated the Radio Act of 1927 or Commission regulations during the six months ended July 1, and that accurate records of such transgressions for the first time have been kept. Of these cases, 16 have been heard at formal hearings before the Commission and two stations have been deleted as a consequence.

And of this aggregate of 100 violators 31 stations have been issued temporary licenses for the three-month period ended October 31, and must stand hearing before the Commission to show cause why their licenses should not be revoked.

Short Wave Notes

Contributed by Willis Werner
Box 1054, San Diego, Calif.

Have you logged all of the U. S. short-wave stations? In the mad scramble to land foreign stations, our own short-wavers are often overlooked. Here are some of them. How many are on your list?

W2XAD, relaying WGY, on 19.56 meters, in the afternoon until 5 p. m.

W2XAF, relaying WGY, on 31.48 meters, between 4 and 7 p. m. and sometimes later. I have heard them until 9 p. m.

W8XK, relaying KDKA, operates on a "sliding schedule." They are on 20.7 meters until 9 a. m. and then on 25.25 meters until 2 p. m., and after that on 48.85 meters.

W3XAU, relaying WCAU, Philadelphia, on 31.3 meters and 49.5 meters, should be heard between 5 a. m. and 1 p. m. on the former wave length and between 1 and 8 p. m. on the latter. However, I understand they do not transmit on the 31.3 meter wave length on Thursdays and Fridays, so as not to interfere with PCJ, Eindhoven, Holland, which uses the same wave length.

W2XV, New York, on 34.68, operating Wednesday and Friday between 5 and 7 p. m.

W2XE, of WABC, on 49.02 meters, are on until about 9 p. m.

W3XAL, at Boundbrook, relays WJZ on 49.18 meters, week days, between 7 and 9 p. m.

W9AF, Chicago, carries the programs of WENR until 9 or 10 p. m., on 49.83 meters.

Here's something to try for in the early morning. Mr. Robert Coningsby of Melbourne, Australia, asks for reports on behalf of the engineer, Mr. L. Glew, on the new short-waver, VK3UZ. VK3UZ is crystal-controlled and operates on 32 meters. They are scheduled for 3 to 5 a. m. every Monday, Wednesday and Saturday.

According to "World Radio," published by the British Broadcasting Company, W9XU, Council Bluffs, is soon to go on a regular schedule relaying KOIL on 49.5 meters, and W9XAA, of WCFL, will soon open with a regular schedule on 49.34 meters.

What Would YOU Do If YOU Were the Federal Radio Commission?

What do the radio listeners of Southern California think of our broadcast stations? Which stations are operating for the public interest, convenience or necessity, and which are useless? Which broadcaster has the greatest audience and which has the smallest audience? What would the public do if they had the power to revoke licenses, grant power increases, curtail or increase time on the air?

There has been no adequate answer to these questions. They have been answered by everybody concerned except the public; but such answers have been meaningless.

RADIO DOINGS intends to find the answers to these questions, and in a very definite and final manner. In other words, the public is to be given a voice, and an authoritative voice.

Radio Doings readers are representative of the total radio audience of Southern California. They are expressing their opinions by filling out the form on the opposite page, signing with address and mailing to us. These thousands of survey blanks are to be turned over to James Chapple, radio inspector of the Department of Commerce in Southern California. Mr. Chapple has been instructed by his Department to make a survey of station merit in his territory for the Federal Radio Commission. In all of the data which he will be able to compile nothing will afford such a direct indication of the public opinion as the results of this Radio Doings survey.

This survey includes listeners in all parts of Southern California. It is not concentrated in any single region. It is not limited to any class or color or creed. It constitutes a cross section of the **whole** audience.

Each individual reader is requested to vote only ONCE, as duplicates will be thrown out. If you have already sent in your ballot, do not send in another, but see that all of your friends and neighbors do their part as well. The response to our survey has been very gratifying, but we will continue through August and September, and obtain as many of these written opinions as possible. The final results will be published in Radio Doings about October 1st, together with many of the comments and suggestions of our readers.

Do not fail to take advantage of this opportunity to make known your opinions, for in reality the broadcast channels belong to YOU—the public!

RADIO DOINGS POPULARITY SURVEY

Below are listed the stations of Southern California, arranged in the order in which they tune in on your dial. Please indicate your opinion of the relative merit of the stations by numbering them in the order of their value to you—"1" for your first choice, "2" for your second, etc. Mark zero after the stations which are of no value to you. A column is also provided for your comments and suggestions. Be sure and write your name and address at the bottom of the page, otherwise your vote will not be counted.

Fill out carefully and thoughtfully, tear out the whole page and mail to RADIO DOINGS, 407 East Pico St., Los Angeles, Calif.

Atwater Kent Announces New Sets

More than 700 eager and enthusiastic radio dealers and newspapermen of Southern California gathered at the Elks Club in Los Angeles on August 5 for the premier showing of the brand new Atwater Kent radio with the "golden voice."

The secret that has shrouded the new radio since the Seventh Annual Radio Show at Atlantic City, at which

Mark Smith

only a padlocked door was exhibited by Atwater Kent, was revealed for the first time.

The meeting was one of the most dramatic in the history of similar gatherings. While the 700 anxious men sat in the banquet room the first chords of "Anchors Aweigh" filtered mysteriously through the room over radio station KECA from the National Broadcasting Company's nation-wide hookup. As the Atwater Kent orchestra swung boldly into the famous Navy song, Mark Smith, general manager of Ray Thomas, Inc., Southern California distributor of Atwater Kent radios, unveiled the new radio cleverly concealed at the head of the banquet table. Applause that could be heard in every portal of the elaborate club came from the dealers as they gathered around the new "golden voiced" radio.

The Atwater Kent orchestra then presented a cross-section of itself. Each instrument individually played a long note. First the violin, then the viola, and 'cello and bass viol, the clarinet, the piccolo, the bass clarinet, and the trumpet, the trombone, the trumpet and the drums—all came on the air—and had all present been blindfolded, each instrument could have been pointed out, so accurate was the tone.

Then the creator of the new "Golden Voice," A. Atwater Kent, stepped to the microphone in the studios of the National Broadcasting Company. Mr. Kent predicted that 1930-1931 would be the most successful year in the history of radio production, declaring that it was his faith in the industry which had prompted him to spare no expense in the development of an entirely new radio, and as a result his laboratories had perfected the new Atwater Kent Golden Voiced radio.

Mark Smith, general manager of Ray Thomas, Inc., then explained the new features.

"The new Golden Voiced Atwater Kent radio," Smith said, "has the finest quality and best tone that Mr. Kent ever produced and at a lower price than last year's Atwater Kent, model 60. The exclusive quick-vision dial with its even separation of stations, the new tone control giving tone shading power, the new beauty and design of the four models created to blend with any decorative scheme, and countless new features set the 'Golden Voiced' radio at the very peak of radio perfection.

"Astounding as it may seem, Mr. Kent has made it possible for these radios to be sold at figures far below keeping with the quality. For instance, complete with tubes, the model 70 lowboy will sell for $145.20; the model 74, arm-chair companion, will sell for $151.20; the model 75, combination radio and phonograph, the first ever produced by Atwater Kent, will be only $225.20, and the model 76, highboy, will sell for $172.20. With the completely new four models and the unbelievably low prices, I am certain that Atwater Kent will truly be a 'Golden Voice' for more homes than ever before."

Philco Enters Midget Field

Philco Baby Grand, a new small model, will be announced to the public in the pages of the Saturday Evening Post of August 23rd. Thursday, Philco, one of the very largest manufacturers of radios in the country, enters the midget field.

Recognition of the midget type of radio set by such an important manufacturer as Philco is an indication of its fixed place in the radio picture.

Philco Baby Grand

The rapid development of this type of receiver has been amazing. But it is no less logical. Many other lines of activity and merchandise have their "midget" counterparts. Consider the midget automobile, golf, court bungalow, baby grand piano, et cetera.

The midget receiver meets a market stratum not touched by standard designs at prices over one hundred dollars. Standard types at distress prices do not take its place. There is a tremendous market for midgets in homes as second and third sets in bedrooms, maid's room, etc. It is ideal for the beach or mountain cabin, most of which are wired in California.

Philco has quickly recognized the potential possibilities of the midget market, and carload shipments of the new "Baby Grand" Philcos are reported to be on the way for prompt delivery on the Pacific Coast.

For many months the trade denied the possibility of a national manufacturer entering this field, citing production, shipping and distribution costs as making the venture prohibitive. These problems were readily solved because large scale production effects economies not possible with limited output. Philco hesitated only long enough to make certain that quality and performance worthy of Philco's national reputation could be produced within the midget price range.

The Philco Baby Grand weighs 42 pounds packed. Cabinet, Gothic walnut, 16 in. by 17 in. Seven tubes, three screen grid, with screen grid detector. Will be supplied only with regular Philco tubes. Two audio stages, with push-pull in last stage. Circuit has double tuned input.

Circuit is not regenerative, therefore set cannot disturb neighborhood reception. Cross talk is entirely eliminated.

The sensitivity of the set closely approaches that of the standard Philco line; that is, its distance-getting ability is entirely adequate for locations remote from broadcast stations.

Particular attention has been given to the question of selectivity, tests having been made to produce a design that would meet conditions in Southern California. It is recognized in the industry that the demands upon a radio set in Southern California are unusually severe. Therefore any set which satisfactorily meets local conditions is certain to be satisfactory elsewhere.

Southern California can justly be proud of the part it has played in radio history. One of the earliest A.C. sets was made and sold here long before its recognition by national manufacturers.

It was the proving ground for the dynamic speaker.

Southern California led the way in the manufacture and merchandising of cabinets, displacing the table model so long retained in the East.

And now the midget is here, and here to stay, with the stamp of recognition and approval of a national manufacturer.

Brunswick Popularity

Warner Bros. entrance into the radio industry through their outright purchase of the Panatrope Division of the Brunswick-Balke-Collender Co., for a sum said to be in excess of $12,000,000, has been equally as spectacular as their dramatic

Les Taufenbach

introduction of Talking Pictures through Vitaphone.

The dynamic and forceful aggressiveness of this great motion picture organization, said to be the largest in the world today, is immediately apparent in the tremendous strides that Brunswick have taken in the past few months.

Brunswick is already among the leaders in the rapid pace set by the radio industry, and they bid fair for first place honors, if their progress continues at the same rate, which it undoubtedly will.

Leading Southern California radio-music merchants are displaying the new models and are enthusiastic over the unusual operating performance of these remarkable sets.

The circuit, designed exclusively in Brunswick's great laboratory, is radically different than any other set on the market today, and it is said it is the first radio set to take full advantage of the tremendous amplifying powers of the screen grid tube. The circuit employes four screen grid tubes, which function under ideal operating conditions and, therefore, makes use of less tubes than most receivers which are being designed today. In other words, Brunswick is using only six tubes to accomplish what most other manufacturers require eight or nine to do. The circuit has many unique features which are not found on other radio sets, and these are all exclusive Brunswick design and fully patented. It is interesting to note that Brunswick makes 98 per cent of everything that goes to make the completed instrument. This is an unusual situation among radio manufacturers today.

Brunswick officials place a great deal of credit for Brunswick's immediate popular acceptance in Southern California to the quiet and efficient manner in which Les Taufenbach, manager of Western Radio, has built a wonderful dealer organization, composed of the highest type of merchant in the Southwest. He has placed Brunswick in the finest stores in every community.

Taufenbach's many years' experience in the distribution of radio merchandise have stood him in good stead in the smoothness, in which his organization has functioned in getting Brunswick under way in a big way in this territory.

Brunswick-Warner Bros. officials have recognized Taufenbach's unusual ability and knowledge of radio merchandising methods, and he has been selected as one of six Brunswick distributors in the United States to represent the entire Brunswick distributing organization at special meetings of major importance to the distribution of Brunswick merchandise. Taufenbach will act on this liason body for the entire Pacific Coast.

We wish to apologize for a mistake made on the Trade Notes page last week, i e., the issue of August 9.

It was stated that the Herbert H. Horn Company was distributing Jackson-Bell. This was wrong, for Jackson-Bell is distributed in Los Angeles by the H. R. Curtiss Company, 1135 Wall Street. The Herbert H. Horn Company distributes Tiffany Tone midget sets.

The essential features of these programs are identical with those sent us by the stations

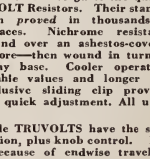
The rise of Ted Husing, who is to Columbia what MacNamee is to the NBC, from the ranks of studio announcers to one of the best-known sports commentators in the country was not accidental. Husing took special courses in English at Columbia University and studied the technicalities of radio at the Massachusetts Institute of Technology.

The Way It Is Wound Tells TRUVOLT Quality



You don't have to *guess* the quality of TRUVOLT Resistors. Their stamina has been *proved* in thousands of hard places. Nichrome resistance wire wound over an asbestos-covered copper core—then wound in turn on a fire-clay base. Cooler operation, more stable values and longer life. The exclusive sliding clip provides accurate, quick adjustment. All usual sizes.

Variable TRUVOLTS have the same construction, plus knob control. Last longer because of endwise travel of contact. 22 stock sizes. List price $2.50.

You can rely on Electrad Resistors for every radio and voltage control need.

Mr. Claude Foote, manager of the H. R. Curtiss Company of 1135 Wall Street, announces that they have taken on the exclusive distribution of Perryman tubes.

Mr. Howard D. Thomas, the Western representative, states that he is more than pleased to have the H. R. Curtiss Company take over the distribution of Perryman as they will be a very valuable addition to the Western distributing organization.

12:00 midnight.—RKO Midnight Vaudeville Frolic.

McMurdo Silver, chief designer of the Silver-Marshall sets, says he has been building and studying automobile radios in his laboratory for over a year, and declares also that it is a mistake to locate the radio set so far out of reach that recourse must be had to flexible shafts or "remote controls" for tuning, since these practically always develop some little back-lash. Consequently, he has seen to it that the Silver-Marshall Auto-Set is tuned directly by a standard illuminated drum dial, similar to the ones now almost universally used on home radios. This, together with a battery drain so low that an ordinary set of "B" batteries will ordinarily last for several months, are among the other reasons, in addition to the ability to tune in plenty of stations at almost any spot on the road, why Mr. Silver believes the "singing automobile" has come to stay.

10:00 p. m.—Eleven Vagabonds.

Senator Overman, of North Carolina, who was recently cut off at the end of seven minutes in a radio speech, ought to look with envious eyes upon Stalin, the Bolshevik dictator, who recently broadcast a seven-hour speech in Russia.

Broadcasters should approach Ben S. Fisher, Acting General Counsel for the Federal Radio Commission, with fear. Mr. Fisher was formerly District Attorney at Coos Bay, Oregon, and in that capacity hung three men for murder.

General Motors Radio Business Bureau Meeting

On August 8th the General Motors dealer representatives departed for Dayton to attend the monthly National Business Bureau meeting. The Los Angeles zone is represented by Mr. James Taber Fitzgerald of the Fitzgerald Music Company, Mr. E. L. Hayes, sales manager for the same company, and Mr. Roger Howell, owner of the Reliable Radio Shop, Long Beach.

The Nationally Organized Business Bureau holds a two-day meeting monthly with a rotation of dealers, regional managers and zone managers. Every General Motors radio dealer receives the minutes of each meeting in a monthly letter.

While the Bureau is in session all phases of business, as they affect the dealer, are brought up for round-table discussion. Dealers and factory executives cooperate in solving business problems for their mutual welfare. The business to be discussed at every monthly meeting includes dealer accounting, selling methods, service methods, retail and wholesale financing, advertising, store planning, the used radio disposal plan, projection schedules, etc., etc.

They will be received at Dayton by Mr. L. C. Warner, Pacific Coast regional manager, Mr. Don C. Wallace, Los Angeles zone manager, who are attending the meeting in company with Mr. H. E. Gardiner, zone manager of San Francisco, and Mr. J. W. Condon, Jr., of the Seattle zone.

The sincerity of purpose is immediately recognized by the General Motors dealer organization, as their problems are discussed on a national basis in the presence of factory executives and bears out the motto of General Motors Radio Corporation. "We are Building an Institution in Radio."

Before departing for Dayton a general call was sent to all dealers asking for suggestions and criticisms in letter form for their representative to present at the board meeting. Upon return, these dealers in turn will write the minutes of the meeting in their own language for the Pacific region.

TIMELY TRADE TOPICS

The Polymet Manufacturing Company reports receiving a substantial volume of orders from its regular sources. This company supplies a good percentage of R.C.A. licensed radio manufacturers with coils, condensers, resistances and transformers.

According to Sidney Spector, California representative, Polymet opened up new fields for its products such as new types of condensers for sound equipment for theatres and transformers for amplifying outfits.

The Triad Tube Company, after many months of experimenting, have finally introduced their new and improved type 50 power tube and a type 81 rectifying tube.

The samples of the new tubes which have been submitted to the manufacturers of amplifying equipment have proved very satisfactory and in almost every case the manufacturers have placed large orders, according to Mr. Ray Noel, the California representative for this company.

The new National Short Wave set has found great favor with the airplane transport companies and two of the largest have standardized on this equipment, installing one in each of their planes.

One of these companies was so pleased with the results of their tests that they are going to put a National Short Wave set in each of their pilot's homes so that they will be able to communicate directly with their families when on a trip.

Mr. W. H. Cooke, Southern California representative, is being kept busy these days trying to get enough sets to supply the demand of this market.

Sol Zaney, head of the Zaney-Gill Corporation of Los Angeles, is getting to be one of our fastest-moving executives. He barely got back from the R. M. A. Convention when he headed for the San Francisco Convention, and from that he took a flying trip to Chicago, New York and points in between. While in the East he added several new distributors to his already large list and made arrangements to start a factory to supply the Middle Western and Eastern market.

The Music Box Clarion is gaining in popularity and it would surprise many of the Eastern radio manufacturers to know of the number of sets being produced daily by this progressive concern.

Charlie Kierulff and Al Ravenscroft seem to have renewed life these days as they are buzzing around opening up new dealers and telegraphing almost daily for additional shipments of sets.

Both of these men, who have been in the radio game for many years, believe that they have the best line ever put out by Crosley, and that means something, for Crosley sets have consistently "clicked" with the public for the last seven years.

A gang of the boys, led by Ray Yale and Fred Dean, went out to the Johanna Smith the other night, that well lighted and popular barge which rests some three or four miles off shore from Long Beach.

They all enjoyed a very excellent dinner, then tried their luck with some of the games. According to reports, Lady Luck was not with them, so before they take the trip again they are going to have to feel very lucky.
